AND THE PRINCIPAL FACTS IN THE VARIOUS
PHYSICAL SCIENCES:

THE MEMORY BEING AIDED THROUGHOUT BY A SIMPLE
AND NATURAL METHOD.

For Schools and Private Reference.

BY THE

REV. ALEX. MACKAY, LL.D., F.R.G.S.,

Author of 'A Manual of Modern Geography, Mathematical,
Physical, and Political,' &c. &c.

OPINIONS OF THE PRESS.

"A most valuable book of reference, which will be of immense service to students of history. His wide knowledge has directed the author at once to the most trustworthy guides in the various departments of the almost illimitable field he has traversed. . . . Every date throughout is embodied in a mnemonic sentence, so happily and tersely illustrative of the event, as to leave us fairly astonished at the patience and ingenuity of the author."—*Papers for the Schoolmaster.*

"This work is a wonderfully elaborate production. . . . 'Facts and Dates,' which in some hands would furnish forth a cyclopædia of tolerable dimensions, have their essence extracted, and here appear in the moderate compass of 317 pages. . . . Great care has been taken to bring the volume in all respects to the point which the material and historical sciences have at present reached, while deep reverence for the Bible breathes through the volume."—*London Weekly Review.*

"'Facts and Dates' is the name of a very neat and well-compiled collection of tables, not exclusively chronological, though all involving numbers. But the chief feature is an extremely simple system of mnemonics, by means of which a few appropriate words attached to each fact or event are made to carry with them a string of figures."—*Guardian.*

"Dr Mackay's book is planned with great ingenuity and skill. It is a text-book of physical science and universal chronology, adapted for scholastic purposes, on a principle of *natural mnemonics*, and gives evidence of much labour and research."—*Nonconformist.*

"A valuable text-book of physical science and universal chronology. . . . The plan is exceedingly ingenious, and at the same time eminently simple and natural."—*London Scotsman.*

"There are certainly the elements of a very desirable auxiliary to students and general readers in this portion of Dr Mackay's volume, and we hope he will expand and elaborate the part alluded to in a future publication."—*Athenæum.*

"There is a most interesting chapter on Scripture chronology, written in an admirable spirit, and displaying much ingenuity and research. . . . Our deliberate opinion is, that it is one of the finest books of the kind we have ever met with."—*Daily Review.*

“We can aver that this compendium of Facts and Dates contains a vast amount of accurate and well-digested information; and we may add that in the hands of a competent schoolmaster it must prove a most effective instrument of teaching on the subjects to which it relates.”—*Edinburgh Courant*.

“The second division deals with historical facts; in other words, it gives the chronology of the leading facts of history, and is subdivided into two parts—the one summarising sacred history in three chapters, and the other, profane history, in nine chapters. This division of the book is also of great value.”—*Aberdeen Journal*.

“The research of historic data, and mastery of scientific facts and principles, with the careful manner in which they are tabulated, cannot fail to add yet further to the author’s reputation.”—*Aberdeen Free Press*.

“We have not the least doubt that the system can be introduced with much advantage into some of the younger classes in every school, while more advanced students will gladly welcome it as an aid to memory that will be of daily and hourly use.”—*Banffshire Journal*.

“A very valuable book for teachers, and still more so for students preparing for public examinations of any kind.”—*Ayr Advertiser*.

“The care and labour requisite for the production of such a work are out of all proportion to its size, and we must congratulate the author on the extreme accuracy and comprehensiveness of the scientific part of the work, which is scrupulously written up to the knowledge of the times, and includes the latest discoveries in each of the sciences.”—*John o’ Groat Journal*.

“The amount of industry, intelligence, and research it represents is something enormous, and the way in which a valuable comment on a fact is made to give up the date is most ingenious.”—*Brighton Herald*.

“It is a work suited to almost all ages—not too far advanced or profound for the schoolroom, and, on the other hand, many engaged in literary pursuits, or preparing for public examination, will find it most useful as a work of reference.”—*Dublin Mail*.

“It will be more than valuable to the student and teacher of history as a sort of *vade mecum*. In the division of ancient history it is particularly full, and especially in all that relates to Egypt—the author having obtained for that department of his labours the aid of the most advanced scholars in ‘Egyptology.’ In this portion of the book there will be found a condensed and deeply interesting account of the discoveries and measurements of the Great Pyramid—that wonder of wonders come down to us from hoary time.”—*Montrose Review*.

“The volume is not a bare catalogue of statistics, for every department of the book is prefaced by a very able and interesting introduction, bringing out in a condensed form the prominent and latest discoveries and views in connection with the respective subjects, and also the most reliable sources of information. The labour and research of the author must have been enormous, the fruit of which will be reaped by the reader with the smallest amount of trouble. The volume will be specially valuable as a text-book for advanced classes and students, and as a book of reference in the library.”—*Press and St James’s Chronicle*.

“Considerable ingenuity has been displayed in making the mnemonic sentences illustrate the character of the various facts; and, mnemonics apart, the book, in an educational sense, is of unquestionable value.”—*Weekly Dispatch*.

“No pains have been spared to select the facts most worthy of being remembered, and to determine the dates according to the most approved system of modern chronology. Each chapter is preceded by a longer or shorter discussion of the subject on hand, remarkable for its elaborate learning and great conciseness.”—*Glasgow Journal*.

THIRD EDITION, REVISED TO DATE

WILLIAM BLACKWOOD AND SONS
EDINBURGH AND LONDON

MDCCCLXXIX

P R E F A C E.

A LIMITED acquaintance with reading, writing, and arithmetic can no longer be regarded as sufficient for the great bulk of the community. It has become imperative that the youth of our land, whether rich or poor, shall acquire some knowledge of history and the physical sciences.

Human life, however, is very short, and the struggle for existence on the part of the many seems to be daily becoming more arduous. Hence it follows that new branches of instruction, however necessary, are practically unattainable, unless they are simplified, condensed, and in every way rendered as attractive as possible. The man, therefore, who in our day produces the *best school-book* on any elementary subject confers an immense boon on the community.

The following pages consist of an earnest and elaborate attempt—prosecuted without intermission for a number of years—to popularise science and history, to enable our boys and girls to *acquire and remember* all the more important events in history, whether

sacred or profane, as well as a multitude of interesting facts in most of the physical sciences. To render such a gigantic undertaking practicable within the limits of an ordinary-sized school-book—to enable the student to master the sections in which he may be specially interested in a comparatively brief period, and *to retain through life the knowledge thus acquired*—it became necessary to have recourse to some method of *aiding the memory*. The author could not avail himself of any of the systems of Mnemonics hitherto made public, as they are all, so far as he has seen, *arbitrary, lifeless, and extremely unnatural—destitute alike of beauty, simplicity, and truth*. They are also practically *useless*; for however extraordinary the power they appear to impart to the memory, that power is invariably of short duration. The more the acquired information accumulates, the more unwieldy becomes the burden, till at length, the pressure becoming intolerable, the mind shakes off the whole in disgust.

Whatever merit or defect may attach to the method employed in this volume, it is at all events eminently *simple and natural*. The only *artificial* element characterising it is, that the letters of the alphabet are employed to express numbers. But of this feature it will probably be found impossible ever to get rid, and in fact it is rather a help than a hindrance. And such a use of letters need scarcely startle us, for ever since man became possessed of letters, they have been employed to denote numbers.

Yet it would be a serious error to imagine that the present work is a treatise on Mnemonics. The work is solely devoted to SCIENCE and HISTORY, and Mnemonics is merely employed as an *auxiliary*. It is by no means *essential* to the plan of the book; and both teacher and student may always feel themselves at perfect liberty to pass by the mnemonic sentences, should they feel so inclined. In not a few instances this may be done *at first*, owing to the strong prejudice now entertained against everything calling itself Artificial Memory. In many departments of knowledge, however, artificial aid becomes absolutely necessary; and all the objections we have heard expressed are really directed, not against the thing itself, but against the fantastic forms which it has been made to assume. If we can get quit of these, and refuse to aid the memory except by *natural methods*, we need not be apprehensive of any injurious consequences.

Geography and Chronology are justly styled "the eyes of History," and the author has long felt that his labours in the former field would be one-sided and defective did he not give an equal degree of attention to the latter. On his various geographical works the teaching profession have pronounced an emphatic verdict, and he is not without hope that a similar result will follow the publication of 'Facts and Dates.' In the chronology of the earlier ages he is aware that he has laid himself open to the charge of forsaking the old paths; but he has done this deliberately, after thorough and earnest investigation, and he respectfully craves

that his book shall have a fair and unprejudiced trial.

The author finds, as the result of many trials, that young people of about the age of ten are quite competent to understand and employ the method here illustrated, and by its means to treasure up in their minds a vast number of important facts. He has also asked the unbiassed opinion of many eminent educationists, who, without exception, have expressed their cordial approval of the method here employed, and its perfect adaptability to school purposes; while for students at the university, candidates for the civil service, and schoolmasters of every grade, they believe the book will prove invaluable.

NOTE TO THIRD EDITION.

The Author returns his sincere thanks to the reviewers and heads of schools throughout the kingdom for the high encomiums they have bestowed upon his labours. Some extracts from their "Opinions" will be found on a preceding page.

In this edition a copious and elaborate Index is added, which cannot fail to greatly enhance the practical value of the work; the chronology has been carefully revised and brought up to date,—the mnemonic sentences being omitted in the new matter, and also the type reduced, thus allowing room for the insertion of a much greater number of facts in a limited space, and at the same time affording an opportunity to the student of constructing such sentences for himself, if he so desires.

PROSPECT HOUSE, VENTNOR, I. W.,
January 7, 1879.

KEY TO THE MNEMONICS.

IN the system of mnemonics here adopted, the consonants of the English alphabet are employed to express numbers, the five vowels (a, e, i, o, u) being disregarded, and the half-vowels (*w, y*) being used to denote the cipher (0), as also the letter *x*.

This leaves eighteen consonants to express the nine ordinary numerals, or *two consonants to each*. The first two consonants of the alphabet (*b, c*) will then denote 1; the second pair (*d, f*) will denote 2; *g, h, 3, &c.*, as shown in the following diagram:—

<i>b, c = 1</i>	<i>j, k, s = 4</i>	<i>p, q, z = 7</i>
<i>d, f = 2</i>	<i>l = 5</i>	<i>r = 8</i>
<i>g, h = 3</i>	<i>m, n = 6</i>	<i>t, v = 9</i>
<i>w, x, y = 0</i>		

In the above diagram it will be observed that *three* letters are employed to denote 4 and 7 respectively, while to express 5 and 8 there is only *one*. This departure from the rule was found to be practically necessary, as *l* and *r* begin a far greater number of words than *j, k, q, z*, and as it is to the *initial* consonant of a word that we attach a numerical value.

1. When we wish to remember any fact in science, or any event in history, we have merely to form a short sentence bearing on the fact or event, and in such a way that the *first consonants* of the *several words* shall express the figures or numerals in the number we desire to remember.

2. Special care must be taken that the sentence thus con-

structed shall express one or more of the essential features of the fact or event about to be committed to memory. It will be always found that the happier and more appropriate the sentence is, the more easy it will be to remember it.

3. It will greatly facilitate the construction of brief, pointed, and appropriate sentences if we attach *no numerical value to the Article, Pronoun, Preposition, Interjection, and Conjunction*, and confine ourselves to Nouns, Verbs, Adjectives, and Adverbs. For the same reason it will be found necessary to disregard the verb *to be*, on account of its frequent occurrence.

4. A word put within parentheses does not count, such word being introduced merely to render the sentence more striking or intelligible.

5. Silent letters do not count—as, for example, *h* in honour, and *s* in island.

6. When, as occasionally happens, any word must be counted contrary to the foregoing rules, such word is printed in a different type.

7. When absolute accuracy is not required, or is, in fact, unattainable, the mnemonic sentence may be allowed a certain degree of licence. This is especially the case when the number is obviously a *round* one; but this licence should seldom be allowed beyond the first figure of the number.

8. To avoid all possible misunderstanding as to the precise words which are meant to have a numerical value in any sentence, the student will observe that all such are printed in *italics*.

EXAMPLES.—The distance of the earth from the sun, as stated at p. 9, is 92 (millions of miles, understood), and the mnemonic sentence, intended to yield up this number, is “the world’s *true distance* :” here the three first consonants are *w, t, d*, which, according to the diagram at p. ix, denote 0, 9, 2—or simply 92, as the cipher on the *left* has no value. Ex. 2. Date of the Deluge, according to the Septuagint, B.C. 3216 (see p. 71); the mnemonic sentence is, “a *general deluge* covers the *mountains* :” here the four first consonants are *g, d, c, m*, which, as the diagram shows, denote 3, 2, 1, 6, or 3216. In each example the *article* is disregarded, according to Rule 3, above.

TABLE OF CONTENTS.

DIVISION I.—SCIENTIFIC FACTS.

CHAP. I.—FACTS IN ASTRONOMY.

	PAGE
Sect. 1. Mean Distances of the Planets from the Sun,	9
„ 2. Time of the Planets' Revolution,	9
„ 3. Distances of the Comets from the Sun,	10
„ 4. Time of Revolution of the Comets,	11
„ 5. Number of the Fixed Stars,	11
„ 6. Distances of the Fixed Stars from our Sun,	12
„ 7. Proper motion of the Stars,	13

CHAP. II.—FACTS IN CHEMISTRY.

„ 8. Table of Elementary Substances,	17
„ 9. Table of Chemical Equivalents,	19
„ 10. Specific Gravity of Elementary Substances,	20
„ 11. Freezing-point of Liquids,	21
„ 12. Boiling-point of Liquids,	22
„ 13. Fusing-point of Metals,	23

CHAP. III.—FACTS IN NATURAL PHILOSOPHY.

„ 14. Action of Gravity on Falling Bodies,	26
„ 15. Various Velocities in Nature compared,	26

CHAP. IV.—FACTS IN BOTANY.

Sect. 16. The Flora of the Globe,	27
„ 17. The Flora of some European Countries,	28
„ 18. Geological or Fossil Botany,	29

CHAP. V.—FACTS IN ZOOLOGY.

„ 19. The Fauna of the Globe,	32
„ 20. Distribution of the Mammalia,	32
„ 21. The Fauna of some European Countries,	33
„ 22. Palæontology, or Fossil Zoology,	34

CHAP. VI.—FACTS IN ETHNOGRAPHY.

„ 23. Races of Mankind,	35
„ 24. Religions of Mankind,	35
„ 25. Races of Men in Europe,	36
„ 26. Religions in Europe,	36

CHAP. VII.—FACTS IN GEOGRAPHY.

„ 27. Areas of the different Continents,	37
„ 28. Population of the Continents,	38
„ 29. Areas of European Countries,	38
„ 30. Population of European Countries,	40
„ 31. Heights of European Mountains,	41
„ 32. Areas of European River-Basins,	42
„ 33. Areas of Asiatic Countries,	43
„ 34. Population of Asiatic Countries,	43
„ 35. Heights of Asiatic Mountain-Chains,	44
„ 36. Areas of Asiatic River-Basins,	45
„ 37. Areas of African Countries,	46
„ 38. Population of African Countries,	46
„ 39. Areas of North American Countries,	47
„ 40. Population of North American Countries,	48
„ 41. Height of North American Mountains,	48
„ 42. Areas of North American River-Basins,	49
„ 43. Areas of South American States,	49
„ 44. Population of South American States,	50
„ 45. Height of South American Mountains,	50
„ 46. Areas of South American River-Basins,	51
„ 47. Areas of Countries in Oceania,	52
„ 48. Population of the Countries of Oceania,	52
„ 49. Height of principal Mountains in Oceania,	53

DIVISION II.—HISTORICAL FACTS.

PART FIRST.—SACRED HISTORY.

CHAP. I.—OLD TESTAMENT HISTORY.—B.C. 5478-B.C. 4.

Sect.	1. Antediluvian Period,	69
„	2. Patriarchal Period,	71
„	3. Period of the Exodus,	73
„	4. Period of the Judges—from Joshua to Saul,	74
„	5. Period of the Hebrew Monarchy,	76
„	6. Kingdom of Israel, or of the Ten Tribes,	77
„	7. Kingdom of Judah,	81
„	8. From the Jewish Captivity to Malachi,	85
„	9. The Jews under the Greeks,	87
„	10. The Jews under the Romans,	88

CHAP. II.—NEW TESTAMENT HISTORY.—B.C. 4-A.D. 100.

„	11. From the Birth of Christ to the Ascension,	97
„	12. From the Ascension to the Introduction of the Gospel into Europe,	99
„	13. From the Introduction of the Gospel into Europe to the Death of John,	102

CHAP. III.—ECCLESIASTICAL HISTORY.—A. D. 100-476.

„	14. Early Christian Writers,	107
„	15. The Twenty Œcumenical Councils,	109
„	16. The Ten General Persecutions,	110
„	17. Principal Events in Ecclesiastical History from the Death of John to Constantine,	111
„	18. Principal Events from Constantine to the Fall of the Western Empire,	116

PART SECOND.—PROFANE HISTORY.

*PERIOD FIRST.—ANCIENT HISTORY.***CHAP. I.—HISTORY OF EGYPT.—B.C. 2550-B.C. 30.**

Sect.	1. Egypt from the Earliest Time to the Shepherd Kings, .	136
„	2. From the Shepherd Kings to the Exodus of the Israelites, .	140
„	3. From the Exodus to the Death of Alexander the Great, .	145
„	4. From the Death of Alexander to the Conquest of Egypt by the Romans,	149

**CHAP. II.—HISTORY OF CHALDÆA, ASSYRIA, AND
BABYLONIA.—B.C. 2500-B.C. 538.**

„	5. The Chaldæan or Old Babylonian Monarchy,	155
„	6. The Assyrian Monarchy,	157
„	7. Later Babylonian Empire,	161

**CHAP. III.—HISTORY OF THE MEDO-PERSIAN EMPIRE.
—B.C. 880-B.C. 330.**

„	8. The Median Kingdom to the Fall of Babylon,	163
„	9. From the Destruction of Babylon to Alexander the Great, .	164

CHAP. IV.—HISTORY OF GREECE.—B.C. 2000-B.C. 146.

„	10. The Heroic or Mythical Period,	168
„	11. Earliest Historic Period,	171
„	12. Period of Athenian Supremacy,	173
„	13. Period of Spartan Supremacy,	177
„	14. Period of Theban Supremacy,	178
„	15. Period of Macedonian Supremacy,	178
„	16. From the Death of Alexander the Great to the Conquest of Greece by the Romans,	180

CHAP. V.—HISTORY OF ROME.—B.C. 2000-A.D. 476.

Sect. 17.	Italy from the Earliest Times to the Founding of Rome,	185
„ 18.	From the Founding of Rome to the end of the Kingdom,	187
„ 19.	The Republic—to the end of the First Punic War, . . .	189
„ 20.	From the First Punic War to the end of the Third, . . .	193
„ 21.	From the Third Punic War to the Empire, . . .	196
„ 22.	The Empire—from Augustus to Aurelius, . . .	200
„ 23.	The Empire—from Commodus to Augustulus, . . .	207

PERIOD SECOND.—MEDIÆVAL HISTORY.

**CHAP. VI.—FROM THE FALL OF THE ROMAN EMPIRE TO THE
DISCOVERY OF AMERICA BY COLUMBUS.—A D. 476-1492.**

„ 24.	From Romulus Augustulus to Charlemagne, . . .	220

------------------	-----

FACTS AND DATES.

DIVISION I.—SCIENTIFIC FACTS.

CHAP. I.—FACTS IN ASTRONOMY.

WITHIN the last seven years all our previous conceptions regarding the distance of the sun from the earth and the other members of the solar system have been seriously modified. It appears that we can no longer accept of 95,293,000 miles as the true mean distance of our planet from the solar luminary, but something between 91,430,000 and 92,380,000 miles. The best way of determining the sun's distance is by means of the transits of Venus across the sun's disc. These occur very seldom, and at curiously regulated intervals. The first predicted transit took place in 1631, but astronomers failed to observe it; the next happened in 1639, and was witnessed by many scientific observers; the third in 1761; the fourth in 1769; the fifth will occur in 1874, but will be unfavourable for observation;* and the sixth in 1882, which will be rather favourable. These intervals, it will be observed, form a series, the terms of which, in years, are 8, 122, 8, 105, 8, 122, 8, &c. The last available transit took place in 1769, exactly one hundred years ago, while the next fully available one will not occur till 1882. It was from the

* See Note, p. 8.

transit of 1769 that astronomers determined the sun's mean distance from the earth to be 95,293,000 miles ; and by one of Kepler's "Laws" the distances of all the other planets were thence easily calculated. Very recently, however, it has been shown that serious errors entered into the computations based on that transit—errors, indeed, that have vitiated all the results, and which cannot be corrected by this method till the year 1882. But on a matter so deeply interesting in itself, and so vitally important to humanity, it could not be supposed that the world would willingly remain in suspense for thirteen long years. In the words of the able Astronomer-Royal for Scotland, in his recently-published 'Antiquity of Intellectual Man' (Edinburgh, 1868), "Of all material elements for supporting life on the earth, none are so dominant as those depending on the light and heat of the sun, and of all problems in natural science none is so important as the true distance of the sun. Upon that depends our knowledge of its weight and size, the weight, sizes, and distances of the planets, and even the masses, distances, and illuminating power of the fixed stars themselves. The sun's distance is therefore the great problem, and modern science has spared neither time nor expense in endeavouring to settle it. But the distance is so great, and our base-line for measuring it (the earth's breadth) so comparatively small, that modern science has found her telescopes, micrometers, divided circles, and mathematical methods all taxed beyond their powers in accurately determining *what* the distance is."

How strange that, in the latter half of the nineteenth century—an age so arrogant and boastful of scientific progress—any doubt should remain on a question of such paramount physical importance! To remove this stigma, therefore, from modern science, and to obtain, meanwhile, as near an approximation as possible of the sun's distance, astronomers have exerted themselves to the uttermost, pending their grand preparations for 1874 and 1882. Two principal classes of minor methods lay before them—one by the parallax of Mars in opposition, under the most favourable circumstances, in 1862, and the other by the perturbations of the planets or of the moon. Astronomers strenuously availed themselves of both. The several mean re-

sults, each from different observations, showed distances varying mostly between $2\frac{1}{2}$ and 4 millions of miles less than had been theretofore received from the transit of Venus in 1769. So great and so uncertain a reduction of distance induced M. Powalky, in Germany, to perform the important service of making, from the original observations of that transit, an elaborate recomputation, in 1864, founded partly on the recently-determined and more correct longitudes of the places of the original observations. M. Powalky's new result, 92,254,000 miles, was approved in 1867 by Professor Simon Newcombe of the United States, and was confirmed in a general sense by M. Faye's researches on the same transit, and by results advocated by M. Delaunay from other sources. Since the above recomputation was published by M. Powalky and Professor Newcombe, Mr E. J. Stone, of the Royal Observatory, Greenwich, has followed, similarly favouring the scientific world with an independent recomputation from that transit, and more than confirming M. Powalky's diminution of the distance—Mr Stone's result being the yet shorter distance of 91,736,000 miles. Very evenly midway between these two results lies the probable truth, as will be further noticed (p. 8); and the scientific world looks forward with ever-deepening interest to the approaching renewal of that rare astronomical opportunity, as well as to possible improvements in M. Leon Foucault's independent experimental method, of more conclusively solving the great problem.

In connection with this subject we are glad at being able to lay before the student the following interesting facts, chiefly gleaned from a very elaborate but as yet unpublished paper by a man of rare genius, who is destined, no doubt, to leave his mark on the thinking of the age—we refer to William Petrie, Esq., a Civil Engineer, London, whose MS. has been obligingly lent us by Professor C. Piazzi Smyth, himself an indefatigable explorer in the same field, and whose chief work, entitled 'Life and Work at the Great Pyramid,' constitutes an era in modern Egyptology. The paper referred to gives an epitome of the numerous though unsuccessful efforts of human reason to recover, by its own unaided efforts, that fundamental *datum* which the Creator revealed to man in the

earliest age of human history—the distance of the earth from the centre of the solar system. Herodotus, “the father of history,” who flourished B.C. 500, and consequently near the commencement of the intellectual life of Greece, narrates the first recorded attempts or impressions in this direction. These were made not long before his own day, and were believed in both by himself and his contemporaries, though they placed the sun within the limits of the winds on the surface of the earth, and at a distance therefrom of some eight to ten miles! Anaxagoras, the Ionian, who flourished fifty years later, estimated the sun’s absolute size as equal to that of the Peloponnesus. Hence, with the sun’s known angular diameter, his distance should be about 18,000 miles. Aristarchus, the astronomer of Samos, who died B.C. 280, made an immense advance in the right direction. Employing a true though rather rough method of observation—viz., the moon’s dichotomy—he at once increased the received sun’s distance to 5,300,000 miles. With this result the world seems to have been satisfied for four centuries, for we find Claudius Ptolemy, the celebrated astronomer of Alexandria, re-observing and substantially adopting it in A.D. 140. It is unnecessary to follow the blind gropings after truth that characterised the thirteen subsequent centuries, when the human intellect enjoyed its profound and lengthened repose, giving few other proofs of its vitality than the subtle but frivolous sophistries of the schoolmen. After a sleep of more than a millennium, the European mind, like a giant refreshed with wine, was suddenly roused to unprecedented energy. Several grand events marked the period of its awakening—the invention of printing in 1440; the revived study of the ancient classical languages; and the discovery of a new world in 1492. In the beginning of the sixteenth century, Martin Luther began the Reformation in Germany; while, early in the seventeenth, science could boast of such intellectual heroes as Galileo, Kepler, and Tycho Brahe. In 1620 Kepler estimated the sun’s distance from the earth at 26,400,000 miles, and at the same time announced the great “law” regulating the distances of all the other planets. This result startled men, on account of the increased size which it gave to the planetary spaces.

Mankind felt a difficulty in expanding their ideas to receive the truth of the vastness of nature that was beginning to open before them. But science was now pursued on correct mathematical principles; and in 1750 the French astronomer, De la Caille, taking Mars in opposition as his subject of observation, and the terrestrial distance between Paris and the Cape of Good Hope as his base-line, more than trebled the distance announced by Kepler, and gave the world the first tolerable approximation to the truth by stating as his result 81,650,000 miles. The first astronomer that calculated the sun's distance from a transit of Venus, and from observations taken from nearly opposite sides of the earth, was the celebrated Delambre. Publishing his observations in 1789, he confidently announced the vastly greater quantity of 96,100,000 miles as the sun's true distance; and for a whole generation his finding was adopted by the scientific world. About the year 1820, Encke, Bessel, and other German astronomers, using refined mathematical processes, corrected Delambre's estimate, and brought it down to 95,293,000 miles; and nearly every astronomer now living accepted this finding, till within the last few years. We must observe, however, that in 1832 Professor Henderson, the first Astronomer-Royal for Scotland, and some time her Majesty's Astronomer at the Cape of Good Hope, from his own observations when there, announced the greatly-reduced quantity of 90,537,000 miles; but could gain no hearing in a world completely given up to the belief that the transit-of-Venus observations, as computed by the great German and French mathematicians of the present century, must be correct. In this uncertainty the question of the sun's distance remained till 1862, when Mars was again in opposition. In that year, accordingly, it was abundantly observed in both the northern and southern hemispheres—Greenwich linking itself with the Cape of Good Hope, and St Petersburg with Australia. Strange to say, when these measurements were computed by the originator of this method (Winnecke, in Russia), they gave, from 26 independent sets of observations, a mean result of 91,184,000 miles, thus remarkably confirming the Scottish astronomer's result, as against the received distance; and thus more than a quarter of a century of progress was needed to

aid astronomers in general before they suspected themselves of being in any such error, or would credit Henderson's long prior amendment as being nearer to the difficult truth. The fact, however, was in a great measure confirmed at Greenwich Observatory: 58 sets of observations there computed by E. J. Stone gave a mean result of 91,400,000 miles; afterwards about 100 by Newcombe, in the United States, gave 92,306,000; and some by Hall, United States, 92,442,000 miles. In 1862, M. Foucault, a most ingenious French investigator, made a series of interesting experiments on the velocity of light, and from these, through the agency of the eclipses of Jupiter's satellites, and their difference of time as seen from opposite sides of the earth's orbit, he was enabled to announce the sun's true distance as 92,254,000 miles. We have already mentioned M. Powalky's elaborate recomputation of the calculations connected with the last transit of Venus, and we refer to it here only because we have come up to it in the order of time, and also because we are satisfied of the comparative accuracy of his result. That result, republished in 1867 by Professor Newcombe, amounted, it will be remembered, to 92,254,000 miles, being identical in round numbers with the result obtained by Foucault from data of a wholly different kind, and not very different from that obtained by S. Newcombe from the observations of Mars. Newcombe combined these three recent results, and some from minor methods—in fact, all results that he regarded as available; whence he deduced a grand mean of 92,380,000 miles as the probable truth. But, from other observations and computations, mostly by similar methods, the mean, as adopted at the Greenwich and Paris Observatories since 1864, has been 91,430,000 miles. The advocates of these two grand means group themselves into two sets, suggestive of some bias of party feeling on both sides—a suspicion not without support from the literature of this great discussion. A careful attempt, made by W. Petrie, in 1869, to assign impartially the relative weight due to each of the many mean results composing these two grand means of the rival parties, gives a final grand mean of 92,061,000 miles; but he attaches to this result the probable though insignificant error (not by any arbitrary guess-

work, but computed by the recognised laws of probability) of *plus* or *minus* 90,000 miles, or only about $\frac{1}{10000}$ part of the whole quantity. That is to say, the truth is proved to lie probably between 91,970,000 and 92,150,000—unlikely to be much beyond these limits either way, and most likely to be nearly midway between them; and we cannot expect, by purely scientific methods, to attain to a greatly higher degree of accuracy.

But these facts, however interesting, by no means exhaust the subject. The mechanical school of Egyptologists to whom we have referred—the late John Taylor of London, Professor C. Piazzi Smyth of Edinburgh, Mr Petrie, Civil Engineer, London, Mr St John Vincent Day, C.E., Glasgow, with a daily-increasing number of other truth-loving investigators—have within the last five years originated an entirely new branch of the science. From C. Piazzi Smyth's lengthened personal inspection of the most ancient monuments of Egypt, his innumerable and most elaborate measurements of that one amongst them which is confessedly the most ancient, and from enlightened reflection on the results so obtained, they adduce the most satisfactory evidence that, in the earliest postdiluvian age, those of our race who had not degraded themselves with the loathsome idolatries of the nations, and who reverently cherished the primeval revelation vouchsafed by the Creator to our species, were, *by some means or other*, most certainly in possession of that grand secret which, for the last two thousand years, science has in vain been endeavouring to discover for herself, and relying on her own unaided resources.

The most ancient architectural monument now existing on the earth's surface—the Great Pyramid at Jeezeh—demonstrated by astronomy to have been erected B.C. 2170 (or close on 4040 years ago), has now been investigated and explored as no other monument, ancient or modern, ever was; and the indefatigable explorers have been rewarded with an abundant harvest of the most brilliant discoveries. One of these, discovered by Mr Petrie, is the clear indication that the architect of this pyramid knew the mean distance of the sun from the earth with an exactitude to which modern science never approached till within the last seven years. This distance he symbolises as $\text{= height} \times 10^9$. The best lineal and angular measurements—

namely, those of M. Jomard, of Col. Howard Vyse, and recently of Professor C. Piazzi Smyth—have been combined by W. Petrie, who shows therefrom that the original height of the great pyramid, from the pavement at its base, was 486.25 British feet: this multiplied, as above said, by the ninth power of ten—*i.e.*, 1,000,000,000, gives a result of 486,250,000,000 feet, or 92,093,000 *British miles, for the mean distance of the sun.* We have seen that the latest collective result of science reckons the probable truth to be between 91,970,000 and 92,150,000; while the Great Pyramid gives 92,093,000 miles, being completely within these minimum uncertainties of science. Moreover, in a paper to the Royal Society of Edinburgh, 1869, he has well shown that this uncommonly complete numerical coincidence is not merely fortuitous, because, striking as is the coincidence itself, it constitutes but a small part of the evidence discovered, that this was *intended* in the original design of the structure. According, then, to the best historical and monumental evidence, this is the exact mean distance of the sun from our planet. Only a few years ago, there was not an astronomer in Europe who would not have instantly rejected this result, as more than three millions of miles away from the truth; but now—such has been the progress of astronomy within the last decade of years—there is not, perhaps, one among the whole number who would risk his reputation by denying its possible correctness. The brief sketch of the progress of astronomy here given—even were there no other reasons for asserting its absolute exactness—clearly points to such a conclusion; for from the days of De la Caille downwards, all the results of modern science, like the vibrations of a pendulum coming to rest, approach closer and closer to one fixed point; and, strange to say, that fixed point is precisely the number indicated by the Great Pyramid, and therefore, we believe, *revealed* to man ages and generations before science had any existence.*

* For some of the results of the numerous observations of the Transit of Venus, 9th December 1874, see the Author's little volume, entitled 'Physiography and Physical Geography.' Ninth thousand, pp. iv. and 140. Edinburgh: W. Blackwood & Sons, 1878.

SECT. I.—Mean Distances of the Planets from the Sun.

(In millions of miles.)

15. Vulcan's distance. (Eng. Mechanic, Sept. 1878.)
a burning lamp.
36. Mercury : actual distance, 35,649,000.
glowing Mercury.
67. Venus : actual distance, 66,614,000.
the nearest planet.
92. Distance of the earth, as indicated by the Great Pyramid of Jeezeh : actual distance, 92,093,000.
*the world's true distance.**
140. Mars : actual distance, 140,322,000.
the celebrated Kepler wrought at it.†
259. The minor planets, 100 in number (*average*).
they fill a large void.
479. Jupiter : true distance, 479,141,000.
satellites appear in his train.
878. Saturn : true distance, 878,461,000.
the rings of this planet are remarkable.
1766. Uranus : true distance, 1,766,565,000.
a curious planet with a multitude of moons.
2766. Neptune : true distance, 2,766,133,000.
the finest proof of modern mathematics.
240. Moon's distance from the earth in thousands of miles.
distance of our satellite from the world.

SECT. 2.—Time of the Planets' Revolution.

(In days.)

24. Time of Vulcan's revolution.
his years fly swiftly.
87. Time of Mercury's revolution.
the revolution of Apollo.

* Or, seeing that the ancients gave to the pyramids of Egypt the first place among "the seven wonders of the world," we can express the sun's distance still more exactly thus: *true distance of the world, by the true height of the world's worthiest wonder.*

† Kepler spent twenty years of unremitting study in determining the true orbit of this planet, and in deducing from it his three famous "laws."

224. Time of Venus' revolution.
the *first descried star* (of eve).
365. Time of the earth's revolution.
the world's *great annual ellipse*.
686. Time of Mar's revolution.
the *moonless orb* of Mars.
1684. Time of the planetoids' revolution.
they *career* between *Mar's orbit* and *Jupiter's*.
4333. Time of Jupiter's revolution.
Jupiter, the *greatest globe* in our heavens.
- 10,759. Time of Saturn's revolution.
the *central exterior planet*, with his *luminous train*.
- 30,686. Time of Uranus or Herschel's revolution.
Herschel wanted to name it after the *reigning monarch*.
- 60,126. Time of Neptune's revolution.
the *naked eye* cannot discern Neptune.
- 29½. The moon's period of revolution round the earth.
a wave of waters *follows her everywhere*.

SECT. 3.—Distances of the Comets from the Sun.

(*In miles—supply 000.*)

538. Perihelion or nearest distance of the comet of 1843 (the smallest known perihelion).
it *almost grazed* the sun.
- (*Supply 000,000.*)
384. Perihelion distance of the comet of 1729 (greatest known perihelion).
it *grazed* the orbit of *Jupiter*.
387. Aphelion distance of Encke's comet (smallest known aphelion).
goes beyond the region of the *planetoids*.
- 40,121. Aphelion distance of the great comet of 1811.
shcne for a year, a *bright and flaming comet*.
- 406,130. Aphelion distance of the comet of 1844 (greatest aphelion known).
our *system's extremest member* counts ages in his year.

SECT. 4.—Time of Revolution of the Comets.

Days.

- 1,210. Encke's comet (*shortest period known* = $3\frac{1}{4}$ years).
this comet finds an obstacle in his way.
- 2,042. Brörsen's comet (= 5.58 years).
a Dane, expert in astronomy, discovered it.
- 2,413. Biela's comet (= 6.61 years).
the disrupted sections of Biela gleam.
- 2,718. Faye's comet, the least eccentric (= 7.44 years).
Faye performs the (least) eccentric orbit.
- 28,105. Halley's celebrated comet (= 76.78 years).
days required to complete the year of Halley.

Years.

- 2,500. Donati's comet of 1785.
Donati's luminous comet, in years.
- 3,000. The great comet of 1811.
gloriously wends his way through the welkin.
- 15,864. Newton's celebrated comet of 1680.
this comet long remained a marvel to astronomers.
- 75,000. The first comet of 1780.
a period lasting a thousand human lives.
- 102,050. The second comet of 1844.
consider the extraordinary duration of yonder luminary's year.
- 123,683. The comet of 1744 (*the longest period known*).
a comet demanding a hundred millenniums to reach his goal.

SECT. 5.—Number of the Fixed Stars.

21. Number of stars of the first magnitude.
their distance is calculable.
65. Number of stars of the second magnitude.
worlds of inferior luminosity.
190. Number of stars of the third magnitude.
a curious tripling observable.

426. Number of stars of the fourth magnitude.
stars of the fourth magnitude.
- 1,100. Number of stars of the fifth magnitude.
we are able to count yonder worlds.
- 3,200. Number of stars of the sixth magnitude.
how distant are yonder worlds!
- 3,206. Stars visible to the naked eye at Berlin.
the greatest display of worlds in Prussia.
- 4,146. Stars visible to the naked eye at Paris.
stars that can be seen at Paris.
- 4,638. Stars visible to the naked eye at Alexandria.
see the nightly galaxy at Alexandria.
- 5,000. Total number of stars visible at the equator.
the largest worlds in the whole welkin.
- 13,000. Number of stars of seventh magnitude (visible
only through the telescope).
the celebrated Galileo first saw these worlds.
- 40,000. Number of stars of the eighth magnitude.
starry worlds belonging to class eight.
- 142,000. Number of stars of the ninth magnitude.
countless stars dimly shine in class ninth.
- 500,000 (million). Total number of stars visible through
the best telescopes).
O Lord, wondrous are thy works, in wisdom thou
madest them all!

SECT. 6.—Distance of the Fixed Stars.

(In billions of miles.)

21. Distance of *Alpha Centauri*, the nearest star known.
distance of a Centauri.
56. Distance of 61 *Cygni* (the first measured star).
the illustrious (Bessel) measured it.
75. Distance of *Vega* (Alpha Lyrae).
welcome a parallax for the lyre!
85. Distance of *Sirius*, our brightest star.
what a resplendent luminary!

147. Distance of *Iota* in Ursa Major (the Plough).
(Peters) *obtained this star's parallax.*
154. Distance of *Arcturus* (α Boötes).
Boötes' largest star.
292. Distance of *Polaris* (the Pole star) in Ursa Minor.
directly vertical in Greenland.
426. Distance of *Capella*.
the extremest star whose distance is measured.
- 33,908. Supposed distance of stars of 16th magnitude.
ages ago they transmitted these waning rays.

SECT. 7.—Proper Motion of the Stars.

(In miles per second.)

5. Our sun's motion through space.
he wends his way round *Alcyonæ*.
13. Rate of motion of the nearest star (α Centauri).
the wandering *bull hunter*.
14. Sirius' rate of motion.
our *brightest star*.
30. Capella's rate of motion.
the wandering *goat of the waggoner*.
41. Rate of motion of 61 Cygni.
the wandering *star of Cygnus*.
54. Rate of motion of Arcturus (α Boötes).
the *largest star* (in Boötes.)

CHAP. II.—FACTS IN CHEMISTRY.

NONE of the physical sciences has made greater progress in the last twenty years than Chemistry. To such an extent has this been the case, that the standard works of the past generation have now become almost obsolete. New views have arisen as to the constitution and chemical properties of matter; a re-

formed chemical notation has thence of necessity ensued ; the nomenclature of the science has been simplified and greatly improved ; the combining proportions of the elementary substances has been ascertained with far greater precision ; and numerous fundamental laws have been discovered. As we are not here writing a treatise on chemistry, we are precluded from entering at large on any of these subjects ; but the following particulars, gleaned from a multitude, may not be deemed wholly out of place.

1. The number of simple or elementary substances out of which the whole earth, as well as the other members of the solar system, has been built up, has been raised from 54 to 65. These are divided into two primary groups—viz., METALS, of which there are 52 (the principal of them being gold, silver, platinum, copper, iron, lead, zinc, tin, mercury); and Non-Metals or METALLOIDS, of which there are 13—viz., oxygen, hydrogen, nitrogen, chlorine, carbon, sulphur, phosphorus, iodine, fluorine, bromine, boron, silicon, and selenium.

2. On each of these 65 substances the Creator has stamped, in deep and indelible characters, a *particular and invariable number*, which forms, as it were, the law of its being, and determines in what proportions it shall unite with every other substance, whether simple or compound. Thus 1 is stamped on hydrogen, 12 on carbon, 16 on oxygen, 56 on iron, &c. In the event, therefore, of iron uniting with oxygen, the two substances, as to weight, will be always found in the ratio of 56 to 16. Under the operation of this mysterious principle, the *identity of species* in the mineral world is rigidly preserved, and, notwithstanding the prodigious number of mineral substances, all confusion is avoided.

3. All chemical compounds are definite in their nature, the ratio of the elements being constant. Many substances, however, are capable of uniting with others in several proportions ; but, when this is the case, it is invariably found that these proportions bear a very simple ratio to each other. Further, if a body A unites with several other bodies B C D, then the quantities of B C D which respectively unite with A represent also the proportions in which they shall unite among each other. From

this it follows that the combining quantity of a compound is the sum of the combining quantities of its components.

4. Such being the important part which these invisible numbers play, it is obvious that it is of the utmost consequence to chemistry that they be determined with the greatest accuracy. And here the revolution that has taken place in modern chemistry is more easily perceived than anywhere else, for it will be found that during the last twenty years no fewer than 32 of the elementary substances—or precisely one-half of the whole number—have had their atomic weights exactly doubled, while not a few more have been materially modified. The student will find in the table at the end of this Introduction the latest determinations of the combining powers of all the elementary substances, together with their most recently established specific gravities.

5. In regard to changes in the nomenclature of the science, we can here only remark that the smallest quantity of any substance which has the power of uniting with one or more particles of the same or any other substance is called an *atom*. It is now believed that such an atom cannot exist in its separate or isolated state, but must either be linked together with another atom of the same kind, or united with an atom of a different kind of matter. Single atoms, it is maintained, are nowhere found in nature, however low we penetrate into the organic or inorganic world, but invariably atoms in a dual form. Such dual atom is named a *molecule*, and is the smallest quantity of matter that can exist in a separate form.

6. But by far the greatest discovery adorning the annals of modern chemistry remains to be specified. The 65 elementary substances divide themselves, in respect to their combining power, into six great natural groups—viz., Monads, Dyads, Triads, Tetrads, Pentads, and Hexads. The MONADS are eleven in number—viz., six Metals (silver, sodium, potassium, cæsium, lithium, rubidium), and five Metalloids (hydrogen, chlorine, fluorine, iodine, bromine). Their distinguishing characteristic is, that one atom of any one of them can unite with, or replace, *one* atom of any other, and no more. For example, one atom of hydrogen can combine with one atom of chlorine,

and form hydrochloric acid ; or the atom of hydrogen in the acid may be replaced by one atom of any other monad, as sodium, which, setting free the atom of hydrogen, unites with the atom of chlorine, and forms chloride of sodium (common salt). The DYADS are fourteen in number, only one of which is non-metallic (viz., oxygen, the type of the group); while thirteen are metals, the best known of which are—mercury, zinc, copper, calcium, magnesium, and strontium. In regard to combining power, each of this class is equivalent to *two* of the former. For example, an atom of oxygen will readily combine with two atoms of hydrogen, and form water ; but it refuses to unite with one atom of hydrogen. Oxygen is, therefore, termed a Dyad, having twice the combining power of hydrogen. In like manner, a TRIAD is an elementary substance which, when it enters into combination, requires *three* Monads to neutralise it, or one Monad and a Dyad. For example, one atom of the chloride of bismuth contains three atoms of chlorine, that element being a Monad, and one atom of the metal, which is a Triad. Should the three atoms of chlorine be set free, and the one atom of bismuth be allowed to unite with any other monad, it would require three atoms of such monad to saturate it. The Triads are only four in number—viz., three Metals (gold, rhodium, thallium), and one Metalloid (boron). The TETRADES are substances which have the property of uniting with or replacing *four* combining weights of the Monad class, two Dyads, or one Triad and one Monad. There are sixteen Tetrads—viz., two Metalloids (carbon, silicon), and sixteen Metals, only four of which are common (tin, lead, platinum, and aluminium). There are eight PENTADS, two of which are non-metallic (nitrogen, phosphorus), and six Metals, the best known of which are arsenic, antimony, and bismuth. Finally, there are ten HEXADS, the best known of which are sulphur, iron, nickel, cobalt.

7. Closely allied to the preceding is the kindred and equally remarkable laws regulating the combining *volumes* of the elements when reduced to or already existing in the gaseous state. (1.) If we take that number of grains of any two gases which is denoted by their respective atomic weights, we do not find them

occupying an amount of space corresponding to their weight, but precisely *equal spaces*, provided the temperature and pressure are the same: thus, 1 grain of hydrogen gas will occupy the same amount of space as $35\frac{1}{2}$ grains of chlorine gas. (2.) Still more remarkable is the next law: if both the combining gases belong to the class of Monads, then the two equal spaces which the gases occupied when separate are precisely equal to the space they occupy after union; but should one of the gases belong to the class of Monads and the other to that of Dyads—as hydrogen and oxygen, the two constituents of water—union cannot take place until two volumes of the former be brought into contact with one of the latter; and the remarkable thing is, that three spaces or volumes are not occupied by the united gas, as we might have expected, but two volumes only. The same law holds good in regard to the other two classes above referred to. In order to form gaseous ammonia, for example, one volume of nitrogen, usually a Triad, requires three volumes of the Monad hydrogen, and the result is, not *four* volumes of ammonia, but *two*. For a fuller illustration of the several topics here briefly discussed, we must refer the student to Roscoe's 'Lessons in Elementary Chemistry,' Hofmann's 'Introduction to Modern Chemistry,' 'Inorganic Chemistry,' by the late Dr G. Wilson, Professor of Technology in the University of Edinburgh, and especially to Dr Miller's 'Elements of Chemistry, Theoretical and Practical,' revised by Herbert MacLeod, F.C.S.: London, 1877.

SECT. 8.—Number of Elementary Substances.

- 65. Number of elementary substances.
existing *number* of *elements*.
- 52. Number of simple metallic substances.
their *lustre* *distinguishes* them.
- 13. Number of metalloids, or non-metallic substances.
oxygen, *carbon*, *hydrogen*, &c.

The following Table exhibits the atomic weight and specific gravity, so far as ascertained, of all the Elementary Substances—the standard for the sp. g. of solids and liquids being water, and atmospheric air for gases.

NAMES OF ELEMENTS.	Atomic weight, hydrogen=1.	Specific gravity,	NAMES OF ELEMENTS.	Atomic weight, hydrogen=1.	Specific gravity,
Aluminium, . . .	27.5	2.56	Manganese, . . .	55.	8.01
Antimony, . . .	122.	6.71	Mercury, liq., . . .	200.	13.59
Arsenic, . . .	75.	5.96	Molybdenum, . . .	96.	8.62
Barium, . . .	137.	4.	Nickel, . . .	59.	8.82
Beryllium or Glucium, . . .	9.3	2.1	Niobium, . . .	94.	6.3
Bismuth, . . .	210.	9.8	Nitrogen, gas, . . .	14.	0.972
Boron, . . .	11.	2.68	Osmium, . . .	199.	21.4
Bromine, liq., . . .	80.	3.18	Oxygen, gas, . . .	16.	1.107
Cadmium, . . .	112.	8.69	Palladium, . . .	106.5	11.8
Cæsium, . . .	133.	...	Phosphorus, . . .	31.1	1.83
Calcium, . . .	40.	1.57	Platinum, . . .	197.5	21.53

SECT. 9.—Table of Chemical Equivalents.

(Hydrogen = 1.)

122. Antimony.
brittle, with fine fracture.
75. Arsenic.
extremely prejudicial to life.
210. Bismuth.
dense, brittle, and white.
11. Boron.
exists in common borax.
80. Bromine.
(mineral) waters rarely want it.
40. Calcium.
exceedingly useful when oxidised.
12. Carbon.
charcoal and diamonds.
- 35.5. Chlorine.
a yellowish green element.
64. Copper.
malachite from Australia.
19. Fluorine.
exists in the bones and teeth.
197. Gold and platinum.
common in Victoria and Peru.
1. Hydrogen.
exceedingly buoyant.
127. Iodine.
in colour and odour peculiar.
198. Iridium.
common in the valleys of the Urals.
56. Iron.
largely manufactured.
207. Lead.
formed into water pipes.
24. Magnesium.
(burns) with dazzling splendour.

200. Mercury.
freezes in winter at Yakutsk.
59. Nickel and cobalt.
wonderfully like each other.
14. Nitrogen.
a component of strychnine.
16. Oxygen.
the breath of animals.
31. Phosphorus.
exists in guano and bones.
39. Potassium.
exists in granite and trap.
28. Silicon.
its oxide forms the rocks.
108. Silver.
Copiapó yields the richest.
23. Sodium.
water is denser and heavier.
32. Sulphur.
Gomorrah destroyed by it.
118. Tin.
common Cornish ore.
65. Zinc.
the main alloy (in brass).

SECT. 10.—Specific Gravity of Elementary Substances,
Water being unity.

21. Platinum, osmium, and iridium, specific gravity of.
the densest bodies.
19. Specific gravity of gold.
wrought into costly trinkets.
14. Mercury.
warns us of coming storms.
11. Silver and lead.
of a whitish beautiful colour.
10. Bismuth.
Bohemia yields it.

9. Copper, nickel, and cobalt.
wires of extreme *tenacity*.
8. Iron and manganese.
oxidise by exposure to *air*.
7. Tin and antimony.
wrought into *pewter*.
7. Zinc.
extensively wrought into *pipes*.
6. Arsenic.
extinguishes *animal* (life).
3. Bromine, chlorine, boron, carbon, and silicon.
in weight they exceed *glucinum*.
2. Magnesium, sulphur, and phosphorus.
weight of water *doubled*.
- 1— Sodium, potassium, and lithium.
in weight they yield to *ice*.
- 5·7. Specific gravity of the earth as a whole.
the weightiest of *all* the *planets* (except Mercury).

SECT. 11.—Freezing-point of Liquids.

(*Fahrenheit's thermometer.*)

- 220°. Greatest artificial cold hitherto produced.
the *famous frigorific experiment*.
- 56°. Greatest natural cold hitherto observed.
at Yakutsk, on the *Lena*, is the *maximum*.
- 39°. Mercury freezes.
(alcohol) *gauges* this *temperature*.
- 25°. Vitriol or sulphuric acid.
an exceedingly *dense liquid*.
- 7°. Freezing-point of brandy.
the wonders of the (frigid) *zone*.
- 0°. The zero of Fahrenheit's thermometer.
warmer than the winter at *Yakutsk*.
- 14°. Turpentine freezes.
it *becomes solid*.
- 30°. Milk freezes.
how white it is!

- 32°. Water freezes.
hoar frost.
- 36°. Olive-oil freezes.
the girls murmur.
- 39°·2. Water at maximum density.
water's heaviest temperature.
- 46°·46. Average mean temperature of Scotland for the ten years 1856-65, ascertained from 55 separate localities by the Scot. Meteorol. Society.
Scotland's mean (temperature).
- 62°. Zero temperature of British linear measures.
an inconvenient degree.
- 68°. Mean temperature of the earth's habitable surface.
the yearly mean of the earth.
- 90°. Tallow melts.
the waste of tallow is excessive.
- 154°. Wax melts.
a wax candle illuminates sparingly.
- 226°. Sulphur melts.
friction fires a match.

SECT. 12.—Boiling-point of Liquids.

- 72°. Boiling-point of water *in vacuo*.
water from pressure freed.
- 95°. Boiling-point of ether.
an extremely volatile liquid.
- 140°. Liquids *in vacuo* boil 140° lower than under atmospheric pressure.
they boil soon in an exhausted (receiver).
- 175°. Boiling-point of alcohol.
the boiling point of alcohol.
- 212°. Ordinary boiling-point of water (barometer at 30 in.)
a fluid to cook our food.
- 320°. Naphtha, turpentine, and sulphurous ether boil.
great danger of explosion.
- 599°. Fish-oil and tallow.
oil and tallow are tardy.

- 640°. Boiling-point of sulphuric acid.
the *monohydrate* of sulphuric acid.
- 662°. Boiling-point of mercury.
the *mercury now fumes*.
- 983°. Heat of incandescence.
the *temperature of red heat*.

SECT. 13.—The Fusing-point of Metals.

- 39°. Fusing-point of mercury.
(spirit) of wine *gauges this temperature*.
- 136°. Potassium.
brittle, greyish, and malleable.
- 207°. Sodium.
of a *dull white appearance*.
- 451°. Tin.
a *silvery lustre characterises it*.
- 620°. Lead.
malleable, dense, and white.
- 775°. Zinc.
for water pipes it is *preferable to lead*.
- 1873°. Silver fuses.
in commerce regarded as *preferable to gold*.
- 1996°. Copper.
copper turns thin as mercury.
- 2016°. Gold.
fine yellow coins are made of it.
- 2786°. Cast iron.
the *founder pours his running metal*.
- 21,000°. Malleable iron.
the *furious blast of Wedgewood's wind furnace*.

CHAP. III.—FACTS IN NATURAL PHILOSOPHY.

ONLY a very limited number of the facts in this most important branch of science can be recorded in the following sections. For the most part we must content ourselves with a comparison

of the various velocities seen existing in nature. We give the velocity of sound travelling through the air as 1130 feet per second, but usually it is regarded as somewhat less. In 1822, the French Board of Longitude instituted experiments to determine the velocity of sound through atmospheric air. For this purpose two heights were selected near Paris, about $11\frac{1}{2}$ miles apart, and a piece of ordnance planted on each. These were fired during the night, at regular intervals of 10 minutes, and the time that elapsed between the discharge at one station and the report at the other was exactly measured by chronometers, when it was found that the distance (20,355 yards) was traversed in 54.6 seconds, being at the rate of 1118 feet per second. During these experiments the temperature of the air was 16° Cent. or 60° Fahr. ; but at 10° Cent. the velocity diminished to 1106 feet, and at zero to 1093 feet. By subsequent experiments it appears that the velocity is materially affected by the *kind* of gas through which the sound passes. Thus, at a uniform temperature of 32° Fahr. sound travels through carbonic acid gas at the rate of 856 feet per second ; through oxygen gas at the rate of 1040 feet ; atmospheric air, 1093 feet ; and hydrogen gas, 4163 feet. These facts establish the general law, that *the velocity is in all cases inversely as the square root of the density of the gas*. The velocity is also said to be affected by the *loudness* of the sound, though this is not borne out by experiments continued for many years at the Edinburgh Royal Observatory, where the time-gun—which is fired electrically at the Castle, in all weathers, with reports sometimes loud and startling, and sometimes scarcely audible—shows a velocity always exceeding 1100 feet per second. When sound is made to traverse liquids or solids, the speed is much greater. Colladon and Sturm, in 1827, determined that sound passes through water (at $8^{\circ}.1$ Cent.) at the rate of 4708 feet per second, or four times greater than through the atmosphere ; still more recently, experiments give for beams of wood about sixteen times greater ; for solid granite, 1664 feet ; for cast iron, 11,865 ; and for the metals generally, between four and sixteen times a greater speed than in air. The velocity of light was first determined by astronomical observation. In 1675, Römer, a Danish philosopher,

by observing the eclipse of one of the satellites of Jupiter, calculated the velocity of light at 192,000 miles per second, inasmuch as it traversed the diameter of the earth's orbit, or 190,000,000 of miles, in 16 minutes 36 seconds. We have shown, however, in our preliminary observations on Astronomy, that the distance of the sun from the earth can no longer be regarded as 95,000,000 miles, but 92,000,000. This makes the velocity of light to be 186,000 miles per second. In 1849, M. Fizeau, a Frenchman, made an ingenious experiment to determine the velocity of light, and arrived at the conclusion that it travels at the rate of 196,000 miles per second, a rate not very different from that given by the Danish astronomer. Still later, however, another French philosopher—viz., M. Foucault, in 1862, made his celebrated experiments on the velocity of light by means of a rotating mirror, and announced 185,170 miles per second as the true rate (see p. 6). Still more divergent were the results obtained for the velocity of electricity, until Sir W. Thomson showed that there was a most important correction dependent on the *length of the wire*—the electric speed decreasing in an accelerated ratio with the distance it has to traverse. Thus, were it possible to observe the rate of passage through a wire only 1 foot long, it might exceed 1,000,000 miles per second. In the wire-coil of an experimental apparatus, Professor Wheatstone, upwards of thirty years ago, had found a velocity equal to 288,000 miles per second—or considerably above the highest estimate for the velocity of light. But when astronomers, soon after, began to use the long lines of the electric telegraph from city to city in order to measure the true longitudes of the latter, the practical velocities along the entire lengths were found vastly smaller. Thus, in the new Atlantic Telegraph Cable, 1866 miles long—the facilities for the motion of the electric fluid being unusually great—the time occupied in the passage is $\frac{1}{100}$ of a second; while in a still more recent experiment on land-wires, by Mr G. Davidson, an American astronomer, the average velocity has been found to be 10,000 miles per second.

SECT. 14.—Action of Gravity on Falling Bodies.

(Feet per second.)

16. Distance traversed by a body falling from a state of rest, in free space, the *first* second.
accelerated motion.
32. Velocity at end of *first* second.
our globe's force (of gravity).
48. Distance traversed the *second* second.
watch the stone returning.
80. Distance traversed the *third* second.
the wind rarely exceeds this.
112. Distance traversed the *fourth* second.
with your watch observe a bird falling.
256. Total distance traversed in four seconds.
what a distance in a little moment!

SECT. 15.—Various Velocities in Nature Compared.

(Feet per second.)

9. Minimum velocity of Newton's comet.
weary with travelling.
32. Velocity of a falling body at end of first second.
gravitation's force.
1130. Velocity of sound in atmospheric air.
the calm celerity of gaseous waves.
1664. Velocity of sound transmitted through solid granite.
the commonest masses a medium of sound.
1700. Average velocity of shot from modern artillery.
cannon projectiles excel in speed.
4706. Velocity of sound in water.
sound pervading a watery medium.
- 17,400. Velocity of sound transmitted through wood.
beams propagate sound with wondrous expedition.
- Miles.
3. Neptune's orbital motion.
yonder he wearily goes.
18. The earth's orbital motion.
the world's course is rapid.

Miles.

30. Mercury's orbital motion.
exultingly *hastens* on his way.
5. Proper motion of the sun and planets.
they wend their way around *Alcyonè*.
280. Maximum velocity of Newton's comet.
the *fearful rapidity* of a comet.
- (Supply 000.)
10. Velocity of electricity in long land-wires, according to G. Davidson.
by *continental wires*.
14. Velocity of electricity transmitted through submerged wires.
when the *cable is submerged*.
185. Velocity of light, as determined by Foucault in 1862.
a *bright ray* of light.

CHAP. IV.—FACTS IN BOTANY.

LITTLE need be said regarding the interesting subject of the three following sections. Meagre as the facts are, the author found it a somewhat difficult task to collect them. Those in section 16 were mainly obtained from that admirable thesaurus of natural phenomena, Johnston's 'Physical Atlas.' Section 17 is largely indebted to the author's 'Manual of Modern Geography,' and to the elaborate Manuals of Botany by Professors Balfour and Henfrey. For the remaining countries of Europe no recent or reliable data could be found, and even for France and Germany the results can be given, as yet, in only round numbers. Section 18 is the result of much examination, but accurate statistics of the existing number of fossil plants are really not attainable.

SECT. 16.—The Flora of the Globe.

(Supply 000.)

1. Species of plants known to Pliny in A.D. 79.
exceeded by *Aberdeenshire*.

6. Species described by Linnæus in 1753.
he widely extended the *number*.
20. Species estimated by Willdenow in 1807.
described by Willdenow.
56. Species contained in the Jardin des Plantes in 1820.
exotics in *large numbers*.
86. Species in the collection of M. Delessert, Paris, in 1847.
a wondrous *rich museum*.
93. Species estimated by Lindley in 1846, forming 9000
genera.
exceeding *ten* to a *genus*.
120. Number of species known in 1869.
the *beautiful flora* of the *world*.
103. Known species of flowering plants.
botanists widely agree on it.
17. Known species of cryptogamia.
the world's *cryptogamic plants*.
200. Humboldt's estimate of the probable number of ex-
isting plants.
the *flora* of the *whole world*.

SECT. 17.—The Flora of some European Countries.

4400. Species of plants in the British Isles.
known species in our *own country*.
1600. Flowering plants in the British Isles.
Balfour's Manual of *Botany* exhibits them.
2800. Cryptogamic plants in the British Isles.
their *four orders* are *well defined*.
60. Number of ferns in the British Isles.
many of them are *beautiful*.
300. Number of mosses in the British Isles.
they *greatly exceed* the *ferns*.
3230. Species common to England and Scotland.
the *graceful flora* of *Great Britain*.
7000. Estimated number of plants in France.
its *plants excel* in *beauty* and *variety*.
3660. Number of flowering species in France.
the *great majority* are *flowering plants*.

7000. Estimated number of plants in Germany.
Prussia comprises the greater part.
2700. Number of flowering plants in Germany.
its flowering plants comparatively few.

SECT. 18.—Geological or Fossil Botany.

527. Total number of fossil plants known in 1836.
these were all the fossil plants.
1792. Number known to Gœppert in 1845.
considerable progress in ten years.
1932. Number known to Henfrey in 1857.
the brightest time in geological research.
645. Fossil plants in British Isles in 1854 (Morris's Catal.)
the number of species in our own land.
122. Number of plants in the SILURIAN and DEVONIAN
 Systems (1867).
club-mosses, ferns, and fucoids.
1700. Fossil plants in the CARBONIFEROUS System of all
 countries (1867).
cryptogamic plants of the coal measures.
1100. Fossil plants in the Coal Measures of the British
 Isles (1867).
chiefly coniferæ, calamites, and club-mosses.
183. Number of plants in the PERMIAN System (1867).
collected in Russia and Germany.
72. Number of plants in the TRIASSIC System (1857).
equisetaceæ and ferns.
150. Number of plants in the LIAS (1857).
cycadæ largely in excess.
180. Number of plants in the OOLITIC System (1857).
coniferous plants and palms.
128. Fossil Oolitic flora of British Isles (1864).
cycads, ferns, and pines.
70. Number of plants in the WEALDEN (1857).
the extinct plants of the weald.
182. Number of plants in the CRETACEOUS System (1857).
its beds are rich in dicotyledons.

977. Number in the TERTIARY System (Eocene, Miocene, and Pleiocene) in 1859.
tertiary petrified plants.
3639. Total species of fossil plants known to science,
the greater number of humble types.

CHAP. V.—FACTS IN ZOOLOGY.

THE facts enumerated in sections 19, 20, and 21 have been obtained from a great variety of sources; though, as under the last chapter, the chief place must be assigned to the 'Physical Atlas.' The single page on Palæontology or Fossil Zoology, constituting section 22, is the result of considerable correspondence with eminent geologists, and of many months' hard reading. The young student of this fascinating science will accordingly find here, ready to his hand, information which in moderate compass he will probably find nowhere else. The statistics contained in the first half of this section may be wholly relied on, as they have been extracted from the latest edition of Murchison's 'Siluria,' the greatest work of the prince of living geologists. For all that related to the great Palæozoic series of rocks, the first place must always be assigned to this elaborate volume; but it formed no part of the author's plan to discuss the Secondary and Tertiary series. For these, no other work occupying a similar position is known to us, and we therefore experienced much greater difficulty in obtaining the statistics constituting the second half of our section. Having searched in vain for facts sufficiently recent in many other quarters, the author took the liberty of applying to his accomplished friend, Professor Ramsay, now at the head of the geological survey of England and Wales. A speedy answer was received, in the following laconic terms: "London, 15th February 1869.—MY DEAR SIR, I received your letter this morning, and would willingly comply with your request. But the information you require would take a man a year to tabulate, even if he knew all the books containing the scattered information it would be necessary to collect; and then it would be very incorrect, because of the number of

fossils that go by different names in different lists. In the mean time I send some papers that may possibly be of a little use ; but even these are very imperfect, and already partly out of date. — Believe me, yours very sincerely, AND. RAMSAY.” The papers referred to are two lectures read before the Royal Geological Society in 1863 and 1864, and characterised by consummate ability. They discuss the deeply interesting question relative to the number of species common to the successive formations of the great Mesozoic or Secondary series of rocks, from the Permian system to the Tertiary. The facts derived from these masterly essays will be readily distinguished from those preceding them, as they refer only to the geology of the *British Isles*, and have, in each instance, the year 1864 appended to them. The *total number* of species, as given in the last line of our table, is obtained by adding together the fossil species of the various geological systems, some of them being the collected results from all countries, and the remainder those from the British Isles. Of course this gives no true idea of the real number of recorded fossil organisms, which must be greatly in excess of the 14,918 given in our table. This will readily appear when we consider that, in 1867, the fossil Silurian fauna of the British Isles alone amounted to 1186 species ; whereas, according to Dr Bigsby’s ‘*Thesaurus Siluricus*,’ a work of immense industry and research, the Silurian rocks of *all* countries exhibited, in the same year, an array of no fewer than 7553 species, or more than six times that number. Again, in 1864, the Triassic system, as developed in the British Isles, had yielded only 61 species ; while on the Continent one single formation (the Muschelkalk) has yielded 222 species, and the St Cassian beds 744 more. We can form, then, a more correct estimate of the probable number of ascertained fossil species, by adding together the results derived from the Palæozoic rocks of all countries (9535 sp.) to about five times the number of Secondary species found in the British Isles alone (2447 sp.), which would give an approximation to the true number of Secondary species hitherto found in all countries : that is to say, we should add 12,235 Secondary species to 9535 Palæozoic species. This gives a result of 21,770 species for these two grand series of rocks. Nothing very de-

finite can be said relative to the number of species derived from the last or Tertiary series of rocks. Upwards of 100 *genera* of mammals alone have been recorded, amounting probably to about 936 species. If we now take the mammalia as forming one-tenth of its entire fauna, we shall have 9360 species as belonging to the Tertiary series; and this number added to our former result gives a grand total of 31,130 species from the entire geological field.

SECT. 19.—Fauna of the Globe.

(Supply 000.)

250. Supposed number of existing species of animals, according to Agassiz.
the *fauna* of the *land* and *water*.
20. Species of vertebrated animals.
they exist in *four classes*.
2. Species of known mammals.
warm-blooded and *four-footed*.
8. Species of known birds.
they wend their way through the *air*.
2. Species of known reptiles.
they exist in *four* (orders).
8. Species of known fishes.
in the world of waters they *roam*.
20. Number of species of known molluscs.
denizens of the *water*.
5. Number of articulated animals (not including insects).
wily *lobsters*.
5. Number of radiated animals.
eyes are *lacking* to them.
200. Estimated number of insects.
dragon-flies, *wasps*, and *worker-bees*.

SECT.—20. Distribution of the Mammalia.

223. Number of European mammals.
flesh-eaters and a *few gnawers*.

632. Number of Asiatic mammals.
its mammals are *highly famed*.
446. Number of African mammals.
the *known species* are *multiplying*.
260. Number of mammals in North America.
our *finest mammals* are *wanting*.
518. Number of mammals in Central and South America.
large carnivora are *rare*.
156. Number of mammals in Oceania.
characterised by *legions* of *marsupials*.

SECT. 21.—Fauna of some European Countries.

- 11,000. Number of existing species in the British Isles.
beasts and birds existing in our *own country*.
611. Number of vertebrated species in British Isles.
number with a *back-bone*.
60. Number of mammals in British Isles, including bats.
numerous (species) are *extinguished*.
274. Number of birds in British Isles.
a few are *peculiar* to our *islands*.
14. Number of reptiles in British Isles.
batrachians and *saurians*.
263. Number of fishes in British seas.
fishes of the *United Kingdom*.
392. Number of molluscs in British waters.
a great variety of (shell) *fish*.
- 10,000. Articulated animals (including insects) in the British Isles.
bees, worms, butterflies, beetles, and crabs.
67. Mammals of Spain and Portugal.
mammals in the *peninsula*.
78. Number of mammals in Germany.
between the *Pregel* and the *Rhine*.
68. Number of mammals in Italy.
mammals in *Italy*.
65. Number of mammals in Turkey and Greece.
mainly in *Albania*.

- SECT. 22.—Fossil Zoology: Number of Species of Fossil Animals in the different Geological Systems.
7553. Fossil species in the SILURIAN SYSTEM of all countries (1867).
the palæontologists' lengthened labours generalised.
1186. Silurian species in British Isles (1867).
consist chiefly of articulata and mollusca.
2735. Silurian species in Bohemia and Bavaria (1867).
fishes appear in the highest layers.
532. Fossil species in the DEVONIAN SYSTEM of all countries (1867).
land-plants and ganoid fishes.
1100. Fossil species in the CARBONIFEROUS SYSTEM of all countries (1867).
the coal-measures abound in bony fishes.
350. Fossil species in the PERMIAN SYSTEM of all countries (1867).
gigantic saurian reptiles.
976. Fossil species in the TRIASSIC SYSTEM of all countries (1864).
Telerpeton-Elginense and pouched mammals.
468. Fossil species in the LIAS of the British Isles (1864).
known by its ammonites and reptiles.
1464. Fossil species in the OOLITE of the B. Isles (1864).
its commonest species of mammals is the kangaroo.
237. Fossil species in the WEALDEN of the B. Isles (1864).
flying-reptiles, iguanodons, and placental (mammals).
1362. Fossil species in the CRETACEOUS SYSTEM of the British Isles (1864).
birds and a genus of monkeys are found in it.
936. Species (or 104 genera) of mammals in the TERTIARY SERIES (1868).
the true age of mammals.
- 14,918. Total fossil species in the whole geological series.
collected species from the Tertiary to the Cambrian rocks.

CHAP. VI.—FACTS IN ETHNOGRAPHY.

THE facts enumerated in the four Sections of this chapter require no introduction, as they are derived almost exclusively from the author's former works—viz., the 'Manual of Modern Geography, Mathematical, Physical, and Political,' and 'Elements of Modern Geography,' 42d thousand; W. Blackwood & Sons, Edinburgh and London; 1878.

SECT. 23.—Races of Mankind.

(Supply 000,000.)

1400. Population of the globe.
crown Him king of the whole world.
600. Caucasian race.
the masters of the whole world.
590. Mongolian race.
an olive tint characterises them.
120. Negro or Ethiopian race.
the ban of their forefather wastes them (Gen. ix. 25).
68. Malays, Papuans, and Maories.
the mixed races.
16. American Indians.
the aborigines of America.

SECT. 24.—Religions of Mankind.

(Supply 000,000.)

790. Probable number of heathens (Brahmins, Buddhists,
 &c.)
the powers of evil supreme.
250. Number of Brahmins.
a foul and loathsome worship.
380. Number of Buddhists.
the horrid rites of Buddha.

150. Number of Mohammedans.
they *blaspheme* our *Lord's name*.
7. Number of Jews.
wandering exiles from *Zion*.
400. Christians of every name.
Jesus is worshipped by them *all*.
175. Number of Roman Catholics.
they *bow* to *Peter* as *Lord*.
112. Number of Protestants.
Christianity's choicest form.
90. Greek Church.
Russia its *avenger*.

SECT. 25.—Races of Men in Europe.

(Supply 000,000.)

78. Celtic blood, pure and mixed.
the westernmost *people* in *Europe*.
100. Teutonic blood, pure and mixed.
civilisers of the *whole world*.
70. Slavonic blood, pure and mixed.
Poles and *Wends*.
28. Mongolians and Tartars.
Finns and *Turks*.
2. Jews.
the exiles of the *dispersion*.
1. Gipsies, &c.
wandering *Bohemians*.
288. Total population of Europe.
the *five European races*.

SECT. 26.—Religions in Europe.

(Supply 000,000.)

135. Roman Catholics.
the *Catholics* *greatly predominate*.
67. Greek Church.
as *numerous* as the *Protestants*.

65. Protestants.
most of them Lutherans.
8. Mohammedans and Heathens.
exist in Roumelia.
2. Jews.
the exiles of the dispersion.
1. Gipsies, &c.
wandering Bohemians.
-

CHAP. VII.—FACTS IN GEOGRAPHY.

THIS chapter—by far the longest in the scientific division of “Facts and Dates”—embraces no fewer than 24 Sections and upwards of 300 important facts connected with the physical geography of all the continents and countries of the world. These cannot fail to prove highly serviceable to the young student of this important and many-sided science: and, by the new method for aiding the memory here introduced, he can easily remember the whole. In every instance he will find the closest harmony between these sections and the corresponding pages of the ‘Elements.’ The last Section alone—that on the Progress of Geographical Discovery—has been drawn up from other sources, and chiefly from the elaborate history of ‘Maritime Discovery,’ by Rev. C. G. Nicolay, and contained in the ‘Manual of Geographical Science, Mathematical, Physical, Historical, and Descriptive’ (J. W. Parker, London).

SECT. 27.—Areas of the different Continents.

(Supply 000.)

Sq. miles.

- 51,500. Land-surface of the globe.
all the continents and islands of the wide world.
3857. Area of Europe.
its greatest river is level throughout.

Sq. miles.

- 16,626. Asia.
bigger than America, North added to South.
- 12,000. Africa.
the continent of Africa will yet be explored.
8600. North America.
the Rocky Mountains its western wall.
7028. South America.
the "queen of waters" drains the north.
4500. Oceania, including Australia.
Sumatra lies at its western extremity.

SECT. 28.—Population of the Continents.*(Supply 000,000.)*

1400. Population of the globe.
crown Him king of the whole world !
288. Europe.
the five European races.
750. Asia.
population of the largest continent.
200. Africa.
Africa will yet be Christianised.
58. North America.
a liberty-loving race.
25. South America.
a wondrous diversity of language.
30. Oceania.
exceeded by Great Britain.

SECT. 29.—Areas of European Countries.*(Supply 000.)*

Sq. miles.

122. The British Isles.
British farming is famous.
58. England.
the land of roses.
31. Scotland.
her wilds are heath clad.

Sq. miles.

33. Ireland.
a green gem.
8600. The British Empire.
the richest empire in the whole world.
38. Portugal.
its agriculture is of the rudest.
196. Spain.
consists of a table-land and mountains.
205. France.
France is exceedingly level.
11. Belgium.
celebrated for its cultivation.
14. The Netherlands.
beneath the sea-level.
14. Denmark (*minus* Schleswig-Holstein).
the capital is on an island.
214. The German Empire.
formed of a cluster of States.
136. Prussia (subsequent to the war of 1866).
Bismark greatly increased it.
264. Austria (including Bosnia and Herzegovina).
the Dual Empire's size.
15. Switzerland.
wearily climb the Alps.
114. Italy.
celebrated for its beautiful skies.
20. Greece.
its winters are fine and warm.
100. European Turkey (*minus* the Principalities).
the Balkhans its extreme boundary.
2087. Russia.
a dreary expanse of arid plains.
171. Sweden.
beautiful picturesque cataracts.
123. Norway.
celebrated falls and glaciers.

SECT. 30.—Population of European Countries.

(Supply 000,000.)

32. Population of the British Isles in 1871.
expects a *glorious future*.
23. England.
in *density* the *greatest*.
3. Scotland.
warlike *highlanders*.
5. Ireland.
wit and *levity*.
284. The British Empire.
the *diversity* of race is *astounding*.
4. Portugal.
they excel the *Spaniards*.
17. Spain.
chivalrous and *proud*.
36. France.
the *gayest nation*.
5. Belgium.
wise and excellent *laus*.
4. Netherlands.
expert workers in *silk*.
2. Denmark (*minus* Schleswig-Holstein).
war wrested the *Duchies* from it.
43. The German Empire in 1875.
in *science* the *highest*.
24. Prussia.
they *defeated* the *Austrians*.
39. Austria.
wrested *Herzegovina* from *Turkey*.
2. Switzerland.
the west is wholly *French*.
28. Italy.
diverse races.
1. Greece.
exceedingly *crafty*.

8. European Turkey (*minus* the Principalities).
the war has *ruined* it.
72. Russia.
its *people* are *few*.
4. Sweden.
they excel in *science*.
2. Norway.
exceedingly *fair-haired*.

SECT. 31.—Heights of European Mountains.

- Feet.
4406. Ben Nevis, the loftiest mountain in the B. Isles.
a snowy summit in the *wilds* of *Inverness*.
- 11,168. Maladetta, the loftiest summit of the Pyrenees.
the cloud capped brow of *Maladetta* *rises*.
- 11,663. Sierra Nevada, the loftiest chain in the Hesperian
Peninsula.
bold Cerro Mulhacen's noble height.
9068. Highest summit in the Sardo-Corsican system.
the view is *extensive* from *Monte Rotondo*.
- 15,781. Mt. Blanc, highest summit of the Alpine system.
(Mont) *Blanc* *lifts up* his *royal crest*.
- 10,874. Mt. Etna, highest summit of the Apennines.
its burning explosions *ravage* the *plains* of *Syracuse*.
9528. Mt. Butschetje, highest summit of the Carpathians.
a vast elevation *dividing* *realms*.
9718. Tchar-Dagh, loftiest summit of the Balkan Range.
Tchar-Dagh, *prince* of the *Balkan range*.
- 18,493. Mt. Elburz, loftiest summit of the Caucasus.
Caucasus *reigns supreme*, *a towering height*.
5397. Mt. Konjakofski, loftiest summit of the Urals.
low heights with *veins* of *platina*.
8670. Mt. Skageslöestinden, h. s. of Scandinavian system.
remarkable for *numerous plateaux* and *glaciers*.

SECT. 32.—Principal River-Basins of Europe in square miles.

(Supply 000.)

Sq. Miles.

49. Petchora basin.*
it wanders *slowly* through the *tundras*.
106. Dwina.
its *course* is towards the *White Sea*.
67. Neva.
waters *Novgorod* and *Petersburg*.
57. Vistula.
its waters *lave Poland*.
40. Oder.
waters *Silesia* and *Brandenburg*.
41. Elbe.
waters *Saxony* and *Bohemia*.
65. Rhine.
navigable to *Switzerland*.
22. Seine.
waters the west of *fair France*.
34. Loire.
winds westward to the *Gulf of Gascogne*.
24. Garonne.
the *Dordogne* joins it.
29. Douro.
flows to the *Atlantic*.
21. Tagus.
flows from *Castile*.
24. Ebro.
flows eastward.
28. Rhone.
its *fall* is *rapid*.
29. Po.
flows past *Turin*.
234. Danube.
flows through *Germany* and *Austria*.

* The areas of the river-basins throughout are taken from Johnston's 'Physical Atlas.'

Sq. miles.

170. Dnieper and Bug.
they water the *best provinces* on the *Euxine*.
169. Don.
a *canal unites* it with the *Volga*.
398. Volga.
waters the *greatest territory* in *Europe*.
84. Ural.
between *Russia* and *Siberia*.

SECT. 33.—Areas of Asiatic Countries.

(Supply 000.)

Sq. miles.

669. Asiatic Turkey.
mankind's native territory.
1200. Arabia.
the *coasts are fertile* where *water exists*.
562. Persia.
lofty and nearly desert.
259. Afghanistan.
Afghanistan lines our territory.
110. Beloochistan.
the *country is a barren waste*.
1476. Hindustan.
our *beloved sovereign is Empress of India*.
880. Further India.
the *river Irrawaddy waters* it.
4118. Chinese Empire.
its *size considerably curtailed* by *Russia*.
660. Turkestan (Eastern and Western).
its *independence menaced* by *China*.
5585. Siberia.
a *low level* from the *Urals* to the *Lena*.
158. Japan.
curiously like our *archipelago*.

SECT. 34.—Population of Asiatic Countries.

(Supply 000,000.)

16. Asiatic Turkey.
the *centre of Mohammedanism*.

8. Arabia.
wandering *Arabs*.
5. Persia.
walled in by the *Elburz*.
6. Afghanistan and Beloochistan.
warlike *Mohammedans*.
241. Hindostan.
devoted to the service of Brahma.
28. Further India.
the *idolatrous religion* (of Buddha).
415. Chinese Empire.
the *stereotyped civilisation* of the *Mongols*.
6. Turkestan (Eastern and Western).
exclusively *Mohammedan*.
6. Siberia.
Wogulians, exiles, and Mongolians.
35. Japan.
an *Ugro-Tartarian language*.

SECT. 35.—Heights of Asiatic Mountain Chains.

(Supply 000.)

Feet.

19. Highest summit of the Bolor Tagh.
west of *Chinese Turkestan*.
20. Hindoo Koosh.
the *Afghans' wall*.
16. Paropamisan range.
Bokhara is north of it.
18. Elburz range.
between the *Caspian* and *Iran*.
17. Mount Ararat, in Armenia.
near a *branch* of the *Euphrates*.
13. Mount Arjish, in Taurus range.
between the *Black* and the *Great (Sea)*.
12. Lebanon range.
between *Beirût* and *Damascus*.

Feet.

29. Mount Everest, in the Himalaya range.
the white *dome* of *Everest*.
28. Dapsang peak, in the Karakorum range.
yonder *Dapsang rises*.
22. Kuen-Lun range.
west of a *dreary desert*.
20. Thian-Shan range.
between the *Daria* and *Yarkand*

SECT. 36.—Principal River-Basins of Asia.

(Supply 000.)

Sq. miles.

197. Basin of Euphrates and Tigris.
the extensive *basin* of the *Tigris* and *Euphrates*.
312. Indus.
the *Himalaya* and *Cashmere* feed it.
432. Ganges.
the *Jumna* its *greatest* *affluent*.
329. Brahamapootra.
its *greatest* *affluents* are from *Tibet*.
331. Irrawaddy and Salwen.
water the *greater* *half* of *Burmah*.
216. Menam and Cambodia.
flow through *Burmah* and *Anam*.
100. Choo-Kiang or Canton river.
the *Choo-kiang* *waters* *Canton*.
784. Yang-tse-kiang.
the *principal* *river* of (eastern) *Asia*.
640. Hoang-ho.
next in *size* to the *Yang-tse*.
583. Amour.
the *largest* *river* after the *Hoang-ho*.
594. Lena.
the *Lena* *traverses* (eastern) *Siberia*.
784. Yenisei.
the *principal* *river* of (central) *Siberia*.
1350. Oby.
its *basin* is the *greatest* in the *Old World*.

SECT. 37.—Areas of the Countries of Africa.

(Supply 000.)

Sq. miles.

960. The Egyptian Empire.
the *valley* of the *Nile* to its source.
158. Abyssinia.
confined to the *elevated* region.
404. Tripoli and Tunis.
subject to the *yoke* of the *Sultan*.
258. Algeria.
France endeavours to rule it.
269. Marocco.
dates from *Mount Atlas*.
2500. The Sahara.
this *desert* is the *largest* in the *whole* world.
250. Senegambia.
the *diseases* of the *lowlands* are *deadly*.
1243. Soudan or Nigritia.
curtailed in *dimensions* by the *Khedive* of *Egypt*.
610. Upper and Lower Guinea.
the *Niger* and *Congo* water it.
348. Cape Colony, Natal, and Transvaal.
our *great* *South-African* realm.
1830. Eastern Africa.
called the *Region* of *Great Lakes*.
3000. Regions unexplored in the interior.
great *explorations* yet to be *made*.
200. Madagascar.
fertile and *well* *watered*.

SECT. 38.—Population of the Countries of Africa.

(Supply 000,000.)

11. The Egyptian Empire.
Cairo is the *capital*.
3. Abyssinia.
at war with *Egypt*.

3. Tripoli and Tunis.
west of *Egypt*.
3. Algeria.
excessive *heat*.
6. Marocco.
wild *Mohammedans*.
11. Senegambia.
Bathurst is the *capital*.
40. Soudan or Nigritia.
the *Joliba waters* it.
19. Upper and Lower Guinea.
the *Congo* traverses it.
1. Cape Colony, Natal, and Transvaal.
owned by *Britain*.
21. Eastern Africa.
warlike and *fierce barbarians*.
31. Regions unexplored in the interior.
extend westward to the *gorilla country*.
4. Madagascar.
exports *silk*.

SECT. 39.—Areas of the Countries of North America.

(Supply 000.)

Sq. miles.

585. Alaska, formerly Russian America.
a *lofty region* of *volcanoes*.
380. Greenland, or Danish America.
glaciers and *rocks* cover it.
3598. British North America.
gigantic lakes and *vast rivers*.
404. Dominion of Canada (Canada, New Brunswick,
Nova Scotia, Newfoundland, and Pr. Ed.
Island).
joined in the year *sixty-seven*.
2948. Manitoba and N.W. Territory.
a *dreary territory* and *small province*.
213. British Columbia.
finest country for *gold*.

Sq. miles.

3026. United States (*minus* Alaska)
a great expanse drained by the Mississippi.
773. Mexico.
the peak of Popocatepetl is the highest.
188. Central America.
the central region is raised.
97. West Indies.
extend beyond the Torrid Zone.

SECT. 40.—Population of the Countries of North America.

(Supply 000.)

3880. British North America.
Great-Britain's realm in the remote West.
3838. Dominion of Canada (Eastern and Central Provinces).
a great rush from the home country.
42. British Columbia.
watered by the Simpson and the Frazer.
- 38,925. United States.
a great republic rapidly increasing in power.
9278. Mexico.
a territory devastated by perpetual revolutions.
2605. Central America.
five independent countries at war.
4202. West Indies.
Spanish, French, and British dependencies.

SECT. 41.—Height of North American Mountains.

(Supply 000.)

Feet.

6. White Mountain, highest summit of Alleghanies.
White Mountain.
15. Mount St Elias, highest summit of North-Western America, now Alaska.
the white crown of Alaska.

Feet.

16. Mount St Helens, highest summit of the United States.
in the *Cascade Mountains*.
16. Mount Brown, culminating point of British America.
a *brown mountain*.
17. Popocatepetl, highest summit of Mexico.
the *burning Popocatepetl*.
14. Mount Agua, highest summit of Central America.
Central-America's summit.
7. El Cobre, in Cuba, h. s. of the West Indies.
a West Indian *peak*.

SECT. 42.--Principal River-Basins of North America.

(Supply 000.)

Sq. miles.

297. Basin of the St Lawrence.
falls into the Atlantic at Quebec.
982. Mississippi.
a vast region drained by it.
180. Rio Grande del Norte.
basin of the Rio Grande.
169. Colorado.
comes from New-Mexico and Utah.
194. Columbia.
its chief tributaries are gold-bearing.
445. Mackenzie.
its source is the Slave Lake.
360. Nelson and Saskatchewan.
grows maize and wheat.

SECT. 43.—Areas of South American States.

(Supply 000.)

Sq. miles.

514. United States of Colombia.
the west is lofty and clothed with forests.
425. Venezuela.
the surface a flat llano.

Sq. miles.

218. Ecuador.
dreadful Cotopaxi in eruption.
198. Guiana.
consists of three territories.
3138. Brazil.
the gigantic basin of the greatest river.
508. Peru.
with Lima in the west, on the Rimac.
374. Bolivia.
the Western World's highest peak is Sorata.
516. Chilè and Patagonia.
the lofty Aconcagua illuminates it.
897. Argentine Confederation.
a region traversed by the Paraná.
146. Paraguay and Uruguay.
the capitals are Asuncion and Monte-Video.

SECT. 44.—Population of South American States.*(Supply 000,000.)*

6. United States of Colombia, Venezuela, and Ecuador.
watered by the Magdalena.
12. Brazil.
Cabral discovered it.
6. Peru, Bolivia, and Chilè.
extremely wealthy in minerals.
3. Argentine Confederation, Paraguay, and Uruguay.
they export hides.
(Supply 000.)
280. Guiana.
fertile European colonies.

SECT. 45.—Height of South American Mountains.

Feet.

- 19,137. Antisana, in Ecuador.
among the cone-shaped volcanoes of Ecuador is the gigantic Antisana.

- Feet.
18,875. Cotopaxi.
Cotopaxi, renowned among the roaring volcanoes of Ecuador.
- 21,424. Chimborazo.
the far-famed Chimborazo shows his dome-like shape.
- 21,140. Sorata and Illimani, in Bolivia.
among the formidable cones of Bolivia are Sorata and Illimani.
- 22,296. Aconcagua, in Chilè, the h. s. of the Andes.*
the dense fumes of a frightful volcano in the Andes.
- 22,016. Tupungato, east of Santiago de Chilè.
frequent destructive explosions in the Chilian Andes.
8030. Yanteles, highest summit of the Patagonian Andes.
the roaring Yanteles is glacier crowned.
6913. Sarmiento, in Tierra-del-Fuego.
the mountains of Tierra-del-Fuego are crowned with glaciers.
- 15,800. Limit of perennial snow at the equator.
the congelation limit reaches high at the equator.

SECT. 46.—Areas of South American River-Basins.

(Supply 000.)

- Sq. miles.
72. Magdalena Basin.
platinum is found in it.
252. Orinoco.
flows through the llanos and delta.
1512. Amazon.
the basin of this leviathan contains the selvas.
284. Tocantins.
flows through the region of the selvas.
188. San Francisco.
its basin is rich in ores.
887. Paranâ.
the rainless region of the pampas.

* Some authorities give Sorata as the highest summit.

SECT. 47.—Areas of Countries in Oceania.

(Supply 000.)

Sq. miles.

3428. Australasia.
gigantic islands and dreary regions.
3000. Australia.
a great wilderness colonised by the British.
323. New South Wales.
a great field for gold.
87. Victoria.
richer than Ophir.
383. South Australia.
great in iron and copper.
978. Western Australia.
a vast penal reformatory.
678. Queensland.
the mineral products are rich.
26. Tasmania.
fertile and mountainous.
106. New Zealand.
Britain owns the Antipodes.
240. Papua or New Guinea.
Dutch settlements in the west.
843. Malaysia.
rich in spices and gums.
11. Polynesia.
yields cocoa-nuts and bananas.

SECT. 48.—Population of the Countries of Oceania.

(Supply 000.)

2500. Australasia.
the degenerate Alfouries are waning away.
1848. Australia.
the Christian religion is solely recognised.
606. New South Wales.
its mineral wealth is enormous.

823. Victoria.
remarkable for its deposits of gold.
210. South Australia.
the exports of Adelaide are copper and wool.
27. Western Australia.
a dreary penitentiary.
182. Queensland.
the colony is rapidly developing.
100. Tasmania.
its chief export is wool.
447. New Zealand.
Scotch settlers predominate.
1100. Papua or New Guinea.
camphor, cocoa-nuts, and yams are exported.
- 27,750. Malaysia.
the Dutch are the principal possessors of the larger islands.
220. Micronesia.
fast fading away.
300. Polynesia.
the Gospel carried to them by Williams.

SECT. 49.—Height of Principal Mountains in Oceania.

Feet.

5458. Bellenden Ker mountains in Queensland.
the loftiest summit in the Ker range.
5700. Mount Lindsay in New South Wales.
Lindsay Peak, between Brisbane and Clarence.
6000. Mount Seaview, Liverpool range (lat. $31\frac{1}{2}^{\circ}$).
a mountain west of Port Macquarie.
3300. Mount York in the Blue Mountains (lat. 34°).
greatest height of the Blue Mountains.
7300. Mount Kosciusko, Australian Alps, N.S. Wales.
the peak of greatest height in Australia.
3012. Mount Bryan, Flinders range, South Australia.
the highest in the westerly chain of Flinders.

Feet.

6500. Mounts Bogong and Hotham in North Victoria.
the mean level is considerably lower.
5069. Cradle Mountain, Tasmania.
almost exceeds the mountains of Victoria.
- 13,200. Mt. Cook, the culminating point of New Zealand.
Cook is the highest by far in New Zealand.

SECT. 50.—Progress of Geographical Discovery.

A. D.

1271. Marco Polo, a Venetian, begins his travels.
a bold adventurer proceeds to "Cathay."
1286. Oderic of Portenau visits India and China.
courageous Oderic arrives in India.
1295. Marco Polo returns to Venice, and writes his travels.
China described by a traveller in the land.
1302. Gioja of Amalfi introduces the mariner's compass.
the compass gives a wider field.
1324. John Batuta, a Moor of Tangiers, travels through Asia.
Batuta goes to Afghanistan and Sumatra.
1330. The Canary Islands discovered by a French vessel.
the Canary group is granted to Claramonte.

Cavilham seeks the renown of Portugal.
1492. America discovered by Columbus, a Genoese, in the service of Ferdinand of Spain.
Columbus sails athwart the deep.
1494. Columbus, on his second voyage, discovers Jamaica and Porto Rico.
Columbus sees vast islands.
- „ John Cabot, sent out by Henry VII. of England, discovers Newfoundland.
Cabot seizes a vast island.
1497. The Cabots discover Labrador, Nova Scotia, and Virginia, being the first parts of the American continent seen by Europeans.
the Cabots survey a vast peninsula.
- „ Vasco de Gama discovers the Cape of Good Hope.
the Cape is seen by Vasco, a Portuguese.
1498. The Orinoco discovered by Columbus on his third voyage.
Columbus sees a vast river.
1499. Canada discovered by the Cabots.
Cabot sails to a vast territory.
1500. Pinzon, a Spaniard, discovers the river Amazon.
beholds the leviathan of the world's waters!
1501. Alvarez de Cabral, a Portuguese, discovers Brazil.
Cabral lands on wide Brazil.
1502. Columbus, on his fourth voyage, discovers Cen. Amer.
Columbus learns the way to Darien.
1503. Goa Factory, in India, founded by the Portuguese.
began to lay the walls of Goa.
1507. Almeida, a Portuguese, discovers Madagascar and Ceylon, and subdues Western India.
the bold Almeida wins them to Portugal.
1511. Velasquez, a Spaniard, sails from Hispaniola, and conquers Cuba.
the Caribs lament the conquest of Cuba.

1512. Ponce de Leon, a Spaniard, discovers Florida and the Gulf Stream.
observes a land with beautiful flowers.
1513. Balbao crosses the Isthmus of Darien, and discovers the Pacific.
Balbao lights on an ocean great.
1514. Juan Diaz de Solis enters the La Plata in South America.
Buenos lies on the bank of the estuary.
1517. Yucatan discovered by Hernandez Cordoba.
Cordoba lands on the central peninsula.
1519. Fernandez Cortez, a Spaniard, proceeds from Cuba to conquer Mexico.
Cortez lands on a civilised territory.
1520. Magellan discovers the Strait bearing his name.
he cautiously led them by a dangerous way.
1521. Magellan discovers the Philippine Islands.
the courageous leader dies in battle.
- „ Magellan's ships visit Borneo, the Celebes, and Moluccas, and return to Spain after circumnavigating the globe.
they curiously lose a day in their course.
1526. Pizarro invades the empire of Peru, now under Huana Capac, the 12th emperor.
Capac, the last of the dynasty of the Incas.
1534. Lima, in Peru, founded by Pizarro.
the building of Lima by a gold-hunting Spaniard.
1535. Jacques Cartier, a Frenchman, explores Canada.
the Canadian lakes at the head of the (St) Lawrence.
1537. Macao granted as a settlement to the Portuguese.
China allows a haven to the Portuguese.
1541. The Spaniards form their first settlement in Chilè.
they begin to lay Santiago de Chilè.
1542. The Portuguese discover Japan accidentally.
the civilised land of Japan is discovered.

1584. Sir W. Raleigh takes possession of Virginia for England.
a colony leaves for our earliest settlement.
1600. The English East India Company established.
a company of merchants yearning for wealth.
1604. Barbadoes, England's first colony, established.
chiefly employed in exporting sugar.
1606. Virginia begins to be colonised by the English.
colonists from England wander to America.
- „ The Australian continent discovered by the Dutch.
a beautiful new world at the Antipodes.
1608. Quebec founded by French colonists.
the chief emporium of a wealthy region.
1610. Hudson Bay discovered by Captain Hudson, in search of a north-west passage to the Pacific.
the captain enters a cheerless expanse.
1619. Batavia built and settled by the Dutch.
Batavia, the emporium of commerce and trade.
1642. Tasman, a Dutchman, discovers Van Diemen's Land.
a bold navigator sent by the Dutch.
1672. The Mississippi discovered by Marquette, a Frenchman.
the basin of the Mississippi of peerless dimensions.
1728. Behring Strait discovered, and Asia proven to be disjoined from the New World.
a chasm appears dividing the Russias.
1744. Admiral Anson completes his voyage round the world.
Britain promotes her successful sailor.
1767. Wallis and Carterel's discoveries in the South Seas.
Carterel proceeds on his mission to the Pacific.
1768. Capt. Cook explores New Holland and New Zealand.
Cook proceeds on a mission of research.
1787. New South Wales established as an English colony.
our convicts proceed to a remote penitentiary.
1795. Mungo Park's first voyage to Africa.
the celebrated Park travels in Ludamar.

DIVISION II.—HISTORICAL FACTS.

PART FIRST—SACRED HISTORY.

CHAP. I.—OLD TESTAMENT HISTORY.

(B.C. 5478-4.)

IN regard to the chronology of the Antediluvian period, and especially the point of time at which human history commences, the Book of Genesis is our only guide. Invaluable as this most precious record is, there are many points of the deepest interest on which it throws but a feeble light. The *absolute* age of our planet, and the precise point of time in that age when man first appeared on its surface, are left wholly undetermined; but the mighty changes through which it had passed before man was introduced, and the order of time (in relation to other species) in which that introduction took place, are indicated with sufficient clearness. Regarding the antiquity of the globe, and the moment of time when it was first peopled by living creatures, the inspired volume is silent; nor is there the least likelihood that human science shall ever satisfactorily determine what the Creator has been pleased to conceal. It will be readily perceived, however, that what is clearly indicated is of vastly greater importance to our race than what has been purposely left in the dark. In the very first sentence of the Book of Genesis we are informed that matter is not eternal; that our world had a beginning; and that it required divine energy to bring it into being. Further on, but still on the same page, we are informed that the planet had been in existence for an undefined period before any living thing was created on its surface; that this

creation was gradual and progressive, the humbler forms of life taking the precedence of the more highly organised ; and that the last creature that appeared on the scene was man, formed in God's own image, and so bearing His likeness that he could with propriety be called " a son of God ;" for he not only resembled his Creator in his moral and intellectual nature, but his body also—so fearfully and wonderfully made—bore the form and lineaments of *that body* which, in the fulness of time, the divine Son was to assume—that body in which He was to give perfect obedience to God's violated law, and perfect satisfaction for the sins of His people.

These infinitely important items of revealed truth, in common with many others, are in perfect harmony with the teachings of science ; and though the latter cannot draw aside the veil which obstructs our view in some directions, she has opened up a very fascinating vista in others. For example, she has wellnigh demonstrated—what the inspired record had long ago clearly asserted (compare Heb. xi. 3, *in the original*)—that between each of the " days " of creation,—that is, *between each successive exercise of supernatural power*,—an " æon " or mighty cycle of years intervened, during which the results of the new order of things initiated by the divine Word at its commencement were left to operate, by the continuous and undisturbed routine of natural law, until the earth had thereby become adapted for a new act of supernatural power—as, for example, the introduction of a higher type of organic life. She has shown that the order of sequence in these six periods is identical with the order so graphically detailed in the Book of Genesis. She has shown that our planet had existed for untold ages before it became inhabited by living creatures ; that the forms of life that first peopled it were zoophytes and fucoids—the very lowest types of animal and vegetable existence ; that many ages then elapsed before molluscs and crustaceans peopled its waters ; that whole millenniums of the world's history had passed before fishes—the lowest type of vertebrated animals, and the contemporaries of the first land-plants—were ushered into being ; that reptiles—the next higher type of vertebral life—made their first appearance when the continents and islands of the globe waved with the

most abundant and gigantic flora that ever adorned its surface ; that all these vast changes took place during the great PALÆOZOIC age of its history ; and that then some mighty, but hitherto unexplained, catastrophe occurred, which suddenly extinguished all the forms of organic life that had hitherto peopled its oceans and continents. Science further demonstrates that during the Triassic era—the first stage of the world's SECONDARY age—an entirely new series of plants and animals, including birds and marsupial mammals, appeared on the scene ; that placental or true mammals come first into view near the end of the Wealden period—the period of the iguanodon and pterodactyl ; that true or exogenous trees, together with quadrumanous mammals, had no existence before the Cretaceous era ; that immediately after the completion of that era another tremendous cataclysm took place, which once more extinguished every species of organic life ; that the third grand age of the planet's palæontological history—viz., the TERTIARY age—was ushered in with myriads of new and higher forms of existence—forms more closely resembling the fauna and flora of the present day than any that had preceded them ; that notwithstanding the great cosmical revolutions that occurred during the lapse of the Tertiary era, not a few of the species that were then created continue to survive till the present day, forming a living bridge between our own times and the immeasurable ages of the past. One item more must finish this enumeration (and it is the clearest and best established of all the teachings of geology)—viz., that no trace of the existence of man is found anywhere till we advance far into the present or POST-TERTIARY age of the world's history, and till this beautiful earth had received the last touches of its Creator's hand, every animal and plant now inhabiting it having been already called into existence.

Such, then, are some of the beautiful harmonies that everywhere abound between Science and Revelation. The globe and the Bible are evidently two volumes by the same Author ; and though in some things it is still difficult to reconcile their teachings, they nowhere teach contrary lessons. The author of these remarks is a theologian by profession, and at the same

time an ardent student of nature ; and he takes this opportunity of affirming, in the most solemn manner of which he is capable, that at this moment he is not aware of a single statement in Scripture that is contradicted by any ascertained fact in either science or history. Let us take a single instance in point. The Old Testament declares that God "created man in His own image" (Gen. i. 27), and the New Testament calls Adam "a son of God" (Luke iii. 38), and adds that all men are God's "offspring" (Acts xvii. 29). Now, though the findings of geology are not equally distinct, they all point, as we have seen, in exactly the same direction. Geology nowhere sanctions the doctrine of the transmutation of species, or that the higher types of organic life have, in the course of ages, been "developed" out of the lower. No trace of such development can be found in the innumerable pages of her stony records. Her entire testimony is opposed to the impious theories of the modern infidel, who tries to show that man has been developed from the ape or the baboon, or that he is the lineal descendant of the gorilla—the most hideous and disgusting of all brutes. It is only when men are opposed in *heart* to God, and when, in consequence, their moral eye hopelessly squints, that they can so read the record of either Genesis or Geology.

The entire space of time intervening between the creation of man and the birth of Christ is usually divided by chronologists into six periods or ages. The *first*, extending from Adam to the general Deluge, is called the Antediluvian age ; the *second*, from the Deluge to the call of Abraham, the Postdiluvian age ; the *third*, from the call of Abraham to the Exodus, the Patriarchal age ; the *fourth*, from the Exodus to the foundation of Solomon's Temple, the Critarchal (*Judge-ruling*) age ; the *fifth*, from the founding of the Temple to the Jewish Captivity, the Monarchal age ; and the *sixth*, from the Captivity to the birth of Christ, the Hierarchal age. Each of these great periods has its own chronological difficulties, but those connected with the first three greatly exceed in magnitude those attaching to the others. The date when man first appeared on the earth, and the precise time when, owing to its multiplied iniquities, almost the entire race was swept away, are out of sight the hardest to

determine in the entire field of chronology. With the exception of the Book of Genesis, we possess no authentic records of these events ; and it so happens that even this invaluable document, full as it is of notes of time, conveys much less satisfactory information regarding the two grand events referred to than we could wish. That book comes down to us in three distinct forms—the original Hebrew, the Samaritan, and the Greek or Septuagint translation ; and these three, while closely agreeing in almost all other particulars, are amazingly divergent in everything connected with dates. According to the chronology of the Septuagint, Adam was created 5478 years before the Incarnation, and the Deluge occurred 2262 years thereafter. According to our present Hebrew text, the former event took place B.C. 4004, and the latter, 1656 years afterwards. In other words, one edition of the Scriptures assigns to the human race an antiquity of more than 1400 years greater than the other, while it makes the period from Adam to the Flood 600 years longer. These discrepancies are enormous, and make it perfectly obvious that either the one or the other copy, or both, have been seriously tampered with. Modern scholars are now generally of opinion that the serious charge of falsifying the sacred record lies at the door of those intrusted with the custody of the *Hebrew* Scriptures ; and that, in order to refute their Christian opponents as to the predicted time of the appearance of the Messiah, they committed the fearful crime of changing the inspired records. It was an ancient tradition among the Jews that the world was destined to last for a period of *seven millenniums*,—the first six corresponding to the six days of creation, and the seventh to the Sabbath or day of rest—and that previous to the last millennium the Messiah should appear in great power and glory. Traces of this tradition may be found in the vaticinations of the Sibylline oracles, and in the writings of the Greek theologians and cosmogonists ; and there can be little doubt that it found its way to the native country of the Magi, and prepared them, at the proper time, for the appearance of the star in the east. We have no doubt that the tradition had its firm foundation in the Hebrew and Greek Scriptures, which, *at the time of our Lord's advent*, were in exact harmony. The date of His birth perfectly

agreed with the tradition, and thus a powerful argument was supplied to the Christians that "the Desire of all nations" had actually come, and that it was *He* whom the Jewish rulers and priests had maliciously crucified. Seeing they were capable of perpetrating that unparalleled crime, they would hardly shrink from any other. Having already murdered the Son of God, they now resolved on mutilating His inspired word, in order to make the world believe that Jesus of Nazareth was not the promised Saviour, but an impostor who had appeared fourteen hundred years too soon. "It is acknowledged by Biblical critics," says Professor Wallace, in his admirable and exhaustive treatise, 'The True Age of the World' (Smith, Elder, & Co., London, 1844), "that all the copies of the present Hebrew text were taken from manuscripts of dates later than the ninth century, and that the striking uniformity which all the printed editions exhibit is to be attributed to the fact that they were all copied from the same *codex*. Dr Hales also gives citations from Eusebius, from the Jewish Targums, and from other works, in which decided reference is made to the *larger* numbers as they anciently existed in the Hebrew. Mr Cuninghame, also, in his 'Dissertation on the Apocalypse,' proves, on the authority of ancient Jewish tradition, that Adam was 230 years old when he begat Seth (and not 130, as in our Hebrew text). Consequently, by the argument *ex uno disce omnes*, we conclude that the whole of the *antepaidogonian* ages are correctly given in the Septuagint, and that the true extent of the Antediluvian age is 2262 years." The changes introduced are, for the most part, curiously *systematic*, as will be at once perceived by comparing the Hebrew with the Septuagint in regard to the ages of the Antediluvians at the birth of each eldest son :—

HEBREW, . . .	130	105	90	70	65	162	65	187	182
SEPTUAGINT, . .	230	205	190	170	165	162	165	187	188

It will be seen that in six cases the difference is exactly 100 years, and the result is that, according to the Hebrew, the Antediluvian age is shortened by six centuries.*

* We have already (p. 3) referred with high admiration to the labours of Mr W. Petrie, C.E., London ; but we cannot resist this opportunity of lay-

In the second or Postdiluvian age, the result is precisely similar, as will be perceived at a glance by arranging the ten descents, from the Flood to Abraham (Gen. xi. 10-27), in parallel columns. The figures show the age of each patriarch at the birth of his firstborn son—*first*, in the Hebrew, and *second*, in the Septuagint :—

HEBREW, . . .	35	0	30	34	30	32	30	29	70	75
SEPTUAGINT, .	135	130	130	134	130	132	130	79	70	75

Here, again, there appear clear indications of design ; for in six cases out of the ten, the age of each patriarch at the date of his eldest son's birth is, in the Hebrew, precisely 100 years less than in the Septuagint. What is still more extraordinary, the Hebrew entirely omits the name of Cainan II., thereby shortening the chronology to the extent of 130 years, though the genuineness of the Septuagint is fully attested by St Luke in his genealogy of our Lord (Luke iii. 36). Lastly, the following table

ing before our readers his sentiments on the comparative merits of the Hebrew and the Septuagint chronology. In a letter dated 25th June 1869, he says : “ As to chronology, I am glad to see that your ideas exactly confirm and justify my own conclusions—namely, that the Septuagint is much more reliable than the Hebrew. This is well shown in ‘ The True Age of the World,’ by Professor Wallace, and is also strongly proved by laying off the ages of maturity or procreation and of death in each generation, from Adam to Christ, in the form of a curve or diagram. The eye then detects incongruities and unnatural or anomalous variations in the Hebrew, and harmonies in the Septuagint, which the mind would not catch on merely reading columns of figures, even when aided by a column of differences. The Septuagint shows *sweeps* or *curves* in its diagram which can hardly have been made by a set of falsified numbers, even by a mathematically-minded forger, unless he had the aid of such a diagram, which, at the time that translation was made, is not likely. Our great hope must now be to find a copy of the Hebrew Scriptures among the remaining Jewish communities in the interior of Persia or China, whose present Scriptures have been copied successively from copies taken with them at the time of the Captivity, or at least obtained from Jerusalem after the partial restoration, but before the Christian era, when the Hebrew Scriptures of Judæa, as we now have them, were sophisticated as to dates. Such a true copy of the original Scriptures will probably justify the Septuagint in most cases ; though even the Septuagint, here and there, has probably unintentional miscopyings.”

shows the discrepancies of the two texts with regard to the *whole lives* of the ten Postdiluvian patriarchs :—

HEBREW, .	438	0	433	464	239	239	230	148	205	175
SEPTUAGINT,	538	460	433	404	339	339	330	208	205	175

An important consideration in favour of the Septuagint chronology is that, according to it, the decrease in the duration of human life after the Flood is far more natural and progressive than in the Hebrew, which exhibits great leaps between the different terms of the progression. Leibnitz's celebrated rule, *natura non agit per saltum*, is nowhere more applicable than here. There is a suitable proportion, moreover, in the Greek numbers, between the whole lives of the patriarchs (both before and after the Flood), and their ages at the birth of their eldest sons, which is wholly wanting in the Hebrew. In the period before the Flood, the average of the six *antepaidogonian* ages is to the average of their entire lives in the ratio of 1 to 5 in the Greek, but only as 1 to 9 in the Hebrew. If these ratios be applied to the present average duration of human life, we find that, were the proportions indicated by the Hebrew text to hold good, fathers would beget children at the age of *eight* years! but, according to the Greek, not sooner than at the age of *fourteen*. This argument grows in strength when we come to the Postdiluvian age; for there the Hebrew analogy would allow men now to become fathers at the age of *seven*, but the Septuagint not before the age of *twenty-three*.

Once more, the Hebrew text gives B.C. 2288 as the date of the universal Deluge, but the Septuagint B.C. 3216, or nearly a thousand years earlier. Now we cannot possibly accept the former as the true date, for we have the most indubitable monumental evidence to the contrary. Professor C. P. Smyth has shown, in his recently published 'Antiquity of Intellectual Man,' that the Great Pyramid of Jeezeh, the most ancient and stupendous of all existing monuments, was erected about the year B.C. 2170. Now such a gigantic structure, on which, according to Herodotus, 100,000 men were engaged for 30 years, could not possibly have been erected so early as 118 years after the Deluge,

or (according to the same system of chronology) only 41 years after the dispersion of nations.*

Dr Richard Lepsius of Berlin, the most learned and accomplished of all living Egyptologists, has proved, by a rigid comparison of the existing monuments, that the duration of the Egyptian monarchy prior to the exodus of the Israelites (an event which he places B.C. 1314) was 1115 years. According to this computation, Memphis was founded B.C. 2429, a date entirely agreeing with the date of the Flood as given by the Septuagint, but wholly inconsistent with it as given by the Hebrew, by Usher, and by our received text. In this conclusion our own indefatigable William Osburn—whose varied learning and familiar acquaintance with the ancient monuments are not inferior to those of the illustrious German, and whose love of truth and reverence for the inspired record are immeasurably superior—substantially agrees (see his able and highly satisfactory treatise,

* This Pyramid, moreover, in its unique and marvellous system of symbolism, gives some very remarkable indications of the true date of the Deluge. These, as interpreted by the Scottish Astronomer-Royal, clearly point to a year close upon B.C. 2800 as the actual time of that grand catastrophe. The evidence, therefore, which this colossal monument supplies, while it confirms the general testimony of both the Hebrew text and the Septuagint, differs from each by only $\frac{1}{12}$ th part of the whole time, either way—yet, precisely speaking, indicates a year that lies almost midway between the dates which they assign to that great era in the world's history. A doubt is consequently suggested, whether the chronology of the Septuagint has not, to some extent, been tampered with, as well as that of the Hebrew, though in an opposite direction? We need scarcely inform our readers that many able chronologists, including Usher, Petavius, and Clinton, adduce many weighty arguments against the early chronology of the Greek Scriptures, without being in the least swayed by any evidence obtained from the Pyramid. At the same time, the Pyramid date of the Deluge approaches that of the Septuagint about a hundred years more closely than it does the date of the Hebrew text. Further investigations will, in all likelihood, confirm the testimony of this "sign and wonder in the land of Egypt" (Jer. xxxii. 20), and render it more and more manifest that that unparalleled structure was intended from the beginning to be the grand standard for trying and correcting not only the confused *metrologies* of the nations, but also their equally vitiated *chronologies*.—(See below, under *Egypt*.)

entitled, 'The Monumental History of Egypt,' 2 vols. : London, Trübner & Co., 1854). He also agrees with Lepsius in believing that the first migration into Egypt took place not more than 120 years prior to the building of Memphis and the founding of the Egyptian monarchy. No great interval can have separated this migration from the date of the confusion of tongues, and the consequent dispersion of the nations—events which, therefore, we may safely reckon as having occurred about B.C. 2550. Osburn further shows (i. 377) that the call of Abraham, or rather his visit to Egypt, which must have occurred very soon thereafter, took place in the reign of Pharaoh Achthoes, the 24th or 25th king of that country, about 566 years after the first peopling of the land, and 446 years after the building of Memphis. This would make the call of Abraham—that grand date at which all human history really commences—to have occurred about B.C. 1984. According to Usher, Abraham left Haran, on his way to Canaan, B.C. 1921 ; Joseph was carried into Egypt in 1728 ; Jacob, with his family, settled in Goshen in 1706 ; and the exodus took place in 1491. These dates do not differ very widely from those deduced from the monuments, which indicate that Abraham arrived in Egypt in the reign of Pharaoh Achthoes, of the 11th dynasty, about B.C. 1984 ; that Joseph was sold as a slave in the reign of Pharaoh Aphophis, a prince of the 16th dynasty, in 1791 ; that the immigration of the Israelites into the land took place in the reign of the same king, about 1769 ; and that they finally left the land in the reign of Sethos II. of the 19th dynasty, B.C. 1554. It thus appears that our received text is in perfect accordance with the monuments in assigning 430 years as the entire period between the giving of the promise to Abraham and the exit of his seed from the land of bondage. The two records are also in harmony in indicating that the 430 years are divided into two equal parts by the arrival of Jacob and his family in the Delta, each part having a duration of 215 years. This result, especially when taken in connection with the above dates as they stand in the Septuagint, is of the greatest importance in fixing the chronology of the Old Testament, and in silencing the cavils of influential modern objectors. One serious difficulty, however, still remains—a difficulty, indeed,

which to many is all but insuperable. In Gen. xv. 13, God says to Abraham, "Know of a surety that thy seed shall be a stranger in a land that is not theirs, and shall serve them; and they shall afflict them 400 years. . . . *But in the fourth generation* they shall come hither again; for the iniquity of the Amorites is not yet full." The actual time was 430 years (Ex. xii. 40, Gal. iii. 17), but the apparent discrepancy here is easily explained. The real difficulty is found in the words, "fourth generation." Most expositors assume that this means the fourth generation from *Jacob*; and they adduce texts to show that, in certain well-known pedigrees, *three* names only appear during the 215 years of the actual sojourn. There can be no doubt, however, that the passage quoted speaks of the fourth generation from *Abraham*, and not from *Jacob*. But even admitting that these generations are to be counted from Jacob, we ask how it is possible that, in *three descents*, seventy persons could have expanded into 600,000 fighting men, besides women, children, and old men, amounting in the aggregate to at least 4,000,000 souls! The thing is utterly absurd, and, in short, could not be. Besides, it was *not* the men of the fourth descent from Jacob that left Egypt in the days of Moses, but those of the *twentieth descent*, as is evident from 1 Chron. vii. 20-27. In this interesting passage we have the full details of the genealogy of Joshua, the son of Nun, who belongs to the nineteenth descent from Ephraim, the younger son of Joseph. The house of Joseph doubtless enjoyed many facilities for preserving their pedigree—facilities that were denied to the other tribes—and hence we have *all* the links of the chain presented to our view; but about the same number of descents must have belonged to each of the other tribes, though, *as is usual in such cases*, only prominent persons are mentioned in their pedigrees when they happen to be cited. This extremely important passage, then, enables us at once to see how, in the course of 215 years, so small a number could have increased to such a mighty host.* But then, what becomes of the words, "in the fourth generation they shall come hither again"? We shall have no difficulty in explaining this; for "generation" does not always signify *descent*—as, for example, Num. xxxii. 13, "And the Lord's anger was kindled against Israel, and He made them

* Many learned Germans make the sojourn in Egypt to be 430 years.

wander in the wilderness forty years, until all the *generation* that had done evil in the sight of the Lord was consumed." Here "generation" means simply "all the souls then living." On account of Jehovah's displeasure, the whole of the mighty host that left Egypt (above the age of twenty) were to perish in 40 years instead of 100 years, which would be the time required for all the adults then living to die a natural death. Let us take a simple illustration. In May 1869, the Registrar-General of England estimated the population of the United Kingdom at 31,015,234. Some of these were infants of one hour's age, others were fully 100 years old ; but in one hundred years hence, or a little more, not one person of these thirty-one millions will be alive ; but fifty or sixty millions of other persons will have come in their room. These, or some of them, will live another 100 years, and *four* such universal displacements will require 400 years, or four generations. The average life of man was much greater in the days of the patriarchs than now. Abraham lived 175 years, Isaac 180, Jacob 148, Joseph 110, Aaron 122, and Moses 120, and their mean age is 142 years. This is probably greatly above the general average of the men of their respective generations, for depravity shortens human life ; yet we cannot suppose that it was less than 120 years. Four such generations would require 480 years. But the people actually entered Canaan 470 years after Abraham left it : and thus the word of the Lord was literally fulfilled ! For this splendid result we are again mainly indebted to the admirable W. Osburn ('*Monumental History of Egypt,*' ii. 629), whose pious and learned labours cannot fail, ere long, to assume their proper place.

SECT. 1.—Antediluvian Period (B.C. 5478-2348).

B. C.

5478. Creation of man, according to Hales, Josephus, and the Septuagint version (Wallace).
the likeness of Jesus his person reflects.
4004. Creation of man, according to Archbishop Usher* and the Hebrew text.
Jehovah awards him the world's sceptre (Gen. i. 28).

* The chronology of Usher is followed throughout, unless it be otherwise indicated.

- B.C.
3874. Birth of Seth, Adam's third son (Usher).
half of the race were the posterity of Seth (Gen. iv. 25).
3769. Birth of Enos, Seth's eldest son.
in the human pedigree Enos is the third (Gen. v. 6).
3679. Birth of Cainan.
the age of men was prodigious then (Gen. v. 9).
3609. Birth of Mahalaleel.
the age of Mahalaleel yields to others (Gen. v. 12).
3544. Birth of Jared.
the great longevity of Jared is astounding (Gen. v. 20).
3382. Birth of Enoch.
his heavenly home he reached without dying (Gen. v. 24).
3317. Birth of Methuselah.
the greatest age on Bible page (Gen. v. 27).
3130. Birth of Lamech.
a great calamity hangs over the world (Gen. v. 29).
3074. Death of Adam.
heaven awards him the penalty of sin (Gen. v. 5).
3017. Translation of Enoch.
the heavens welcome the beginner of prophecy (Jude 14).
2962. Death of Seth.
the first triumph of natural death (Gen. v. 8).
2948. Birth of Noah, the tenth from Adam.
Adam's tenth son rescued (Gen. v. 28).
2864. Death of Enos, Seth's eldest son.
death results from nature's sinfulness (Gen. v. 11).
2469. Noah commanded to construct the ark.
fabricates a ship for the mountain tops (Gen. vi. 14).
2448. Birth of Japheth, Noah's eldest son.
the family of a saint is saved from ruin (Gen. vi. 10).
2349. Death of Methuselah, one year before the Flood.
a fearful gathering storm terrifies him (Gen. v. 27).
2348. The universal Deluge, according to Usher.
a deluge high, the surges rise ! (Gen. vii. 20).
2288. The Deluge, according to the Hebrew text.
a flood destroys the rebel race (Gen. vii. 23).

SECT 2.—Patriarchal Period (B.C. 3216-1574).

- B.C.
 3216. The Deluge, according to the Septuagint (Wallace).
a general deluge covers the mountains (Gen. vii. 20).
 2800. The Deluge, as indicated by the Great Pyramid of
 Jeezeh (C. P. Smyth).
the floods arise, the world expires (Gen. vii. 21).
 2550. Dispersion of nations, and colonisation of Egypt
 from Shinar by the Mizraites (Osburn).
a family lands in the lonely west.
 2473. Hebron erected, seven years before Zoan in Egypt.
the first settlement in Palestine was Hebron (Num. xiii. 22).
 2429. Menes, a native of Tanis, or Zoan, and first king of
 Egypt, builds Memphis (Osburn).
the first king once dwelt at Tanis.
 2346. Birth of Arphaxad, Shem's third son (Usher).
destined to grace our Saviour's ancestry (Gen. x. 22).
 2281. Birth of Heber, grandson of Arphaxad.
father of the famous race of Abraham (Gen. xi. 14).
 2247. Tower of Babel built, and confusion of tongues.
a famous edifice situated on the Euphrates (Gen. xi. 9).
 „ Birth of Peleg, Heber's eldest son, fifth in descent
 from Noah, and dispersion of nations.
the divine fiat scatters the people (Acts xvii. 26).
 2218. Nimrod, grandson of Ham, founds Nineveh, Calah,
 Resin, and Rehoboth.
four famous cities erected by him (Gen. x. 11, margin).
 2188. Mizraim, or Menes, first king of Egypt, founds This.
the first beginning of royalty in the realm (Usher).
 2170. The Great Pyramid at Jeezeh erected (C. P. Smyth).
its founder characterised by profound wisdom.
 2126. Birth of Terah, the fifth from Peleg.
the father of Abraham dwelt in Mesopotamia.
 2071. True date of the call of Abraham, according to Wallace.
the finest example of pure obedience.
 2000. The Pelasgi arrive in Greece about this time.
a family wends its way westward (Philip Smith).
 1998. Death of Noah.
ceases to testify to truth and righteousness (Gen. ix. 26).

B. C.

they liberate the monarch from durance (Jer. liii. 31).
 560. Jehoiachin, the last Jewish monarch, dies in Babylon.
the last of their monarchs expires (Jer. liii. 34).
 559. Cyrus the elder founds the Medo-Persian empire.
lead thy legions to victory! (Isa. xlv. 28).
 555. Daniel's dream of the four beasts.
lo! a lion and a leopard (Dan. vii. 3).

B. C.

538. Belshazzar's feast: Cyrus the elder, and Darius the Mede, son of Cyaxares II., seize Babylon.
the *Lord of heaven's revenge* (Dan. v. 23).
- „ Daniel is cast into the den of lions.
the *Lord honours* those that *reverence* Him (Dan. vi. 16).
536. Zerubbabel the priest, in the seventieth year of the captivity, leads back 42,000 Jews to Jerusalem by command of Cyrus.
liberates the holy nation (Ezra ii. 2).
535. Zerubbabel lays the foundation of the second Temple.
they *lament* that the *house is lowlier* (Ezra iii. 8).
517. Ahasuerus (Darius Hystaspes) marries Esther.
a lovely captive is preferred (Esther ii. 17).
515. Dedication of the second Temple.
they *loudly bless* the *Lord* (Ezra vi. 16).
510. Haman, the enemy of the Jews, slain by Ahasuerus.
allured to a banquet of wine (Esther vii. 10).
485. Xerxes I. succeeds his father Darius as King of Persia.
Xerxes succeeds him as *ruler of the land*.
465. Artaxerxes I., his son, becomes king.
known by the name of Longimanus (Ezra iv. 7).
457. Ezra brings back a second company from Babylon.
a scribe leads back a part (Ezra viii. 1).
452. Ezra writes the two books of Chronicles.
the *kings of the land described* in them.
444. Nehemiah becomes Governor of Judæa for ten years.
sent by the king to Jerusalem (Neh. ii. 5).
434. Nehemiah's second journey to Jerusalem.
the *Jew is grieved* at the *sacrilege* (Neh. xiii. 6).
416. Malachi prophesies: the Old Testament completed.
the *Scriptures conclude* with *Malachi*.
401. Cyrus the younger defeated and slain by Artaxerxes Mnemon at Cunaxa.
Xenophon joined the "*Expedition of Cyrus.*"
359. Philip ascends the throne of Macedon.
as a *hostage* he *learned his tactics*.

SECT. 9.—The Jews under the Greeks (B.C. 356-63).

- B. C.
 356. Birth of Alexander the Great.
 the great Leviathan of antiquity.
336. Alexander succeeds to the throne of Macedon.
 the greatest hero a monarch.
332. Alexander marches against Jerusalem.
 the God of the Hebrews is adored (Josephus' Antiq.)
320. Jerusalem taken by Ptolemy Soter : 100,000 Jews
 captured.
 the Egyptians drive them into exile.
314. Antigonus wrests Judæa and Phœnicia from Ptolemy.
 greatly curtails the kingdom.
284. The Septuagint translation completed at Alexandria.
 the first rendering of the Scriptures.
263. Berosus of Babylonia writes the history of his country
 in Greek.
 a famous native historian.
216. Ptolemy Philopater slays 50,000 Jews at Alexandria.
 a frightful carnage at Alexandria.
204. The sect of the Sadducees formed.
 they denied the existence of spirits (Acts xxiii. 8).
198. Antiochus the Great recovers Palestine from Egypt.
 Canaan is triumphantly restored.
170. Antiochus Epiphanes, King of Syria, takes Jerusalem
 and plunders the Temple.
 a cruel persecutor wastes it (1 Mac. i. 20-24).
168. Epiphanes dedicates the Temple of Jehovah to Jupiter.
 a blasphemer's impious revenge.
165. Judas Maccabeus begins his insurrection.
 courageous Maccabeus the liberator.
160. Death of Judas : composition of "The Maccabees."
 the Book of Maccabees written.
155. Palestine freed from the yoke of Syria.
 a breathing allowed it for a little.

B. C.

146. Third Punic War : Carthage destroyed.
the Carthaginian kingdom annihilated.
144. Jonathan the high priest slain by Iryphon.
butchery of Jonathan by the Syrians.
125. Antiochus VII. besieges Jerusalem.
conquers the Holy Land.
130. John Hyrcanus subdues Idumæa.
compels the Gentiles to worship.
107. Aristobulus, his son, assumes the title of king.
a crown worn by a priest.
95. The Pharisees provoke an insurrection in Jerusalem.
the wonted troublers of the land.
88. Anna, the prophetess, begins to reside in the Temple.
waiting for the era of redemption (Luke ii. 37).
70. Aristobulus II. deposes his brother Hyrcanus.
excited by Pompey to the war.

SECT. 10.—The Jews under the Romans (B.C. 63-4).

B. C.

63. The Romans, under Pompey, take Jerusalem.
the Western Empire grasps it.
54. Crassus plunders the Temple, and overruns Judæa.
he wastes the land of the Jews.
48. Antipater becomes Governor of Judæa.
Judæa is under the Romans.
40. Herod the Great, son of Antipater, becomes King of Judæa.
the senate exalts him.
37. The Romans, under Herod, take Jerusalem, and slay multitudes of the inhabitants.
the wicked Herod persecutes them.
31. An earthquake destroys 30,000 persons in Judæa.
a great convulsion.
28. The Roman republic ends: Augustus becomes emperor.
the fall of the republic.
17. Herod begins to rebuild the Temple.
the wiles of a crafty prince.

B.C.

11. Herod builds the city of Cæsarea.
he *builds Cæsarea*.
5. Birth of John the Baptist.
he walks in the ways of *Elijah* (Luke i. 57).
4. Birth of Jesus Christ.
welcome the world's *Saviour* ! (Luke ii. 7).
3. Death of Herod : Archelaus becomes Ethnarch of
Judæa, Samaria, and Idumæa.
woe to the wicked *Herod* ! (Matt. ii. 22.)
- „ Herod Antipas (son of Herod the Great) becomes
Tetrarch of Galilee and Peræa.
his wife was the wicked *Herodias* (Mark vi. 14).
2. Jesus returns with his parents from Egypt to Nazareth.
exodus of the *Deliverer* (Matt. ii. 23).

 CHAP. II.—NEW TESTAMENT HISTORY.

(B.C. 4.-A.D. 100.)

WE cannot be expected here to discuss all the difficulties connected with New Testament chronology, for, however interesting in themselves, they are insignificant when compared with those we encountered under the last chapter. There the discrepancies sometimes amounted to several centuries, whereas here they usually embrace only a very few years. By far the most important is the true date of our Lord's birth. This is the central point of human history—the grand era from which all other events are counted by Christian nations. Hence this era—when “the Word became flesh,” and when the Creator eternally allied Himself to the creature—is significantly termed “the fulness of time.” But just as we cannot determine that point in past *eternity* when God called the physical universe into existence ; or that point in past *time* when living creatures first peopled the

earth ; or that greatly more recent date when God created man in His own image ; or, finally, that other point, still future, when “an angel shall swear by Him that liveth for ever and ever that time shall be no longer ;”—so also we cannot determine, at least with undoubted accuracy, the precise time when the Word became flesh, and when our ruined species became linked, by indissoluble bonds, to the Eternal.

The New Testament writers—closely following the example of Moses—give us two distinct genealogies of our Lord (Matt. i. 1-16 ; Luke iii. 23-38), the one being his lineage through Joseph, his supposed father, and the other his real pedigree through Mary. These genealogies sufficiently determine the order of time in which the “Desire of all nations” appeared, but they do not fix the precise year. As the genealogy given by Matthew was specially meant for Jewish readers, it begins with Abraham their renowned ancestor ; while that of Luke, whose main purpose was to show that Jesus is the kinsman of the entire race, is extended backward to Adam, who is emphatically styled “the son of God.” Matthew appends a very curious summary to his genealogy, apparently for *mnemonic* purposes : “So all the generations from Abraham to David are fourteen generations ; and from David until the carrying away into Babylon are fourteen generations ; and from the carrying away into Babylon unto Christ are fourteen generations.” This remarkable summary, besides being helpful to the memory, is eminently *suggestive* ; for here the God of Israel is represented as marching gloriously through the ages in stately, measured steps, disposing at pleasure of all events in Israel’s history, and, through Israel, of the fortunes of all mankind. It will be perceived that the passage does not refer to *all* past time, but simply to *Israel’s* past ; not to the five thousand years that had already elapsed of human history, but to the two thousand years that had elapsed since God singled out one family from among all the families of our species to be a peculiar people unto Himself. Here God is seen descending from heaven to earth, and the precise spot which His feet first touch is UR OF THE CHALDEES, the native city of him who is, ere long, honoured with the appellation of “the friend of God.”

“Arise,” said God, “get thee out of thy country, and from thy kindred, unto a land that I will show thee ; and I will make of thee a great nation ; and I will bless thee, and make thy name great : and in thee and thy seed shall all families of the earth be blessed” (Gen. xii. 1-3). Subsequently he greatly enlarges this promise by adding, “And I will establish my covenant between me and thee, and thy seed after thee, in their generations, for an everlasting covenant, to be a God unto thee, and to thy seed after thee. And I will give unto thee and to thy seed after thee the land wherein thou art a stranger, all the land of Canaan, for an *everlasting possession* ; and I will be their God” (Gen. xvii. 7, 8). These exceeding great and precious promises are afterwards solemnly confirmed by an oath, when Abraham by self-sacrificing obedience has demonstrated the vitality of his faith. “And the angel of the Lord called unto Abraham out of heaven the second time, and said, By myself have I sworn, saith the Lord, because thou hast done this thing, and hast not withheld thy son, thine only son, that in blessing I will bless thee, and in multiplying I will multiply thy seed as the stars of heaven, and as the sand which is upon the sea-shore ; and thy seed shall possess the gate of his enemies ; and in thy seed shall all the nations of the earth be blessed, because thou hast obeyed my voice” (Gen. xxii. 15-18). We give these passages at length, because they constitute Israel’s title-deeds to the land out of which he has, for a time, been ejected, and because the time is approaching when the original charter will speak for itself.

The inspired apostle next sees the Ancient of days beginning to walk down, in solemn tread, athwart the centuries. His feet first meet the ground at **HEBRON**—where Abraham once purchased a field and a cave in which to deposit the sacred remains of his beloved Sarah, thus affording to his posterity a new ground of hope that at a future day they would obtain possession of the entire land—and at the moment that the man after God’s own heart is being crowned king of the covenant people. This stupendous step embraces a period of 866 years, or, according to the authentic pedigree from which the

apostle is quoting, it embraced "fourteen generations" of men * (including events till then unparalleled in the world's history), and terminated with the full establishment of the Israelitic kingdom, and the erection of the Temple where the God of Israel dwelt among them after the manner of an earthly sovereign. The next step spans the entire period of the kingdom—embracing 467 years, or fourteen generations—and Jehovah's foot is seen to rest on "the rivers of Babylon," where captive Judah, the last of the tribes of expatriated Israel, sits on the ground weeping, with her harp hung up on the willows, remembering Zion, and refusing to be comforted (Ps. cxxxvii. 2).

One step more, and the Eternal plants his foot on the most interesting point of the earth's surface, and at the moment when the most memorable event in the world's annals is being enacted—even when the Eternal Son, now incarnate, lies a little babe in the manger at BETHLEHEM, and when an angel is heard proclaiming: "Fear not: for, behold, I bring you good tidings of great joy, which shall be to all people. For unto you is born this day, in the city of David, a Saviour, which is Christ the Lord." The event is not merely of infinite importance to Israel and to "all people," but it necessitates a grand jubilee in the realms of glory; for "suddenly there was with the angel a multitude of the heavenly host praising God, and saying, Glory to God in the highest, and on earth peace, goodwill toward men." This, truly, is the divine fruit of that wondrous tree which, ages before, Jehovah had planted, but which has not yet produced its destined fruit.

* In reality this period (from Abraham to David) embraced about 36 generations—viz., 5 from Abraham to Ephraim; 19 from Ephraim to Joshua the son of Nun (see 1 Chron. vii. 20-27); and about 12, at least, from Joshua to David. That there were 19 generations—that is, *descents*—from Ephraim to Joshua, we have fully demonstrated in our remarks on the chronology of the Old Testament (p. 68). Doubtless the "fourteen descents" recorded by St Matthew were all the names *recorded* in the genealogy of the tribe of Judah in the period referred to; but, as in almost all similar cases, this genealogy records only well-known outstanding names.

Here the Almighty pauses as if to contemplate the glory yet to be revealed—that eternal revenue of glory which He will infallibly derive from this unparalleled event. Assuredly, however, though He pauses, He does not mean to halt. His face is still steadfastly directed towards the future, and we are led confidently to expect that He will take as many steps more as He has already taken. Indeed we cannot but anticipate that His future steps shall, like all His past, be both *measured* and *majestic*; and that they shall, in the same way, correspond with the critical junctures in Israel's future. The two millenniums He has already traversed consisted, as we have seen, of three great periods, commencing respectively with Abraham, David, and the Captivity; and doubtless three other periods, not less eventful, have yet to be traversed ere all God's purposes regarding His covenant people shall have been consummated. The Cross of Christ stands in the centre of all the ages. The three former periods terminated *there*; and *there* must the three periods that follow begin. Not only does St Matthew *suggest* this in his famous mnemonic sentence (for *mnemonic* it is, in the highest sense of the term), but near the end of his Gospel (Matt. xxiv. 3-41) He shows how the Lord Himself, as He sat on the Mount of Olives, and immediately before His last sufferings, filled up St Matthew's outline with details of the most momentous character. St Luke in the first chapter of the Acts, St Paul in his two epistles to the Thessalonians, and especially St John in that wonderful "Revelation" which so appropriately closes the canon of Scripture (particularly chap. xx.), furnish us with many further particulars. In short, all the writers of the New Testament agree in assigning to the portion of Israel's history then future **THREE GRAND PERIODS**, which, on account of their main characteristics, we may denominate the Period of the Dispersion, the Period of the Kingdom, and the Period of Consummation, after which time shall cease and the eternal ages begin. But all the periods in Israel's history, whether past or future, will be more clearly apprehended by our employing a simple diagram.

THE SIX PERIODS OF ISRAEL'S HISTORY.

Abraham.	1. Israel's preparation, or the planting and training.	David.	2. Israel under kings.	Captivity.	3. Israel in subjection.	Christ.	4. Israel dispersed among the nations, or, "the times of the Gentiles."	Second Advent.	5. Israel restored to the kingdom, or, "the times of restitution."	Satan loosed.	6. The age of consummations.	General Judgment.
A	B	C	D	E	F	G						

It will be observed that the periods are separated from each other by double lines enclosing narrow *spaces*—for the ages of history, and especially those of Israel's history, glide into one another as gradually and imperceptibly as the colours of the rainbow. Or, taking another illustration, a man can measure the length he traverses on the sea-shore by merely counting the number of his footprints on the sand ; but the measurement must include not simply the distance between the footprints, but also the length of the footprint itself. Each of the double lines (A, B, C, &c.), denotes, therefore, not a single point of time, but a considerable number of years. Thus, when the evangelist says, "from the captivity to Christ are fourteen generations," it would be impossible to say which of the *three deportations* he alludes to ; and whether he refers to the incarnation, birth, baptism, death, resurrection, or ascension of the Lord. As a matter of fact, all these events separate the present age from that which preceded it ; and it will be found, in all cases, that the brief period that separates one age from another is crowded with events having a vital bearing on the character of the later age. Thus the PRESENT PERIOD (marked 4 in the diagram) derives all its peculiarities from the events that took place immediately prior to the Lord's ascension (D) ; for that people for whom, above all others, the Son of God died—that people who nailed Him to the tree, exclaiming, "His blood be on us and on our children"—have for the last eighteen hundred years been wandering among the nations as fugitives and vagabonds. That fearful imprecation, taken in conjunction with the unparalleled crime to which it had reference, was so heinous and aggravated, that the heavens became black at the spectacle, the rocks rent, and all nature reeled to its foundations. Such was the crime, that although the divine sufferer looked up to heaven and cried, "Father, forgive them, for they know not what they do," no response has been given to the prayer until this day. But that prayer was as unparalleled as the crime ; and though God in His wrath has delayed the answer, yet that answer lies among the absolute certainties of the future, "for God hath not cast away His people which He foreknew." "Blindness in part is happened to Israel, until the fulness of the Gentiles be come in ;

and so all Israel shall be saved: as it is written, There shall come out of Zion the Deliverer, and shall turn away ungodliness from Jacob" (Rom. xi. 25, 26). Till that eventful day arrives (we have no hesitation in affirming it), all the pious efforts of Christians to induce Israel to acknowledge their Messiah cannot fail, except in individual cases, to end in disappointment. The period or age now existing is emphatically termed by the Lord "the times of the Gentiles," and these "times" are to continue until the Lord's second advent (E). During this period, "this gospel of the kingdom shall be preached in all the world for a witness unto all nations, and then shall the end come" (*i.e.*, the end of the *age*, Matt. xxiv. 14). All the nations, however, it appears, are not to be saved by such preaching, for the passage indicates the contrary, and *that* result will never be attained till the seed of Abraham become the preachers; but the heralds of salvation are now sent to every land to proclaim salvation through Christ to all nations, "as a *testimony against them*," and in order to leave all men without excuse. A limited number, however, from all nations, will give heed to the good tidings, and surrender themselves to Him who is now seated at God's right hand. These, in their aggregate, are called in Scripture "the fulness of the Gentiles;" for though a very small body in comparison with the mighty host "whom the God of this world (*age*) hath blinded," they will doubtless form an immense multitude.

Before the age terminates, or the millennial era commences, Christianity will everywhere become adulterated—the impure leaven will have thoroughly changed the character of the "three measures of meal" (Matt. xiii. 33), and the faithful witnesses shall be hated of all nations, and be everywhere persecuted. The true Church, in deepest distress, shall look upward and cry, "Lord, how long!" and then, as when He delivered His covenant people from Egypt, "the Lord himself shall descend from heaven with a shout, with the voice of the archangel, and with the trump of God; and the dead in Christ shall rise first: then we which are alive and remain shall be caught up together with them in the clouds, to meet the Lord in the air" (1 Thess. iv. 16). It would appear that immediately after the removal of the saints

the wrath of the Almighty shall descend in unparalleled judgments on the earth, yet the inhabitants shall not learn righteousness. On the contrary, wickedness shall abound, and the love of many wax cold. Then, also, shall the long-predicted Antichrist—that “wicked one,” who is to be as really an incarnation of Satan as the Redeemer was of the divine nature—appear, “with all power and signs and lying wonders, opposing and exalting himself above all that is called God, or that is worshipped; so that he, as God, shall sit in the temple of God, showing himself that he is God.” His reign, however, is destined to be of short duration; for the Lord “shall consume him with the spirit of His mouth, and destroy him with the brightness of His coming” (2 Thess. ii. 3, 12).

“The times of the Gentiles” shall thus suddenly come to an end, and a new age begin (Period 5 of our diagram). Judah and Ephraim shall then suddenly be brought back to their own land in a state of unfeigned repentance; for “it shall come to pass in that day that I will pour on the house of David and on the inhabitants of Jerusalem the spirit of prayer and of supplication; and they shall look on me whom they have pierced, and shall mourn for him as one mourneth for his only son, and shall be in bitterness as one is in bitterness for his first-born” (Zech. xii. 9).

SECT. 11.—From the Birth of Christ to the Ascension
(B.C. 4-A.D. 31).

- B. C.
4. Birth of Christ, four years before the vulgar era.
A. D. welcome, the world's *Saviour* (Matt. i. 25).
1. Birth of Christ, according to Dionysius Exiguus.*
Exiguus's computation.
6. Augustus makes Palestine a Roman province.
extinguished its *nationality* (Luke ii. 1).
7. Archelaus, Ethnarch of Judæa and Samaria, is banished
by the emperor to Gaul.
the weary exile of the *prince*.
- „ Coponius becomes first procurator of Judæa.
it is under the yoke of *procurators*.

* This would seem, after all, to be the true date (see Galloway's 'Egypt,' &c.)

A. D.

8. Jesus at Jerusalem among the doctors.
a young *reasoner* (Luke ii. 46).
14. Tiberius succeeds his stepfather Augustus.
this *Cæsar* is the *second*.
- „ Valerius Gratus, fifth procurator of Judæa.
he *commanded Judæa*.
18. Herod Antipas builds Tiberias, on the margin of the
Sea of Galilee.
on the western *coast erected*.
19. Tiberius banishes the Jews from Rome.
they are *banished by Tiberius*.
26. Pontius Pilate becomes the sixth procurator of Judæa.
awed by the *fear of man* (Luke xxiii. 24).
- „ John the Baptist begins his ministry.
the *forerunner* of the *Messiah* (John i. 6).
27. The baptism of Jesus by John.
a *dove appears* (John i. 32).
- „ Commencement of Christ's ministry.
the *divine Preacher* (John i. 38).
- „ Caiaphas becomes high priest.
a *famous prophecy* (John xi. 51).
- „ Jesus at the marriage of Cana in Galilee.
wine *fills the pots* (John ii. 7).
28. Jesus, at the first passover, cleanses the Temple.
The oxen and *doves* are *removed* (John ii. 16).
- „ Jesus discourses with Nicodemus.
He *discourses with a ruler* (John iii. 2).
- „ Jesus discourses with the woman of Samaria.
she *denies His request* (John iv. 5).
- „ Jesus preaches his first sermon at Nazareth.
His words *fill them with rage* (Luke iv. 16).
- „ John beheaded by Herod Antipas.
a *damself's request* (Matt. xiv. 8).
29. The Sermon on the Mount.
He expounds *divine truth* (Matt. v. 1).
- „ The twelve disciples are sent forth to preach.
the *disciples on a tour* (Matt. x. 5).

- A. D.
29. Peter's famous confession.
a *fisherman's theology* (Matt. xvi. 16).
30. The transfiguration of Jesus.
His *glory* was *wonderful* (2 Pet. i. 17).
- „ The seventy disciples sent out.
worthy of his *hire* is the *workman* ! (Luke x. 7.)
- „ The disciples taught how to pray.
they wanted a *heavenly example* (Matt. vi. 9).
- „ The raising of Lazarus.
at yonder *grave* He *weeps* (John xi. 43).
31. The counsel of Caiaphas.
the *high-priest's counsel* (John xi. 47).
- „ Jesus beyond Jordan : parable of the prodigal son.
exemplifies *God's compassion* (Luke xv. 11).
- „ Jesus blesses little children.
extending His *hands* He *blessed* them (Matt. xix. 15).
- „ Two blind men healed at Jericho.
He willingly *heals* the *blind* (Mark x. 46).
- „ The Lord's last appearance in the Temple.
warns His *guilty censors* (Matt. xxiv. 1).
- „ The fourth passover : the Lord's Supper instituted.
the *Holy Communion* (Luke xxii. 15).
- „ Judas Iscariot betrays Jesus.
in *Gethsemane* he *betrayed* Him (Luke xxii. 47).
- „ The crucifixion.
the *God-man crucified* (Luke xxiii. 46).
- „ The resurrection of Jesus.
yield, O *grave*, thy *Captive* ! (Matt. xxviii. 6.)
- „ The ascension into heaven.
He wears a *glorious crown* (Acts i. 9).

SECT. 12.—From the Ascension to the Introduction of the
Gospel into Europe (A.D. 31-51).

- A. D.
31. Feast of Pentecost and descent of the Holy Ghost.
welcome, *Holy Comforter* ! (Acts ii. 1.)
L. of C.

A.D.

31. Peter and John heal an impotent man.
they *heal a cripple* (Acts iii. 1).
- „ Peter and John before the Jewish Sanhedrim.
exhibit *great courage* (Acts iv. 6).
- „ The disciples practise community of goods.
the whole of their *goods in common* (Acts iv. 32).
32. Ananias and Sapphira are struck dead.
hypocrites are frightened (Acts v. 11).
- „ The disciples are arraigned before the Sanhedrim.
wary *Gamaliel's advice* (Acts v. 34).
- „ The seven deacons are chosen.
wise and *holy deacons* (Acts vi. 5).
- „ Stephen, the first martyr, stoned.
witness his *heavenly face!* (Acts vii. 54.)
- „ Great persecution at Jerusalem—the disciples dispersed.
a *general flight* (Acts viii. 1).
- „ Philip, one of the seven, preaches at Samaria.
wins a *host from death* (Acts viii. 5).
33. Simon Magus seeks to purchase the Holy Ghost.
wanted the *Gift for gold* (Acts viii. 18).
- „ Philip baptises the Ethiopian eunuch.
on his way *home by Gaza* (Acts viii. 36).
34. Saul vehemently persecutes the Church.
extreme *hatred to the saints* (Acts viii. 3).
35. Saul, on his way to Damascus, is converted.
witnessed a *heavenly light* (Acts ix. 1).
36. Peter's vision at Joppa: conversion of Cornelius.
the *Gentiles to be invited* (Acts x. 9).
- „ Pontius Pilate and Caiaphas deposed: Pilate is suc-
ceeded by Marcellus.
the *guiltiest of mankind.*
37. Birth of Josephus, the historian.
wrote the *history of his people.*
- „ Death of Tiberius, and accession of Caligula.
hated by his people.

- A.D.
37. Paul, at Jerusalem, is sent to preach to the Gentiles.
the *Gentile's apostle* (Acts ix. 15).
38. Paul preaches to the Gentiles at Tarsus, his native city.
welcomes the *heathen* to the *Redeemer* (Acts xi. 25).
41. Claudius, fourth Roman emperor, ascends the throne.
he *succeeds Caligula* (Acts xi. 28).
- „ Herod Agrippa becomes king of Palestine.
wields the *sceptre of Canaan* (Acts xii. 1).
- „ Paul leaves Tarsus for Antioch in Syria.
they are *known* as “*Christians*” (Acts xi. 26).
42. Herod slays the Apostle James and imprisons Peter.
James is decapitated (Acts xii. 2).
43. Paul and Barnabas go from Antioch to Jerusalem with
a collection.
they went to *Jerusalem* with a *gift* (Acts xi. 30).
44. Paul goes to Asia Minor on his first missionary journey.
exhorts them to *seek salvation* (Acts xiii. 38).
45. Paul and Barnabas in Cyprus.
the *sorcerer Elymas* (Acts xiii. 8).
46. Paul and Barnabas go to Antioch in Pisidia.
they *set out for Antioch* (Acts xiii. 14).
- „ Paul and Barnabas visit Iconium and Lystra.
“*Jupiter and Mercury!*” (Acts xiv. 8.)
- „ Paul and Barnabas go to Antioch in Syria.
they *sail to Antioch* (Acts xiv. 26).
47. Paul sees a heavenly vision.
a wondrous *sight appears* (2 Cor. xii. 2).
48. Disputation at Antioch regarding circumcision.
a war for *Jewish rites* (Acts xv. 1).
- „ Paul and Barnabas sent to Jerusalem to consult the
Apostles.
a *synod's resolutions* (Acts xv. 2).
49. Paul and Barnabas return to Antioch in Syria.
the *Judaisers are vanquished* (Acts xv. 22).
50. Peter, at Antioch, is rebuked by Paul for dissimulation.
what a *lamentable example!* (Gal. ii. 11.)

A.D.

- 51 Paul leaves Antioch for Cilicia.
leaves for Cilicia (Acts xv. 41).
- „ Paul, at Lystra, becomes acquainted with Timothy.
 the wanderer *lights* on a *companion* (Acts xvi. 1).

**SECT. 13.—From the Introduction of the Gospel into Europe
 to the Death of John (A.D. 51-100).**

A.D.

51. Paul at Troas sees a remarkable vision.
yonder the Lord is beckoning us! (Acts xvi. 9.)
- „ Paul and Timothy arrive at Macedonia.
Lydia is converted (Acts xvi. 11).
52. Felix becomes procurator of Judæa.
wantonly loved Drusilla (Josephus).
- „ Paul visits Athens, and preaches on Mars' Hill.
laments their idolatry (Acts xvii. 22).
53. Paul at Corinth is arraigned before Gallio.
a liberal-minded governor (Acts xviii. 12).
- „ Paul writes to the Thessalonians and Galatians.
“the Lord is at hand” (Phil. iv. 5).
54. Paul sets out for Jerusalem, and sails by Ephesus.
he leaves for Jerusalem (Acts xix. 21).
- „ Paul returns to Antioch in Syria.
he leaves for Syria.
- „ Paul leaves Antioch on his third missionary journey.
a long journey.
- „ Nero, the fifth Roman emperor, succeeds Claudius.
a wretched life of sensuality.
55. St Matthew writes his Greek Gospel.
exhibits our Lord's lineage.
- „ St Mark writes his Gospel at Rome.
exhibits our Lord's life.
- „ St Paul, at Ephesus, writes 1st Corinthians.
he excommunicates a lawless libertine.
56. St Paul leaves Ephesus for Troas and Philippi.
he leaves for Macedonia (Acts xx. 1).
57. St Paul composes his 2d Epistle to the Corinthians.
writes them a letter from Philippi.

A. D.

58. Returns to Corinth, and writes to the Romans.
wholly excludes *legal righteousness*.
59. Paul, at Miletus, sends for the Ephesian elders.
they wept at *leave taking* (Acts xx. 37).
- „ Paul, at Jerusalem, is assaulted in the Temple.
they *lay hold* on him in the *Temple* (Acts xxi. 27).
- „ Lysias sends Paul by night to Cæsarea.
Lysias evades them (Acts xxiii. 23).
- „ Paul tried by Felix, then left in prison two years.
the *eloquent Tertullus* (Acts xxiv. 2).
60. Felix is recalled, and is succeeded by Porcius Festus.
Nero expels him (Acts xxiv. 27).
- „ Paul pleads his cause before Agrippa and Bernice.
what *noble witnessing!* (Acts xxvi. 27.)
- „ Paul is sent to Rome, but is shipwrecked.
at *Malta* they *winter* (Acts xxviii. 1).
61. Paul arrives in Rome, where he remains two years.
the *missionary* in the *capital* (Acts xxviii. 30).
62. Festus dies, and is succeeded by Albinus.
he witnessed *many disorders*.
63. Paul, in Rome, writes Ephesians, Colossians, Philemon,
and perhaps Philippians and Hebrews.
what *noble gems!*
- „ St Luke writes his Gospel and the Acts at Rome.
matchless histories.
64. Paul tried and acquitted by Nero.
Nero justifies him.
- „ Rome set on fire by Nero, who blames the Christians.
Nero himself *kindled* it.
- „ First general persecution of the Christians.
an awful *massacre* of the *saints*.
- „ Paul escapes from Rome, and goes to Macedonia and
Asia Minor.
an expedition to *Macedonia* and *Asia* (Acts xx. 1).

A.D.

64. Paul leaves Macedonia and sails to Spain.
went from *Macedonia* to *Spain* (Rom. xv. 28).
65. Rebellion in Judæa against the Romans breaks out.
a *mutiny* in the *Land*.
- „ Many prodigies are seen at Jerusalem.
the wonders in *nature* are *alarming* (Josephus).
- „ Paul leaves Spain for Crete, Miletus, Corinth, &c.
this *mission* is his *last*.
66. The Jewish war begins under Flavius Vespasian.
a war *unparalleled* in *annals*.
67. Paul sets out for Nicopolis in Epirus, and writes his
Epistle to Titus.
what a *noble pastoral*! (Tit. iii. 12.)
- „ Paul is arrested at Nicopolis and sent to Rome.
his *end* is *approaching* (Acts xxvii. 1).
- „ Paul arrives in Rome and is confined in the Mamertine
prison.
the awful *Mamertine prison* (Acts xxviii. 16).
- „ Paul writes his 2d Epistle to Timothy.
he *ends* his *epistles*.
- „ Massacre of the Jews at Cæsarea, Ptolemais, and Alex-
andria.
monstrous proceedings.
68. Paul and Peter are tried, and condemned to be slain.
executed by *Nero* at *Rome* (Josephus).
- „ Death of Nero, who is succeeded by Galba.
the execrable *Nero* is *removed*.
69. Flavius Vespasian, the ninth emperor, proclaimed at
Alexandria.
next after *Vitellius*.
70. Jerusalem destroyed by Titus Vespasian, the emperor's
son, and a million of Jews massacred.
what a *piteous wail*!
73. Palestine finally subdued by the Romans.
the wicked *people* are *humbled*.

A. D.

79. Titus Vespasian, tenth emperor of Rome.
this prince is the tenth.
81. Domitian, the eleventh emperor (but the twelfth Cæsar).
a reign of cruelty.
95. St John banished to Patmos by Domitian; second general persecution.
tribulation is allotted him (Rev. i. 9).
96. The Book of Revelation written by St John.
it expounds the "time of the end" (Rev. i. 1).
- „ Domitian assassinated: Nerva succeeds him.
the twelfth emperor.
98. Trajan, the thirteenth emperor of Rome.
Trajan restores (the empire).
99. Death of John (?), the last of the apostles.
He outlived the other twelve; or, "what is that to thee?" (John xxi. 22.)
100. Third general persecution, under Trajan.
the Christians are wantonly exterminated.

 CHAP. III.—ECCLESIASTICAL HISTORY.

IN dealing with this great subject, our limits compel us to confine our attention to the first five-centuries, or, more accurately speaking, to the period preceding the downfall of the Roman empire. Section 14 enumerates all the principal Christian writers from the last surviving apostle to Gregory the Great; or all those who, by their writings, either adorned and defended the kingdom of God in its infancy, or who, by advocating perverse opinions, sought to corrupt and undermine it. Many of their works are now hopelessly lost, while of those that are extant a great many are weak and puerile in the extreme, especially when compared with the grave and venerable style of the New Testament writers. The gap which, in this respect, sepa-

rates St John from his contemporary, Clement of Rome, is almost immeasurable. Childish as they are, however, these ancient writers have their use; and in our day, when all things are being examined anew, the republication of their principal works cannot fail to lead to exceedingly important results. On this ground we hail with deep satisfaction the resolute, though we fear often ill-remunerated, efforts of Mr T. Clark of this city, who, not content with introducing the reading public of this country to many of the noble scholars of Germany, is now engaged in publishing vigorous and elegant translations of all the principal extant productions of the Ante-Nicene Fathers.

Section 15 enumerates the twenty General or Œcumenical Councils recognised by the Roman Catholic Church. Of these the Greek Church regards only the first eight as binding; the Church of England the first six; while Christians in general bow to the authority of only one Council—not reckoned among the twenty—the Apostolic Council held at Jerusalem, A.D. 48. Section 16 is occupied with an enumeration of the so-called Ten General Persecutions, all of which occurred during the first three centuries, when the Church, unprotected and unbefriended, resolutely and persistently endeavoured to subjugate the world to the dominion of Christ, her King. These were the purest and best days of the kingdom of God, though the impure leaven had already begun to work; and hence heathenism, in its expiring agonies, convulsively endeavoured to destroy its superhuman adversary, which was every hour thinning its ranks. At length, in the providence of God, and in answer to the continued supplications of His people, a Christian emperor ascended the throne of the Cæsars, when immediately the religion of Jesus was tolerated throughout the bounds of the Roman empire. Section 17 records all the other principal events in ecclesiastical history from the death of St John to the age of Constantine, or the first development of the Church under external oppression; while the last section traces the history from Constantine to the fall of the Western empire, or the development of Christianity as the prevailing religion of the state, from A.D. 325 to 476.

SECT. 14.—Early Christian Writers (A. D. 101 – 604).

[NOTE.—*b.* denotes *birth*; *f.* *flourished*; *d.* *death*.]

- A. D.
101. *d.* Death of Clement, Bishop of Rome.
Clement who wrote to the *Corinthians*.
106. *d.* Death of Ignatius, Bishop of Antioch.
a bishop exposed in the *amphitheatre*.
112. *f.* Papias, Bishop of Hierapolis.
companion of the “*beloved disciple*.”
165. *d.* Justin Martyr beheaded at Rome.
a Christian martyr learnèd.
167. *d.* Death of Polycarp, Bishop of Smyrna.
they burn the noble *Polycarp*.
169. *f.* Athenagoras of Athens flourished.
by birth, a native of *Athens*.
170. *f.* Hermias, the Christian philosopher.
criticises the *pagan writers*.
176. *f.* Hegesippus writes his Church History.
begins to *prepare* his *annals*.
177. *d.* Tatian, the Assyrian.
abuses the *Platonic philosophy*.
181. *d.* Theophilus, Bishop of Antioch.
boldly argues for *Christianity*.
185. *b.* Origen, the eminent commentator.
birth of *Origen* of *Alexandria*.
196. *f.* Tertullian, presbyter of Carthage.
became a *violent Montanist*.
202. *d.* Irenæus, Bishop of Lyons.
the first writer in *France*.
218. *d.* Clement of Alexandria.
a devout Christian *rhetorician*.
242. *f.* Gregory Thaumaturgus, Bishop of Neo-Cæsarea.
first sacred edifices.
248. *f.* Dionysius, Bishop of Alexandria.
a few suspect his *orthodoxy*.

A. D.

254. *d.* Death of Origen.
death of the Alexandrian scribe.
258. *d.* Death of Cyprian, Bishop of Carthage.
Africa laments her apostle.
269. *d.* Death of Gregory Thaumaturgus.
funny miracles these !
270. *b.* Eusebius, the Church historian.
the famous presbyter of Cæsarea.
296. *b.* Athanasius, Bishop of Alexandria.
a decisive victory at Nice.
307. Arnobius writes his treatise against the Gentiles.
a great writer against paganism.
314. *b.* Cyril, Bishop of Jerusalem.
great Cyril of Jerusalem.
321. *f.* Lactantius writes his Institutes.
a grand defence of Christianity.
332. *b.* Epiphanius, Bishop of Salamis.
an honest Greek father.
338. *d.* Death of Eusebius.
the great historian of religion.
361. *f.* Chrysostom, Bishop of Constantinople.
the "golden mouthed" bishop.
362. *f.* Gregory, Bishop of Nazianzum.
Gregory of Nazianzum flourished.
368. *d.* Hilary, Bishop of Poitiers.
Hilary menaced the Arians.
371. *f.* Basil the Great, Bishop of Cæsarea.
a great and pious bishop.
372. *f.* Gregory of Nyssa.
Gregory the philosophic divine.
373. *d.* Death of Athanasius.
goes quietly to the grave.
374. *d.* Ephræm the Syrian.
good Ephræm the Syrian.
385. *f.* Jerome translates the Hebrew Scriptures into Latin.
the Hebrew rendered into Latin.

- A. D.
395. *f.* Augustine, Bishop of Hippo.
the hero of *theological literature*.
396. *f.* Rufinus, Presbyter of Aquileia.
the *great Italian monk*.
397. *d.* Death of Ambrose, Archbishop of Milan.
the *great Italian archbishop*.
415. *f.* Cyril, Archbishop of Alexandria.
the *austere bishop of Alexandria*.
461. *d.* Leo the Great claims to be Vicar of Christ.
sets up an impious claim.
518. *f.* Fulgentius, Bishop of Ruspina.
the *learned bishop of Ruspina*.
531. *f.* Procopius of Gaza.
a *learned historian and commentator*.
562. *d.* Cassiodorus, the Italian monk.
the *learned monk of Calabria*.
- „ *f.* Gregory, Bishop of Tours, author of a ‘History of France.’
the *learned prelate of France*.
604. *d.* Gregory the Great, Pope of Rome, dies.
missionaries wander to Kent.

SECT. 15.—The Twenty Œcumenical Councils.

- A. D.
325. Council of Nicæa or Nice—the Arian controversy.
they *agree in defining* the “*Logos*.”
382. First Council of Constantinople — divinity of the Holy Ghost.
the *Holy Ghost reckoned divine*.
431. Council of Ephesus—Pelagianism and Nestorianism condemned.
sailors guard Cyril.
451. Council of Chalcedon—the Eutychnian controversy.
the *separate elements of Christ's (person)*.
553. Second Council of Constantinople.
we learn little here!

- A. D.
680. Third Council of Constantinople.
the *Monothelites* are reckoned wrong.
787. Second Council of Nice.
Popish rites approved of.
869. Fourth Council of Constantinople.
the *Roman emperor* attended it.
1123. First Council of Lateran.
clerical celibacy first agreed on.
1139. Second Council of Lateran.
convoked to condemn heretical tenets.
1179. Third Council of Lateran.
the *Church* claims the power to torture.
1215. Fourth Council of Lateran.
the *council* determines to condemn the *Albigenses*.
1245. Council of Lyons.
condemns Frederick the Second at Lyons.
1274. Second Council of Lyons.
convoked in France by Pope Gregory.
1311. Council of Vienne.
a *council in Gaul* condemns "the beggars."
1409. Council of Pisa : two rival Popes.
the *Church*, scandalised, excommunicates the two.
1414. Council of Constance : John Huss and Jerome of
Prague condemned.
courageous Jerome consigned to the stake.
1431. Council of Basil.
this *Council* seeks to heal the breach.
1512. Fifth Council of Lateran.
claims to limit Christian freedom.
1545. Council of Trent.
Calvinism and Lutheranism judged illegal.

SECT. 16.—The Ten General Persecutions.

A. D.

64. The Christians' First Persecution under Nero.
Nero slays them.

- A. D.
95. The Second Persecution under Domitian.
tribulations allotted them.
104. The Third Persecution under Trajan.
the Christians wantonly exterminated.
119. The Fourth Persecution under Adrian.
their blood calls for vengeance.
197. The Fifth Persecution under Severus.
they are cruelly tortured by persecutors.
235. The Sixth Persecution under Maximinus.
the fury of the heathen let loose.
249. The Seventh Persecution under Decius.
by far their severest trial.
257. Eighth Persecution under Valerian: death of Cyprian.
Africa laments her apostle.
272. The Ninth Persecution under Aurelian.
the edict to persecute is departed from.
302. The Tenth Persecution under Diocletian.
a general extermination decreed.

**SECT. 17.—Principal Events in Ecclesiastical History from the
Death of John to the Age of Constantine.**

- A. D.
101. Death of Clement, Bishop of Rome.
Clement wrote to the Corinthians.
106. Death of Ignatius, Bishop of Antioch.
a bishop exposed in the amphitheatre.
107. Symeon, Bishop of Jerusalem, crucified.
a bishop executed in the persecution.
109. Pliny the younger, Procurator of Bithynia, asks advice from the emperor how he is to deal with the Christians.
the Consul writes to Trajan.
112. Cerinthus, a Gnostic heretic, flourishes.
a contemporary of the "beloved disciple."

A. D.

115. The Lord's Day now generally observed by Christians.
Christians observe the Lord's-Day.
119. Fourth General Persecution under Adrian.
their blood calls for vengeance.
133. Valentine founds a new sect of Gnosticism.
a bold Egyptian Gnostic.
135. Basilides develops Gnosticism more fully.
Basilides, the Gnostic of Alexandria.
136. Adrian builds Ælia Capitolina on the site of Jerusalem.
bestows on it a heathenish name.
141. Marcion completes the first canon of Scripture.
the canon of Scripture completed.
143. The Syrian Gnostics Saturninus, Tatian, Bardesanes,
and Marcion flourish.
a band of Syrian heretics.
144. The Ophites, another sect of Gnostics, appear.
the basis of their system was a "serpent."
147. Justin Martyr writes his First Apology for Christianity.
courageous Justin's apology.
152. The Council of Pergamos, the first on record.
begin to legislate on doctrine.
158. Celsus, Lucian, and Arrian write against Christianity.
Celsus, Lucian, and Arrian.
161. Anicetus, Bishop of Rome, and Polycarp, dispute about
the time of observing Easter.
controversies menace the Church.
166. Montanism and Monarchianism appear in the East.
the beginning of Montanism and Monarchianism.
167. Persecution of the Christians at Smyrna.
they burn the martyr Polycarp.
174. War with the Marcomanni: the Christians pray for
the emperor.
the Christians pray for his success.
176. Hegesippus writes his Church History.
he begins to prepare his annals.
177. Persecution at Lyons and Vienne.
Bishop Pothinus perishes.

- A. D.
185. Birth of Origen, the eminent Commentator.
the celebrated Origen of Alexandria.
189. The Saracens, who now first appear in history, defeat
the Romans.
bands of Arabians vanquish them.
194. The Scriptures translated into Syriac (*Peshito*).
the Bible translated into Syriac.
195. The Scriptures translated into Latin (*Itala*).
the Bible translated into Latin.
196. Tertullian writes his Apology for Christianity.
became a violent Montanist.
- „ Byzantium taken by the Emperor Severus.
Byzantium is taken by the emperor.
197. Fifth General Persecution under Septimius Severus.
they are cruelly tortured by persecutors.
202. Severus issues an Edict prohibiting Christians from
disseminating their doctrines.
an edict to exterminate the faith.
- „ Death of Irenæus, Bishop of Lyons.
the first writer in France.
204. Origen appointed Catechist at Alexandria.
a famous expounder of Scripture.
211. Caracalla becomes Emperor : the persecution ceases.
favour bestowed on the Christians.
215. A council held at Carthage respecting baptism.
an African council legislates.
217. Callistus and Hippolytus, rival bishops at Rome.
a furious contest between popes.
218. Death of Clement of Alexandria.
a devout Christian rhetorician.
- „ Heliogabalus seeks to blend the Christian religion
with heathenism.
a foolish blending of religions.
220. Death of Tertullian.
death of a famous writer.
222. Urban I., Bishop of Rome : Alex. Severus, Emperor.
a fearless defender of the faith.

A. D.

230. Noetus excommunicated at Smyrna.
a famous heretic excommunicated.
- „ Pontianus, Bishop of Rome : the schism of Hippolytus healed.
the faction of Hippolytus extinguished.
235. Sixth general persecution, under Maximinus.
the fury of the heathen let-loose.
240. Hippolytus, Bishop of Portus-Romanus, suffered martyrdom.
doubtful where his see existed.
242. Churches first used by Christians.
the first sacred edifices.
249. Seventh general persecution, under Decius.
by far their severest trial.
251. Schism of Novatian begins at Rome.
dispute about the "lapsed" commences.
254. Death of Origen : accession of Valerian, the 35th emperor.
death of the Alexandrian scribe.
257. Eighth general persecution, under Valerian : martyrdom of Cyprian, and Sixtus II., Bishop of Rome.
Africa laments her apostle.
261. The Sabellian controversy : synod of Alexandria : Dionysius the Great.
he denied the incarnation of Christ.
266. Paul of Samosata, Bishop of Antioch.
defends Monarchianism at Antioch.
270. Birth of Eusebius, Bishop of Cæsarea : Aurelian, emp.
the famous presbyter of Cæsarea.
272. The ninth general persecution, under Aurelian.
the designs of the persecutors frustrated.
274. Mani, or Manichæus, the heretic, put to death in Persia.
the founder of a pernicious sect.
284. Diocletian and Maximian, joint-emperors ; Diocletian takes the East, and Maximian the West : era of Diocletian.
a famous era in the East.

- A. D.
286. The Northmen attack the Roman Empire in the West,
and the Persians in the East.
the frontiers ravaged by invaders.
292. Partition of the Roman Empire into four kingdoms,
under Diocletian, Maximian, Constantius Chlo-
rus, and Galerius.
four temporary divisions.
295. Alexandria taken by Diocletian.
Diocletian takes Alexandria.
302. The tenth persecution, under Diocletian.
a general extermination decreed.
- „ Schism of Meletius of Lycopolis.
an Egyptian excites a disturbance.
305. The Council of Elvira enjoins celibacy on the clergy.
gainsay the written law.
306. Constantine, emp. in the West, Licinius in the East.
they halve the whole empire.
307. Arnobius issues his treatise against the Gentiles.
a great writer against paganism.
311. The Donatist schism.
the great controversy about Cicerilianus.
312. Constantine the Great embraces Christianity.
the history of Christianity is affected by it.
313. Edict of Milan : Constantine grants toleration to the
Christians.
a grand change in their history.
318. The Arian controversy begins : the Emperor becomes
an Arian.
the head of the Church an Arian!
321. Constantine commands the observance of Sunday on
all his subjects.
the holy day to be observed.
324. Constantine becomes sole emperor in East and West.
a great date in sacred (history).
- „ Christianity becomes the religion of the State.
the holy faith established.

SECT. 18.—From Constantine to the Fall of the Western Empire.
(324-476.)

A. D.

325. Council of Nice condemns Arianism.
they agree in defining "the Logos."
330. Constantinople becomes the cap. of the Roman emp.
the government is gone from the West.
336. Death of Arius.
the greatest heretic of antiquity.
337. Death of Constantine the Great.
a great gap produced.
339. The Council of Antioch deposes Athanasius.
the heretics have a triumph.
350. Constantius strictly prohibits heathen sacrifices.
heathenism at last on the wane.
356. Athanasius expelled by force from his see by Constantius.
he gained his laurels at Nice.
359. The Gospels translated into Mæso-Gothic by Bishop Ulphilas.
the Gothic Ulphilas a translator.
361. Julian the Apostate becomes emperor.
a heathen monarch's accession.
371. Pelagius, founder of Pelagianism, born in Britain about this time.
the great Pelagian controversy.
373. Death of Athanasius, Bishop of Alexandria.
a great opponent of heresy.
375. Apollinaristic Controversy.
the heresy of Apollinaris of Laodiceæ.
379. Theodosius the Great becomes emperor: advances Christianity.
heathenism persecuted in turn.
382. First General Council, of Constantinople: Macedonius condemned.
the Holy-Ghost reckoned divine.

- A. D.
385. Jerome translates the Hebrew Scriptures into Latin.
the *Hebrew rendered into Latin.*
387. Valentinian II. embraces Catholicism : great triumph
over Arianism.
the *heresy of Arius put-down.*
391. Ambrose induces the Emperor Theodosius to do pen-
ance for the massacre at Thessalonica.
a *great triumph to the Church.*
392. The temple of Serapis at Alexandria destroyed, and
the final overthrow of Paganism in the East.
the *heathen temples are demolished.*
395. Augustine appointed Bishop of Hippo.
the *hero of theological literature.*
- „ Final division of the empire between the sons of
Theodosius.
a *great event is looming.*
397. Death of Ambrose, Archbishop of Milan.
the *great Italian prelate.*
- „ Theophilus of Alexandria anathematizes Origen, and
denounces the Anthropomorphites.
a *harsh and violent prelate.*
407. Death of Chrysostom, Patriarch of Constantinople.
sinks on the way to Pityus.
410. Rome sacked and burned by Alaric, king of the Visi-
goths.
they *sack the capital of the West.*
411. The Pelagian controversy begins at Carthage.
a *serious controversy commences.*
415. Cyril becomes Bishop of Alexandria.
the *austere bishop of Alexandria.*
428. Nestorius becomes Patriarch of Constantinople : the
Nestorian controversy begins.
serious differences arise.
430. Death of Augustine.
the *saintly Augustine expires.*

A. D.

431. Third General Council, at Ephesus, condemns Pelagian and Nestorian tenets.
sailors guard Cyril.
439. The Vandals overrun Africa, patronise the Arians, and persecute the Orthodox.
savage Genseric the Vandal.
443. The Huns, under Attila, lay waste the Roman Empire, after conquering the Germans.
savage Scythian hordes.
447. Simon Stylites, the hermit of Syria, founder of the sect of the Stylites.
Simon stands on his pillar.
449. The Jutes and Saxons arrive in Britain, and nearly extirpate Christianity.
the Jutes and Saxons in Thanet.
451. Fourth General Council (Chalcedon) condemns the tenets of Eutyches, and ratifies the doctrine of two natures and one person in Christ: Monophysite controversy.
the separate elements of Christ's (person).
461. Leo the Great, Pope of Rome, claims to be vicar of Christ.
sets-up an impious claim.
476. Monophysite doctrine declared the religion of the Eastern Empire.
the State patronises the Monophysites.
- „ Extinction of the Western Empire by the Goths.
the succeeding period is Mediæval.

PART SECOND.—PROFANE HISTORY.

PERIOD I.—ANCIENT HISTORY.

CHAP. I.—HISTORY OF EGYPT.

(B. C. 2550-30.)

[The Author deems himself peculiarly fortunate in those whose co-operation he has secured in preparing the following introduction to his Chronology of Ancient Egypt. The portion bearing on the History of Egypt is from the pen of Mr W. Osburn, R.S.L., the author of many learned works on Egyptology, and who, from having devoted the greater part of his laborious life to the elucidation of the monuments of that country, and to the testimony which they afford to the truthfulness of the books of Moses, now occupies the foremost place among British Egyptologists. The second portion—that bearing on the Great Pyramid—bears the peculiar impress of its esteemed author, further mentioned in the final note. This paper cannot fail to be appreciated by the Christian who, with soundness in the faith and loyalty to the Master, combines a scientific interest in the order and history of the wonderful Cosmos which He has created.]

PART I.—THE HISTORY OF ANCIENT EGYPT.

THE early history of Egypt is older by centuries than that of any other nation with which we are acquainted. The natural and physical causes which account for this lie at the threshold of the inquiry. The situation of Egypt on the surface of the globe is in the driest parallels of latitude all round the earth, and in both hemispheres. To the eastward and westward of Egypt, and for nearly 3000 miles in each direction, it is closely hemmed in by sandy deserts, through which the river Nile forces its way all but due northward and southward. The periodical overflow of this river, consequent upon the tropical rains, has in the course of ages reclaimed from the desert, on each bank, a thin strip of land of extreme fertility, seldom exceeding half a mile in breadth on each side, and nowhere reaching further than eight or ten miles on both sides.

The mountain-ranges which bound this very narrow valley are composed of rocks of limestone, red sandstone, and granite of every variety of tint, offering everywhere to its inhabitants a perfectly inexhaustible treasure of the hardest and most permanent materials for the construction of magnificent buildings.

The inhabitants of Ancient Egypt had evidently considered these advantages when they invented the remarkable system of writing which is so well known by the name of Hieroglyphics, and with engraven inscriptions of which the walls of their public buildings were absolutely covered. Every character of this singular system is the representation of some physical object; and great artistic power is often displayed both in the outline and details of the birds, animals, &c., which so frequently stand for letters, or the symbols of sounds in it; so that these inscriptions, far from being an unsightly defacement, as on the Greek temples, constitute, in effect, a most important part of the ornature of their public buildings.

That the hieroglyphic mode of writing was invented in Egypt by the Egyptians, and with a special view to the perpetuation of the memories and exploits of the kings and nobles by whom their temples, &c., were constructed, we have elsewhere shown at considerable length. Everywhere throughout the land of Egypt, whether we read these singular inscriptions, magnificently executed on the walls and pillars of gorgeous temples, or attempt to decipher the coarse daubs and splashes of colour which cover the rudest mummy-cases, we shall find that the one object of both has been to procure for the writers an eternal remembrance upon the earth. Nothing in Ancient Egypt was too great or too small not to be deemed worthy of these attempts at perpetual memory.

Far from being, therefore, as a Greek inscription on a temple, unsightly, the constructions of Ancient Egypt—whether obelisks, propyla, temples, tombs, mummy-cases, or bandages—were all hewn from the mountain, or made by the labours of slave artificers, or dug in the bowels of the earth, with the especial view of their being covered with coloured hieroglyphics and reliefs representing gods and sacred animals.

There is another point to which we beg to call the attention of the reader. The first colonists of Egypt evidently reached it from the eastward, bringing with them the worship of Adam, the father of mankind, whom they identified with the setting sun—that is, the sun in the twelfth hour of the day. On, or Heliopolis, at the head of the Delta, is exactly the point at which travellers from the East would be most likely to first touch the land of Egypt. It is well worthy of note that everywhere in the tombs and the papyrus inscriptions of Egypt, the west is called the “blessed” west, and the east the “filthy” east; whereas in the books of the Burmahs and other Trans-Gangetic peoples, this order is inverted, the west being with them the “filthy” west, and the east the “blessed” east. That the point whence these two widely separated races began their first emigration lay somewhere between Egypt and India beyond the Ganges is the inevitable, and, as we submit, the highly important, inference which must be drawn from this fact.

There is yet another circumstance which is not without its importance in the elucidation of the Ethnography. Men and women with black complexions are frequently depicted on the tombs and temples of kings of Egypt contemporary with Abraham and his descendants, but they have merely the *swarthy hue* which is inevitable to exposure to the rays of the sun in countries to the southward of Egypt. They have still the straight noses and regular features of the inhabitants of Egypt and of Syria. But seven hundred years afterwards, in the reign of the king “who knew not Joseph,” we see for the first time in the paintings of Ancient Egypt the flat nose and thick lips of the true negro. The period of seven hundred years is just about the time which we might have assumed would be required fully to negrify the European countenance. Surely this fact is not an unimportant one in the science of Ethnography.

We have already dwelt upon the very remarkable fact that the monumental history of Egypt begins with Suphis, the builder of the Great Pyramid, and his contemporaries or immediate predecessors. The names of a few of these predecessors occur occasionally, it is true, in the tombs of the princes that formed the court of Suphis and his nearest successors; but it is

only as the reclaimers of tracts of land which afterwards fell into the hands of those nobles that they are so distinguished ; or, still more rarely, they stand engraven in the genealogical tables, whereby a very few of their descendants justified their titles to be Pharaohs in Egypt. But nowhere in Egypt has any monument been discovered which it is possible to assign to any earlier epoch than that which may now be safely entitled the Suphic Period.

These earliest memorials of Ancient Egypt embody yet another strange peculiarity. When compared in point of execution with those of the later epochs in the long and varied history of that first of kingdoms, they are, in power and freedom of hand, in delicacy of finish, and in truth to nature, equal to the best of them—perhaps even superior. Where, then, did these first colonists acquire their artistic and constructive powers? Not in Egypt, certainly. No trace can be found there of those rude first attempts which so eloquently and instructively tell the history of the arts in all other countries. As masons or builders, the hardest stones the earth produces were quarried and adorned by them in gorgeous pillars and colossal blocks. As artists, their implements sculptured the entire surfaces, exterior and interior, of their constructions with pictures of physical objects, graven as exquisitely as jewels, finished as delicately as cameos. Where, we ask again, are the first crude attempts which long practice at length matured into this perfection of arts so difficult? We answer unhesitatingly, certainly not in Egypt.

Once more : how came these first settlers, who so clearly invented their picture-writing with an especial view to their own artistic proficiency, to have lost the mode of writing they had formerly possessed, and even the articulations of their former language, so that they had to invent a new language, making the pictures of birds, animals, &c., to represent the first intonation of the cries they naturally uttered? There is but one answer possible to these inquiries. The Scripture account of the dispersion of mankind from Babel, through the confusion of their language, is the only known fact in human history that can account for these strange circumstances (Gen. xi.)

The fact that the lists of kings of Egypt, constructed about the third century B.C. by Manetho and other Alexandrian Greeks, are so hopelessly discrepant among themselves that though the summation of the reigns of 30 dynasties amounts to 6000 years, yet their author has himself to tell us that their real sum is only 3555 years—this latter proving, on closer investigation, to be more than 1600 years too many—is surely not to be lost sight of in this inquiry.

The key to this difficulty is not far to seek ; but it opens a dreary page in the annals of fallen man. To record historical truth—the facts that actually took place—formed but an insignificant part of the purpose of these historians. A far more important point in their estimation was to magnify the antiquity of their own country, so as to establish undeniably their assertion that Egypt was the oldest of kingdoms. Accordingly, they preface the human history of Egypt with a deafening trumpet-blast ! When Menes, the first of mortal kings, ascended the throne, Egypt had already been a kingdom, under the sceptre of gods, demi-gods, and heroes, for 24,925 years ! Yet of these 25 millenia not a trace, not a scratch, in the way of monumental memorial, remains ; while the men of the two millenia that followed have absolutely covered Egypt with monuments of masonry and sculpture to an extent unparalleled in any other country. The workmen, moreover, exercised their art with a delicate perfection of finish and freedom of touch rarely equalled, and never surpassed. Now in Egypt, as we have seen, no monument ever perishes from the effects of climate. The necessary inference is, that the people known to us as Egyptians *did not* inhabit the valley of the Nile till the time indicated by the Mosaic record, and that the 24,925 years that, according to Manetho, preceded Menes, is a mere fable. According to Moses, moreover, the age that produced by far the most remarkable of those monuments was one in which the Almighty had frequent and familiar intercourse with man, as in the case of the Patriarchs, Abraham, Melchizedek, and Job ; while the monument itself evinces innumerable evidences of a knowledge and a wisdom to which unaided humanity has nowhere ever attained.

PART II—SOME OF THE PECULIARITIES OF THE GREAT PYRAMID
SYNOPTICALLY CONSIDERED.

IN a compendium of historic and scientific facts, such as the present publication, no apology is needed for noticing that monument which is, strictly speaking, unique—*par excellence*, THE WONDER OF THE WORLD—being at once the most ancient of all in existence, and yet the most intellectually designed, and the highest as well as the most massive that man has ever erected, even by the aid of modern civilisation and wealth: that compendious “sign and wonder set in the land of Egypt unto this day.” There being really in existence such a monument, and one only, replete with facts just such as we covet for this volume,—data of wondrous precision, signalled to us across the dark valley of forty centuries of comparative ignorance, during which it has remained an impenetrable enigma in the face of all the world,—apology would indeed be due *if we were to omit* noticing it. Only a portion of the significant facts of the structure (which we shall term its *references*) can be noticed in this synoptic manner; especially must its internal details, its astronomical references, and that order of symbolism in it that is of a more transcendent kind, be here omitted. Further, this being little more than a catalogue of results, no evidences or explanations can be here attempted, however needful these may be to the reader before he can decide for himself on the validity of the results. See notice of publications, &c., at end of this synopsis.

SECT. 1.—General Construction and Form of the Monument.

Art. 1.—Its Materials :—

A. The Coffin is of hardest and toughest granite, and not intended for a dead body, as in other pyramids.

B. Internal passages and the so-called Queen’s chamber, of white Mokattam limestone, carefully selected, for parts exposed to wear; joints wonderfully close; King’s (or Coffin) chamber of red granite.

C. Internal mass, not of rubbish, like many other massive structures, but of well-cut blocks, cemented; these, and the

foundation rock, are of nummulitic limestone, completely pervaded with fossil tokens of organic life.

D. Externally of white Mokattam limestone, of remarkable finish originally ; it probably surpasses any building material since selected by man : * any exposed surface of it generates spontaneously, by the action of the weather, an efficient mineral protecting coat, of a buff tint : its durability in the open air, even at its finest edges, is incomparably greater than that of granite selected for subsequent pyramids by even the more experienced "wisdom of Egypt."

E. The cement of the fine joints is of astonishing tenacity.

2. *The correctness and discretion shown in its workmanship :*—There is abundant precision, wherever it is important for scientific data, &c., but a utilitarian economy of such workmanship, in proportion as it can be dispensed with, having regard to the meaning of the parts, and the securing of durability ; * while parts not to be metrically reckoned are made ostentatiously rough.

3. *Its metric standard,*

A. For parts cosmically and symbolically significant, is the sacred cubit (25.025 British inches), exactly one ten-millionth of earth's polar radius—the only natural standard of both unique and extreme precision ; a standard of divine origination, primæval, and preserved in the least disturbed line of Abraham's family (the Arabs) to the present day.

B. Other parts of the structure, not significant, are made in terms of quite another unit, of different origin—the earliest Gentile cubit (20.700 British inches), called the cubit of Memphis, popularly confused with the above-named.

C. National standards in general have originated in one or other of these, by various divisions, &c. * Organic objects (as foot, arm, cane, reed), approximating in length, were the usual origin of the national *names* of the later derived standards, but not of the *dimensions* of those later standards.

4. *Its form :—*

A. Its height, 233.1660 (being very approximately *seven-thirds* of a hundred) sacred cubits, equal to $486\frac{1}{2}$ British feet, is the

* The facts marked by asterisks have not been published previously.

radius whose circle, horizontally on the ground, determines the length of its square base-circuit.

B. The resulting slope of the sides, the π angle of the pyramid, is $51^{\circ} 51' 14''.3$.

C. Base area = $\pi \times$ the direct vertical section of the pyramid.†

D. The *Azimuth trenches*, cut in the rock near the east side of the pyramid, show this π angle; also its complement, and the position of the base-circle of the internal core—thus proving that it was made on these principles, and not on less mathematical principles accidentally producing *nearly* that form, as has been suggested in depreciation of its intellectuality.

5. *Allied peculiarities associated with the structural angle, but in a secondary way—that is, pertaining to, practically or approximately, the same form in masonry, though not with theoretical exactitude, as are the preceding :—*

A. The direct angle $51^{\circ} 51' 14''.3$, is 144 pyramid degrees of 1000 to the circle.

* **B.** The diagonal angle is *seven-sixths* of 100 pyramid degrees.

* **C.** The direct rise is 9 vertical to the square root of 50 horizontal.

D. The diagonal rise is 9 vertical to 10 horizontal.

* **E.** The *ratio* of direct to diagonal *angle* is the square of the ratio 10 : 9; while the ratio of direct to diagonal *rise* is, as in any pyramid of whatever slope, the square of 2 : 1.

* **F.** The *difference* of slope between the direct and diagonal aspect of the pyramid, 0.02744 of a circle, cannot be exceeded—that is, any pyramid, either materially steeper or flatter, would show less difference between the two aspects of it.

* **G.** One-tenth of this angular difference in an entire circle represents the day in an entire *tropical year*.

H. The *surface of a side* is found to be (as Herodotus says) *the square of its height*, or radius of construction—*i.e.*, its *total surface* visible equals the square circumscribing its base-circle already explained.

* **I.** Its π angle, approximately, has its *sine* = *co-tangent*, and *tangent* = *co-secant* : this implies some curious facts.

* The facts marked by asterisks have not been published previously.

† St John Vincent Day's discovery.

* **J, K, L.** A length of 144 sacred cubits is found to be indicated by points determined by three different mathematical constructions of lines, measuring horizontally along its face from a mid-section plane.

* **M.** The whole form of the Great Pyramid is the same in every side and angle as a natural crystal; one of the definite forms in which the opaque mineral *wolfenite* is found.

6. *The coffer in the pyramid is similar to it in lineal proportions, exhibiting externally the π ratio of height to the length of two adjacent sides.*†

7. *The cubic ratios of the coffer :—*

A. The volume of the bottom = half that of its four sides.

B. The volume of its entire material, bottom and sides together, is equal to its internal content.

C. Its content or capacity is 71,250 cubic inches, pyramid measure. For the meaning of this quantity, see the cosmic references.—Sec. 3, Art. 7.

D. The content of the chamber where the coffer is, up to a marked level, is *fifty* times the coffer's content.

E. This chamber and its coffer stand on the *fiftieth* course of masonry from the base.

8. *The courses of masonry :—*

A. Level throughout, like horizontal strata; not dipping inwards, square with external face, in the more proper way for security. A special reason is perceptible: * as it is built, every external stone of its now ruined surface shows the original slope, and therefore height or radius of construction and the π ratio of base—the roots, in short, of the structure's references and meaning.

* **B.** Partly for the same important reason, the blocks of the core of the structure were set off, accurately in the long run, to the same slope as the batter of the finished casing was to be.

* **C.** There are indications that the horizontal joints of some important courses divided the direct slope, or measurement up the face, in terms of the sacred cubit as a unit.

9. *Their numbers :—*The 25th course is the level of the so-called

* The facts marked by asterisks have not been published previously.

† St John Vincent Day's discovery.

Queen's chamber ; the 50th course, that of the King's chamber. The 209th course completed the pyramid, and shows the number of pyramid degrees subtended by all the courses, from the axis at the level where the entrance passage intersects the east and west vertical mid-section plane.

* 10. *The vertical axis* is UNINTERCEPTED : all the chambers, passages, &c., are made so as to manifest that they were to avoid interrupting the axis.

11. *The dominant number throughout the pyramid* is FIVE :
 Subordinately, *five* is associated with *ten* :
 Less specially, *three* in connection with *seven* :
 And *nine* with *ten*.

Each have symbolic meanings determining their occurrence and domination.

SECT. 2.—Astro-chronologic references of the Structure.

Art. 1.—A quinary system of facts.—(A) The direction of the straight entrance-passage, inclining at $26^{\circ} 20'$ into the north side of the pyramid, was such, that at (B) the date of its establishment (B.C. 2170) this direction was that of the primæval Polestar α Draconis, when at (C) its lower culmination ; while the then chief star of the Pleiades, Alcyone, then near the celestial equator, was at (D) its upper culmination, or on the same meridian at midnight of (E) the autumnal equinox. This definite combination cannot recur for 25,898 years ; it marked the date of the pyramid and of "the year of the Pleiades"—a commencement of a natural chronologic era, traditions of which have remained in most times and countries. This combination shows much evidence of original intention and unrestricted knowledge in designing the Great Pyramid, especially so when the following facts are remembered :—

2. *Facts of Astronomy.*—Those two stars were eminently suitable :

A. They were more rigorously *fixed stars* than most so called, especially more so than Sirius, so much preferred by the less profound wisdom of subsequent times.

* The facts marked by asterisks have not been published previously.

B. Those two were formerly more brilliant.

* **C.** That primæval and the present or ultimæval pole-star, the *Dracontos-* and *Cynos-ura*, and no others, are remarkably associated together in various mundane aspects: details, however, cannot be here given.

D. Alcyone, a primæval name of the star, means "*the centre*," and has quite recently been discovered to be really the centre around which even our whole Solar System (amongst others) revolves.

E. The meridian of the primæval pole-star passed with maximum rapidity around the zodiac, through *Aquarius* (the Waterman), at the date of the Deluge; it became rigidly stationary on Alcyone at the date of the Great Pyramid, "the year of the Pleiades," after which it commenced to retrograde. These facts, noted by the pyramid, are confirmed and explained by Scripture, by ubiquitous tradition in all ages, and by mythology. * However divergent these witnesses be in other respects, all three agree in connecting the septenary constellation of the Pleiades—especially its leading star Alcyone—with "*halcyon days*," a commencement of a new era in calm and sunshine, in restoration and resurrection-life, out of the waters of death.

3. *Facts in the Pyramid*:—The angles of its other passages, and the direction of mathematical lines between various points in the structure, when considered in detail, confirm the reality and intention of the above-named references in the pyramid.

SECT. 3.—Other Cosmic References in the Structure.

REFERENCE BY MULTIPLE.—1. OF LENGTH.

1. *Solar distance by pyramid height*:— $10^9 \times$ (*i. e.*, a thousand million times) the pyramid radius or height (233.1660 sacred cubits, or $486\frac{1}{4}$ feet British) is the length of the sun's radius-vector, or mean distance of earth = 92,093,000 miles. That this reference was intentional in the design of the structure is evidenced by several other considerations, quite independently of the nume-

* The facts marked by asterisks have not been published previously.

rical coincidence itself. The same is more or less the case in each of the following references.

2. *Earth's mean orbit by pyramid base*:— $10^9 \times$ the pyramid base-circuit, is the length of earth's orbit.

3. *Earth's sidereal day's mean march in orbit, during one true rotation on its axis* (1,580,000 miles), is shown by the length of a suitably directed diagonal at the corner of S.E. part of base-circuit; * also of two other suitably placed lines along the base-circuit, 4 sacred cubits in length, symbolically significant, multiplied by 10^9 .

4. *Earth's polar radius by the pyramid cubit*:— $10^7 \times$ (*i.e.*, ten million times) this cubit (25.025 inches British) is the length of earth's polar radius = 3949.65 miles.

5. *To express important cosmic quantities in general, this cubit seems to be curiously adapted beyond other standards, on whatever principle*.—In terms of this cubit many expressions are either integral or in neat simple ratios, surprising our ideas of probability. This has been already exemplified here, and even the recent discovery of the thermo-dynamic ratio supplies an illustration.—See Art. 10 of this section.

2. OF WEIGHT.

6. *Earth's mass by pyramid's mass*:— $10^{3 \times 5} \times$ (*i.e.*, a thousand billion times) the pyramid's weight, carefully computed, is the mass of the whole earth—namely, six thousand and fifty trillions of tons British. Thence we can deduce the mean specific gravity of the whole earth to be $5.7 \times$ that of water, at pyramid standard temperature.

7. *Weight of a cubic unit* (50 inches pyramid measure in the side, or 25 pyramid inches = 1 cubit each way from its centre) of the mean of the whole earth, is $10 \times$ coffer full of water, at pyramid standard temperature—namely, 2570 pounds British, and constituting the pyramid ton. Weight of 40 cubic cubits of earth (mean density of the whole) is the weight of water in the King's or coffer's chamber, up to the marked level, constituting the pyramid "sea," or largest unit of weight and

* The facts marked by asterisks have not been published previously.

measure. From each of these references we can again deduce the mean specific gravity; and these methods give 5.7, the same as by the former method. This identity of results, by itself, confirms the probable reality of both of these references; but much more so, as it is the same specific gravity as is inferred by the methods of physical science alone, as nearly as their uncertainties enable us to know it therefrom.

3. OF TIME.

8. *A year, or annual circuit of earth*, is represented by the length of the base-circuit of the pyramid—namely, a circle drawn with the pyramid height as its radius. Each sidereal day, or interval of true (not apparent) rotation of earth on its axis, becomes, on this same scale, represented by the 100 pyramid inches; each duration of light and darkness, the great natural binary subdivisions, by the *double cubit* each. The next binary natural subdivisions—the intervals between mid-day or night and sunrise or sunset—by *cubits*; the smallest primæval division—the watch—by the half-cubit or *pyramid foot*.

9. *The period of equinoctial precession*—*i. e.*, of tilting of earth's axis, in a complete circle (at $23^{\circ} 28'$ angle) around the mean position of the ecliptic axis—is represented by the length from base-centre to any base-corner, 258.9824 sacred cubits. Each century, on this same scale, becomes represented by a cubit. In other words, taking all of these diagonals (instead of any one), each year becomes represented by a pyramid inch.

* 10. *The period of tilting of the ecliptic axis*, similarly, in a complete circle (at $1^{\circ} 21'$ angle) around its mean position, is (uncertainly) represented by the length from base-centre to apex, *via* a base-corner, 607.4632 sacred cubits. Each century, on this same scale, becomes represented by a cubit.

4. REFERENCES BY SAMPLE.

11. *The direction of the poles and of the earth's rotation*—*i. e.*, of the lines of longitude and latitude—*i. e.*, of the cardinal points of azimuth—are respectively shown by the sides of the pyramid base.

* The facts marked by asterisks have not been published previously.

* 12. *The mean terraqueous level*—that is, of both land and water throughout the globe—is probably marked by the level of the pavement constituting the base-surface of the Great Pyramid.

This most difficult but important datum is in advance of modern physicists: they have regarded sea level alone in defining a mean level.

13. *Pyramid thermology*.—Its thermic standard, thermic scales, and thermo-dynamic equivalent:—

A. The natural mean, being also the standard temperature (68° Fahr.) of all inhabited parts of the earth,—best for the functions of man, intellectually and corporeally—best for organic life in general—and the *one-fifth* part of the thermic scale of water,—is marked by the (undisturbed) temperature constant in the interior of the Great Pyramid.

B. On the pyramid principles of subdivision, a thermic scale is found harmonising with cosmic nature, as follows:—

Fahrenheit Scale.	Pyramid Scale.	Cosmical Phenomena.
Degrees.	Degrees.	
32.	0.	Water freezes.
39.2	10.	Water at maximum density.
68.	50.	STANDARD TEMPERATURE relative to man and his cosmos.—See A.
104.	100.	High summer temperature at pyramid, and mean isothermal equator.
212.	250.	Water boils.
752.	1000.	Red heat to human eyes. A full exhibition of spontaneous luminosity of solids in general.

C. The thermo-dynamic equivalent.—Water passing vertically through $\frac{2}{3} \times 10^5 \times$ the pyramid cubit, represents one thermic unit of temperature in that water, with the recognised limitation of the ratio to the pyramid or natural standards of both temperature and level. This is exact, so far as the uncertainties of science enable us to test it.

* The facts marked by asterisks have not been published previously.

SECT. 4.—The Standard Measure of the Pyramid, as having originated National Standards.

* Without here detailing the peculiar circumstances, before and about the pyramid date, that suggest that the Gentile cubit was more freely retained in practical use than the sacred cubit by the then scattering and multiplying nations, and only glancing at the empire of Solomon as an event that produced an impression more world-wide, deeper, and more lasting than is commonly realised by modern Western nations, and that the Jewish (*i.e.*, the pyramidally preserved) weights and measures were thereby extensively adopted by the rulers and traders among the nations at that period—just preceding the great renewal of migrations which determined the present races of European countries—we proceed to condense this part of the subject into a few illustrations of the identity of the standards of the pyramid and of primæval times with the long subsequent Jewish and modern standards.

600 years after the pyramid, we find the standards which were divinely recognised through Moses to be the same as those of the pyramid. The sacred cubit was the pyramid cubit; the four homers, and the sacred ark, were each equal to the pyramid coffer-content.

1200 years after the pyramid (*i.e.*, under Solomon), the measures were the same as the foregoing, and the sacred “molten sea,” besides, was of the same capacity as that marked in the pyramid’s chief chamber, or 50 of its coffer measures; and the lavers were each equal to one coffer measure.

3000 and 4000 years after the pyramid—that is to say, in modern times—its standards are still found represented. The Arabian *guz* is the pyramid cubit; and in Western Europe, where peopled by migrations of Goths from the countries north of Palestine, we find that their old national measures (before the well-known modern alterations) were counterparts of the pyramid measures, many of them even undisguised by the processes of division and re-multiplication before mentioned, and quite as accurately preserved as could be expected during migration

* The facts marked by asterisks have not been published previously.

and the lapse of time. Thus, the pyramid *pound* (of 50^3 in the coffer) is 1.003 old German pounds; 1.040 ancient French; 1.073 of Denmark; and 0.973 of Britain. Again, the pyramid *foot* or half-cubit is represented by 0.995 of the Bohemian foot (this has been a generally undisturbed country), and by 1.022 of the ancient French foot. The pyramid *inch* is represented by the British inch, within a thousandth part; hence its remarkable scientific property of earth-commensurability (by a minute and simple correction), far better in this respect, as Sir John Herschel has forcibly demonstrated, than the badly-contrived and mistakenly-defined French metre, which is in these days being urged into the place of the rightful standard—our primæval and inherited *inch* and its multiples, decimal or duodecimal. The pyramid coffer-measure is represented by 1.007 of four *quarters* British. The pyramid *gallon*, *pint*, and *mile*, each being a multiple on the regular pyramid system (*i.e.*, 250 and 2500 in its coffer and cubit), are represented by the old British ale gallon, wine pint, and mile, respectively, to an 80th part.

*** SECT. 5.—Its Chronologic and Ætiologic place.**

Its *date*, relatively with other connected works, and the *causes* of its being built, and of the connected changes in operation amongst the human race at that time (with the allusions to it in Scripture), its corresponding symbols of divine dealings, and its visible and historical opposition to all idolatry,—these considerations, too wide to be given here, show in detail special connections between this structure and others built for the sake of their connected symbolism as well as for utility, and with the same cubit for their unit of measure—*e. g.*, the Ark of Noah, the Tabernacle of Moses, the Temple of Solomon, and the one specified prophetically by Ezekiel.—See above, p. 65, 66.

SECT. 6.—Its Geographic place.

***A.** It is the *centre* of the measured area of *human energies* in the old hemisphere (throughout the period of that monument's presence), by a radius of the significant length of just one-tenth

* The facts marked by asterisks have not been published previously.

of a great circle of the earth : the definition north and south has meanings, indeed, but that of east and west is palpable and impressive. Moreover, this circle northward sweeps exactly to the verge of the habitable earth, as defined in God's covenant with Noah, and previously in the Scriptural account of the preparation of the Cosmos—uninterrupted alternation of day and night throughout each year.

* **B.** That it is on the *circle of terrestrial maxima* in relation to man. That is to say, by its latitude (an idea independently betokened in its structure) it marks the dividing line between the two diverse meteorologic zones of this hemisphere : also the maximum of *air* (*i.e.*, greatest mean barometric height, about 100 sacred cubits more air of surface density than at 30° north or south) : also the maximum length of *land*, 114 equatorial degrees in the old hemisphere, and 137¼ in the whole circle of the pyramid latitude, including the American hemisphere. This length of land is beyond that of every other latitude on the earth. Further, by specific angular measures, east and west of the pyramid, both the maximum of *mountain* range is noted, and the maximum *points* or *debouchements* into or without deltas of the four *rivers* (including the Jordan at the pyramid date, and of the prophetic future), having a *maximum* of importance in connection with the energies of intellectual man, from the Deluge to the end.

The higher ideas which gather up and connect the foregoing apparently diverse facts and references into a harmonious system, with a unity of signification, cannot be usefully subjected to the rigorous compression implied in a synoptic view.

NOTE.—The foregoing synopsis is by W. Petrie, who, in acceding to our request for it, desires us to say that his investigations and results are the consequence of his following the clue supplied by Professor C. Piazzi Smyth, after the latter had brought the light of modern science to bear more fully on the ideas originated by John Taylor of London, recognising the Holy Scriptures as being words from the Creator, irrespectively of human intellect, and yet in perfect harmony with all that is true in modern science.

See 'Life and Work at the Great Pyramid,' 3 vols., with plates.

* The facts marked by asterisks have not been published previously.

Also 'Antiquity of Intellectual Man,' 1 vol., with a diagram, comparing the architectural remains, from the earliest example, onward through each century, in various countries: both by Professor C. Piazza Smyth, F.R.S., &c., Astronomer-Royal for Scotland (Edmonston & Douglas, Edinburgh).

• See also 'Plates and Notes on Structures called Pyramids,' 1 vol. fol., a valuable illustrated work, by St John Vincent Day, C.E., Glasgow (Hamilton & Adams, London).

And 'The Monumental History of Egypt,' by William Osburn. An eminently trustworthy work (Trübner & Co., London).

Of the true method of interpretation of that unique monument—given in the three first named of these works, and here condensed—the germ, so speedily fruitful, was found in a work entitled 'The Great Pyramid, Why was it Built, and Who Built it?' 1860 (second edition, 1864), by JOHN TAYLOR, London.

2534. Babylon founded by Nimrod.
a famous lawless hunter established it.
2500. China colonised: the Hia dynasty begins B.C. 2200.
a family learns the way to "Cathay."
2481. On, or Heliopolis, the first city in Egypt, built by the colonists, and dedicated to the setting sun.
the first settlers erect their capital.
2473. Hebron, the first city in Palestine, erected by the Canaanites.
the first settlement in Palestine was Hebron.

* In Sections 1, 2, 3, we follow the chronology of the monuments, as deduced by Mr W. Osburn in his elaborate 'Monumental History of Egypt.'

B. C.

2467. Zoan or Tanis, Bubastis, and Mendes erected in the eastern delta, seven years after Hebron.
its *first king* was a *native of Zoan*.
2460. The worship of Adam, Noah, Ham, and Mizraim established in Egypt about this time.
their *first superstition, ancestral worship*.
2458. The Median, or first human dynasty of Berosus, begins in Chaldæa.
a *dynasty of Scythians in league with Aryans*.
2429. Menes crosses the Nile, defeats the Phutim, builds Memphis, and establishes the first dynasty of kings.
founding of the kingdom by a dynasty of Tanites.
2421. Second dynasty (contemporary with the first) begins at Sebennytus, in the eastern delta : Bochus the first king.
founded Sebennytus, a famous city.
2403. Thoth or Athotes, one of the early settlers, invents hieroglyphics at Heliopolis.*
the *first system of writing was hieroglyphic*.
2401. Cechous (second king of second dynasty) introduces animal worship.
the *first to establish the worship of bulls*.
2397. Psemempses (fifth king of first dynasty) begins to assume the title of Pharaoh.
the *first to hold the title of Pharaoh*.
2329. Aches founds the third dynasty at Memphis.
his *fame is handed down by tradition*.
2236. Scephuris (eighth king of third dynasty) unites the rival crowns of Egypt, and establishes the worship of Apis.
famed as the founder of Egyptian unity.
2228. Soris begins the fourth dynasty at Memphis.
famed as the first deified ruler.
- „ Usercheres I. builds Abydos, and founds there the fifth dynasty (contemporary with the fourth).
the *founder of the fifth dynasty a rebel*.

* Here he erected numerous obelisks, one of which was Cleopatra's Needle (p. 320).

B. C.

2170. Suphis (Cheops), aided by Philites, a shepherd-prince, builds the Great Pyramid at Jeezeh. its *founder characterised by profound wisdom.*
2147. Sefhres, or Chephrenes (third king of fifth dynasty), builds the second pyramid, and fabricates the Sphynx. *the famous builder of the second pyramid.*
2130. Mencheres,* son of Sefhres, attempts to collect the scattered limbs of Osiris (Mizraim), and to establish the worship of Osiris over all Egypt: a great religious war ensues, which continues for a century. *the first coloniser of Egypt worshipped.*

* The history of Egypt, on the death of Mencheres, becomes involved and obscure in the highest degree. During the fierce and long-continued civil war which his religious reforms gave rise to, the archives of the kingdom were imperfectly kept; the authoritative temple-lists of the kings presented numerous gaps, which were filled in at an after period without regard to historical accuracy. For the glorification of Egypt, and to make its antiquity appear greater than that of any other kingdom, whole dynasties came to be inserted into these *lacunæ*; hence to the modern historian the confusion at this period is utterly hopeless. It appears, however, that several rival dynasties reigned at the same time in different parts of the land. Thus, the sixth, seventh, and eighth dynasties reigned at Memphis, if they reigned at all; the ninth and tenth certainly reigned at Sebennytus (Heracleopolis), in Lower Egypt, at the very time that the eleventh and twelfth governed Upper Egypt. The monarchs of both Egypts were the lineal descendants of Menes, the first king, but were at deadly variance with each other. The kings of Heracleopolis determined to preserve the ancient religion uncorrupted, while the Theban monarchs, with equal determination, sought to make all Egypt adhere to the reforms of Mencheres. The Sebennyte Pharaohs were generally the losers, until at last (near the end of the tenth dynasty) they were hemmed in on all sides, and confined to one solitary province. In this crisis of their fortunes they sought to enter into alliances with the Canaanitish and Phœnician princes, whose territories lay on their north-eastern frontier. Othoes, for example, the last king of the *tenth* dynasty, was the father of Saites or Salates, the founder of the *sixteenth* dynasty. Saites gave his daughter in marriage to Mœris, who appears to have been one of

B. C.

2107. Senucheres, first king of eleventh dynasty, succeeds Mencheres at Abydos, and founds Coptos.
the founder of Coptos, west of the Nile.
2059. Menthesuphis (second king of eleventh dynasty) founds Thebes, in Upper Egypt.
its fame excelled all other (cities).
2003. Achthoes (sixth king of eleventh dynasty) founds Eilethja and Crocodilopolis.
his famous wars yielded him glory.
2000. The Pelasgi arrive in Greece about this time.
a family wends its way westward.
1984. Abraham visits Egypt, and aids Achthoes in forming a treaty with his rival to terminate the religious war.
a celebrated treaty is ratified in Egypt.
1980. Abraham teaches the King of Egypt the true chronology, after which the inscriptions bear the name of the year and month.
Abraham teaches them to reckon by years.
-

the princes of Canaan. By his aid Saites overcame the Upper Egyptian Pharaoh, Amenemes III. (also known as Amuntomeus), and captured Memphis, one of his capitals. After a brief peace, war again broke out, and Saites, with his son-in-law, took first Abydos, and afterwards Crocodilopolis, from the rival dynasty, whom they ultimately expelled from Thebes and Upper Egypt. Seeing that these victories were obtained by the aid of the nomadic princes of Canaan, Saites and his descendants were for ages afterwards stigmatised as the HYSOS or SHEPHERD KINGS, and every imaginable barbarity attributed to them. The monuments demonstrate, however, that both these representations were foul calumnies. In place of being foreigners and shepherds, they were better entitled to the throne of Egypt than their rivals of Upper Egypt; and in place of being barbarians, their names will bear favourable comparison with the wisest and best sovereigns that ever occupied the Egyptian throne. The Christian feels a deeper interest in these so-called Shepherd Kings than in any other Egyptian dynasty, as it was to them that Phiops belonged, the patron of Joseph and the friend of Israel.

B. C.

1965. Amenemes (seventh and last king of eleventh dynasty) captures Memphis, and makes Thebes the capital of Egypt.
a bold attempt to unify the land.
1919. Sesortosis I., son of Amenemes, begins the twelfth dynasty at Thebes.
the building of temples begins at Thebes.
1916. Sesortosis expels the Cushites from Nubia, or reduces them to slavery.
the celebrated tablet of Abydos mentions it.
1877. Amenemes II. succeeds Sesortosis at Thebes.
a celebrated reign of prosperity and peace.
1868. Sesortosis II. succeeds Amenemes.
brief records of an inglorious reign.
1829. Sesortosis III. slain in the hour of victory at Semneh.
a celebrated ruler falls in Ethiopia.
1815. Amenemes III. (Amuntimæus) expelled from Memphis by Saites of Sebennytyus, son of Othoes.
the celebrated ruler who built the labyrinth.

SECT. 2.—From the Shepherd Kings to the Exodus of the Israelites (B.C. 1900-1554).

B. C.

1900. Saites (son of Othoes of the tenth dynasty) begins the sixteenth dynasty at Heliopolis, and wages war with Amuntimæus, of the twelfth dynasty, at Thebes.
his celebrated victories win our admiration.
1887. Saites solicits aid from Mœris, a Phœnician prince.
calls to the rescue an Arvadite prince.
1886. Mœris marries Saites' daughter, and captures Memphis from Amuntimæus.
the courageous Arvadite recovers Memphis.
1884. Syphoas introduces the common letters into Egypt.
characters representing articulate sounds.
1882. Probable date of the death of Abraham and Job.
Abraham receives the reward of his faithfulness.

B. C.

1872. Saites and Mœris seize Abydos in Upper Egypt.
they capture the "*resting place of the dead.*"
1851. Mœris succeeds Saites, captures Crocodilopolis, excavates Lake Mœris, and completes the unfinished labyrinth.
a celebrated reservoir and labyrinth completed by him.
1816. Phiops or Aphophis, son of Mœris, crowned King of Lower Egypt, while Mœris reigns in Upper Egypt.
a celebrated ruler is crowned at Memphis.
1791. Joseph sold as a slave by his brethren.
his brethren persecute the type of Christ.
1778. Joseph becomes Prime Minister of Pharaoh Aphophis.
a captive promoted to princely rule.
1777. The seven years of plenty begin in Egypt, probably owing to the bursting of an immense lake in Ethiopia (Osburn).
corn is produced in prodigious quantities.
1769. Jacob and his family migrate into Egypt in the 54th year of the reign of Aphophis, and 215th after the visit of Abraham.
the covenant people are nourished and trained.
1759. Death of Phiops, the patron of Joseph, ten years after the immigration of the Israelites.
a celebrated prince, liberal and tolerant.
1742. Melaneres, son of Phiops, takes Thebes from the Upper Egyptians, and becomes sole monarch of all Egypt.
a bright epoch in the shepherd dynasty.
1708. Death of Melaneres : Jannes and Asses succeed him as co-regents, the former governing Lower Egypt, and the latter Upper Egypt.
his children quarrel about who is to reign.
1698. Death of Joseph during the regency of Jannes and Asses.
his body embalmed for the time of release.

B. C.

1690. Asses defeated by Amosis, King of Thebes (eighteenth dynasty), and Memphis taken from the Shepherd Kings, who retire to the Delta, and make Succoth their capital: end of the Shepherd dynasty.
capture of Memphis by a Theban warrior.
1674. Amosis having expelled the Shepherd Kings from Memphis, begins the eighteenth dynasty at Thebes.
the bold Amosis pursues the shepherds.
1662. The Shepherd Kings, after losing Memphis, retire to Arvad (the Delta), where they make Xoïs or Succoth their capital, and begin the fourteenth or Xoite dynasty, contemporary with the eighteenth and nineteenth dynasties.
the capture of Memphis a mighty disaster to them.
1659. Armais (eighth king of eighteenth dynasty) defeated by the Phutim, who capture Thebes, and place a mulatto on the throne of Upper Egypt.
black-skinned nations in league against Thebes.
1657. Amenophis (Memnon), son of Armais, marries the daughter of the negro king reigning east of the Nile, and unites the two crowns.
betrothes a negro lady for policy.
1655. Rameses I. expels the negro population east of the Nile, and begins the nineteenth dynasty* at Thebes.
compels the negroes to leave the land.
1646. Sethos I., son of Rameses, aids the Xoite king against the Hittites, Amorites, and Moabites, who have invaded the Delta.
compels the invaders to sue for mercy.

* The honour of founding a new dynasty was frequently conferred on a king who had greatly benefited his country. A new dynasty, therefore, in Ancient Egypt, did not always imply a different *family* from that previously reigning.

B. C.

1644. Sethos succeeds in expelling the invaders, and receives as his reward six cities in the Delta from the Xoite king.
cedes a number of strongholds to Sethos.
- „ Rameses II. (Sesostris), son of Sethos I., succeeds to the throne.
the cruel monarch who knew not Joseph (Exod. i. 21).
1639. Siphtha, the infant Xoite king, espoused to Thouoris, the daughter of Rameses II., it being stipulated that, until the death of Rameses, Siphtha is to govern the Delta as a Viceroy, after which he is to succeed to the throne of Egypt.
claims by marriage the Egyptian throne.
1635. Rameses II. begins to oppress the Israelites, now reduced to slavery.
cities multiply in Egypt by their labours.
1634. Birth of Moses, who is rescued by Queen Thouoris.
birth of Moses, the Hebrew lawgiver.
1629. Amenephtes, a younger brother of Thouoris, ascends the throne of Egypt, in violation of the stipulation above specified, but reigns only five years.
the covenant was made in favour of Thouoris.
1624. Thouoris and Siphtha become joint monarchs in Egypt: being childless, they propose to inaugurate Moses as their successor on the throne, but Moses refuses.
the childless monarch adopts a son.
1614. Thouoris devolves the entire government on her husband, and retires to Thebes, the Upper Egyptian capital, after appointing Sethos II., infant son of Amenephtes, as her successor.
the choice of Moses causes this sorrow.
1604. Siphtha, Regent of all Egypt, rules the land mildly, and treats the Israelites with clemency:

B. C.

Moses resides at Rameses, a Prince of the court of Siphtha.

the clemency and mercy of a Xoite king.

1593. Moses slays an Egyptian taskmaster, and flees for safety to Midian.

courageously levels a taskmaster of Egypt.

1587. Death of Siphtha, and accession of Sethos II. to the throne : he greatly oppresses the Israelites.

cruelty and lust his reigning propensities.

1582. The chronology of the Arundelian Marbles begins.

contain a lengthened record of dates.

1556. Cecrops, an Egyptian, arrives in Attica, and founds Athens.

Cecrops leaves the land of Mizraim.

„ Moses returns from Midian with a message from God to Pharaoh : Pharaoh's heart is hardened.

he comes to the lord of the land with a message.

1554. Exodus of the Israelites from Egypt (430 years after the visit of Abraham), embracing 4,000,000 of people.

the bondmen leave the land of their sojourn.

„ Sethos II., with the flower of the Egyptian army, is drowned in the Red Sea.

the cruel lord of the land is smitten.

1553. The whole of the inhabitants of Lower Egypt, smitten with the terror of the Lord, flee to Nubia and Ethiopia.

the curse of the Lord on the land is heavy.

1552. The inhabitants of Canaan, terrified at the approach of Israel, migrate in multitudes into the deserted Delta, and thus effect a second Shepherd invasion (the invasion of the Solymites): they form the twentieth dynasty.

the Canaanites learn what the Lord has done.

SECT. 3.—From the Exodus to the death of Alexander the Great (B.C. 1554-323).

B. C.

1518. The fifth or Arabian dynasty of Berosus expel the Cushites from Chaldæa.
Chaldæa at last conquered by Arabians.
1516. Amenophis II., a descendant of Sethos II., returns from Ethiopia with a great army, expels the Solymites from the Delta, and founds the twenty-first dynasty.
comes to the land of his cruel ancestors.
1514. Death of Moses in the land of Moab.
buried by the Lord beyond the Jordan.
- „ The Israelites cross the Jordan and enter Canaan.
observe, they were led into Canaan by Joshua.
1490. Death of Joshua : date of oldest papyri extant.
courageous Joshua, a type of Christ.
1453. First celebration of the Olympic Games.
competitors strive at the Olympic Games.
1405. Othniel becomes the first Judge of Israel.
a brave judge wins his laurels.
1396. Era of the first jubilee in Canaan.
blow the gladsome trumpet now.
1387. The Hellenes enter Greece, and expel the Pelasgi.
the brave Hellenes rout the Pelasgi.
1273. Ninus founds the sixth or Assyrian dynasty in Chaldæa.
a Cushite dynasty of princes govern it.
- „ Tyre built by a colony of Sidonians.
the beautiful daughter of “Zidon the Great.”
1250. The Argonautic expedition to Colchis, under Jason.
a band of adventurers leave for the Euxine.
1245. Gideon saves Israel from the yoke of Midian.
a curious dream saves the land.
1194. The Trojan war begins.
a band of confederates for Troy sets out.

B. C.

1137. Birth of Samuel.
a child chosen of God for the priesthood.
1113. Tiglath-pileser I., King of Assyria, invades Egypt.
conquers Babylonia, Cappadocia, and Egypt.
1100. Most ancient Egyptian mummy known to exist (deposited in the Leeds Museum).
the body bituminised exists for ages.
1095. Saul anointed first king of Israel.
they choose a young and tall leader (1 Sam. xi. 11).
1085. Twenty-first dynasty begins in Zoan (Lower Egypt).
considerably extend their rule in the land.
1055. David anointed king in Hebron.
they crown the youth whom the Lord loves.
1014. Solomon marries the daughter of Sheshouk (Shishak).
betroths a wife of coloured skin.
1009. The twenty-second or Syrian dynasty begins at Bubastis.
a bold warrior's exploits in Ethiopia.
980. Jeroboam escapes from Solomon to Shishak.
takes refuge in exile.
971. Shishak captures Jerusalem, and plunders the Temple.
vast plunder is acquired.
942. Zorah the Ethiopian (Osorkhon I.) invades Judah.
the triumph of Asa's faith (2 Chron. xiv. 11).
889. Twenty-third dynasty reigns at Zoan (Tanis).
rulers reigning at Tanis.
853. Carthage founded by a Tyrian colony.
her ruins lie in heaps.
794. Twenty-fourth dynasty begins with Bocchoris at Saïs.
perishes by an Ethiopian king.
786. Egypt establishes her supremacy over the Mediterranean.
proudly rules the Mediterranean.
753. Rome founded by Romulus.
its position learned by augury.
749. Twenty-fifth dynasty begins with Sabaco (Shebek I.)
the "Prince of Kesh" an Ethiopian.

- B. C.
724. Hoshea, King of Israel, asks aid from Shebek II. (So).
petitions for aid from So.
723. Tirhakah, the Ethiopian, succeeds Shebek II.
proffers aid to Hezekiah.
721. The Ten Tribes carried captive into Assyria.
Ephraim departs into captivity (2 Kings xvii. 6).
710. Tirhakah marches agt. Sennacherib, King of Assyria.
Pharaoh is beaten in the war.
709. Sennacherib invades Egypt.
a pestilence wastes his troops.
685. Egypt is divided into twelve kingdoms.
many rulers in the land.
664. Psammeticus establishes twenty-sixth dynasty at Saïs.
united under one sceptre.
631. Psammeticus besieges Ashdod twenty-nine years, and
takes it from the Assyrians.
the monarch of Egypt captures it.
625. Nineveh destroyed : Saracus burns himself to death.
Nineveh destroyed by the allies.
612. Pharaoh Necho, aided by a Phœnician fleet, circum-
navigates the continent of Africa.
Necho circumnavigates Africa.
611. Pharaoh Necho attempts to unite the Red Sea and
Mediterranean.
Necho cuts a canal.
610. Josiah, King of Judah, marches against Necho, who
is on his way to the Euphrates.
at Megiddo he is badly wounded (2 Kings xxiii. 29).
605. Necho defeated by Nebuchadnezzar : Judæa overrun,
and Jerusalem taken.
Nebuchadnezzar wastes the land.
595. Psammeticus II. succeeds his father, Necho.
lays Ethiopia low.
589. Pharaoh-Hophra ascends the throne of Egypt.
elated by a round of triumphs.

B. C.

588. Jewish Captivity : the Temple destroyed.
the Lord's residence in ruins.
586. Nebuchadnezzar overruns Egypt, and takes Thebes.
laid in ruins by Nebuchadnezzar.
581. Pharaoh-Hophra deposed by Nebuchadnezzar.
lost his army at Cyrene.
569. Nebuchadnezzar makes Amasis King of Egypt.
he elevates Amasis to the throne.
554. Solon visits Egypt.
the illustrious legislator at Saïs.
536. Pythagoras visits Egypt.
learns the Egyptian mysteries.
535. Cyrus the elder makes Egypt tributary to the Persians.
(Cyrus) the elder governs the land.
525. Cambyses invades Egypt, and establishes the twenty-seventh dynasty.
the land is devastated by his legions.
515. Dedication of the Second Temple.
they loudly bless the Lord.
490. The Persians invade Greece : Battle of Marathon.
a strange event in war.
487. Egypt revolts against Darius Hystaspes.
the kingdom revolts against the Persians.
484. Xerxes speedily represses the revolt.
he suppresses the revolt with ease.
461. Herodotus of Halicarnassus visits Egypt.
stores of knowledge are collected.
458. Inarus revolts against Artaxerxes I.
a successful leader of revolt.
448. The Persians suppress the revolt, and make Egypt a satrapy.
satraps suppress the revolt.
416. Age of the prophet Malachi.
the Scriptures conclude with Malachi.
414. Egypt independent : the twenty-eighth dynasty begins with Amyrtæus.
established his capital at Saïs.

- B.C.
 403. Achoris, of the twenty-ninth dynasty, repulses a Persian attack.
assisted by auxiliaries from Greece.
401. Battle of Cunaxa : death of Cyrus the Younger.
Xenophon joined the "expedition of Cyrus."
387. Nectanebo I. ascends the throne : peace of Antalcidas.
Greece recognises Persian (supremacy).
373. Nectanebo defends the land against the Persians.
the Greeks proved hostile.
362. Tachos, of the thirtieth dynasty, invades Asia, in concert with the Athenians and Lacedemonians.
Greek mercenaries aid him.
353. Artaxerxes Ochus invades Egypt : Nectanebo II. ends the thirtieth dynasty.
Egypt loses her greatness.
332. Alexander the Great conquers Egypt, and builds Alexandria.
the "gem" of the hero's diadem.
323. Death of Alexander at Babylon.
the hero dies in agony.

SECT. 4.—From the Death of Alexander to the Conquest of Egypt by the Romans (B.C. 323-30).

- B.C.
 321. Partition of the empire of Alexander between Ptolemy Soter, Seleucus, Antipater, and Antigonus : Ptolemy receives Egypt.
his generals divide his conquests.
320. Ptolemy takes Jerusalem, and leads 100,000 Jews captive.
the Egyptians force them into exile.
314. Antigonus wrests Palestine, Phœnicia, and Cœle-Syria from Egypt.
Egypt curtailed sadly.
311. Ptolemy recovers Phœnicia and Judæa, and takes many captives.
a host of bondmen captured.

B. C.

301. Battle of Ipsus : Antigonus slain : new division of the empire : Egypt independent.
a great war concluded.
285. Ptolemy Philadelphus succeeds Ptolemy Soter.
a distinguished ruler of the land.
284. The Septuagint translation completed at Alexandria.
first rendering of the Scriptures.
283. Ptolemy founds the Great Library of Alexandria.
the famous repository of Egypt.
280. Manetho, a priest of Heliopolis, writes his history of Egypt.
fragments remain of his work.
274. Ptolemy Philadelphus sends an embassy to Rome.
first premonition of subjection.
264. Rome commences the first Punic War.
fights the mistress of the sea.
247. Ptolemy III. (Euergetes) invades Syria.
defeats Seleucus on the Euphrates.
222. Ptolemy IV. (Philopater) murders his father, and ascends the throne.
detested for diabolical deeds.
217. Ptolemy defeats Antiochus at Raphia, and subjects Palestine.
a famous battle in Palestine.
216. Ptolemy massacres 50,000 Jews at Alexandria.
a frightful carnage at Alexandria.
205. Death of Ptolemy Philopater, and accession of Ptolemy Epiphanes.
his death weakens the land.
203. Egypt concludes an alliance with Rome.
flees to the West for help.
198. Antiochus the Great recovers Syria and Palestine from Egypt.
a conqueror attacks the realm.
196. Date of inscription on the famous Rosetta stone, the key to the Egyptian hieroglyphics.
the celebrated trilingual inscription.

B. C.

181. Ptolemy VI. (Philomeleo) succeeds his father.
Cleopatra is regent in his childhood.
171. Antiochus-Epiphanes invades Egypt.
he captures the principal cities.
169. Antiochus invades Egypt again : Rome interferes.
a band of ambassadors threaten him.
164. Egypt is divided between Philometer and his brother
Physcon.
their contests menace the kingdom.
146. Philometer defeats Alexander Balas : is succeeded by
Ptolemy VII. (Physcon).
the conqueror killed at Antioch.
- „ The third Punic War : Carthage laid in ruins.
the Carthaginian kingdom annihilated.
143. Scipio Africanus visits Egypt, and is received by
Physcon with great pomp.
the celebrated Scipio in Egypt.
131. Physcon divorces Cleopatra, and marries her daughter
by his brother.
his brother's heir is cut off.
129. Physcon flees to Cyprus : murders his sons.
compelled to demit his authority.
128. Physcon defeats the Egyptian army, recovers his
throne, and dies.
a bloody despot reinstated.
- „ Immense swarms of locusts ravage the land, and bring
on a deadly pestilence.
consume the fruits of the earth.
107. Cleopatra compels Ptolemy VIII. (Lathyrus) to re-
turn to Cyprus.
Cleopatra exiles Ptolemy.
82. Revolt in Upper Egypt : Thebes destroyed.
razed to its foundations.
80. Alexander II. (Ptolemy X.) renders Egypt tributary
to Rome.
the way to ruin and extinction.

B. C.

68. Diodorus Siculus, the Greek historian, visits Egypt.
a writer of *immense research*.
58. Alexander expelled : Berenice and Tryphæna reign jointly.
expelled from the *land in revenge*.
55. Alexander restored to the throne.
the exile *lands at Alexandria*.
51. Ptolemy XI. (Auletes) reigns with the famous Cleopatra.
Auletes and Cleopatra.
49. Auletes expels Cleopatra.
expels his *spouse from the throne*.
48. Julius Cæsar aids Cleopatra, and burns Alexandria.
Julius's revenge.
47. Auletes defeated and drowned : Ptolemy XII. and Cleopatra, his sister, reign.
the wicked *king perishes*.
44. Cleopatra poisons her brother : Cæsar is murdered at Rome.
she wickedly *slays the king*.
42. Mark Antony summons Cleopatra to trial for her crime.
her *judge is fascinated by her*.
36. Antony confers Phœnicia, Cyrene, and Cyprus on Cleopatra.
the excited *general's magnanimity!*
35. Cleopatra receives from Antony all Asia, from the Mediterranean to the Indus.
the wanton *general is lavish*.
31. Battle of Actium : total defeat of Antony and Cleopatra by Octavius Cæsar Augustus.
a woeful *humiliation to Cleopatra*.
30. Augustus enters Egypt : Antony commits suicide.
the wretched *general expires*.
- „ Egypt becomes a Roman province.
her *glory is extinguished*.

CHAP. II.—HISTORY OF CHALDÆA, ASSYRIA, AND
BABYLONIA (B.C. 2500-538.)

[Our limits forbid any lengthened observations on the history of the above-named monarchies, while for the general remarks which follow we are largely indebted to Mr Philip Smith's 'Ancient History;' London, Walton and Maberly, 1864.]

It cannot as yet be positively determined whether the Nile or the Euphrates was the earlier seat of civilisation and empire. In all probability, both regions were colonised about the same time, shortly after the confusion of tongues—an event which we have great confidence in placing about B.C. 2500. Our main reason for putting Egypt in advance of Chaldæa is, that the existing monuments of the former are greatly more numerous, more intelligible, and, generally speaking, in a higher state of preservation, than those of the latter. But other considerations, and especially those connected with physical geography, would lead us to assign the priority to Chaldæa. The basin of the Euphrates and Tigris lies greatly nearer the regions first peopled by Noah and his descendants than the valley of the Nile, and nearer also to the scene of the confusion of tongues. By glancing at a physical map of Asia, it will be readily perceived that the two river-basins now mentioned were the only ones practically within reach of the earliest emigrants. The valley of the Kur, in Transcaucasia, is of very limited extent, with its outlets towards the Caspian and the inhospitable plains of Siberia; while the Indus is too remote, and the route thither all but impracticable in the infancy of the new world.

Like the Sahara and the valley of the Nile, the great basin of the Euphrates and Tigris lies within the limits of that mighty rainless zone which encompasses the Old World like a girdle. Its southern extremity being seven degrees north of the Tropic of Cancer, and its length extending to about ten degrees northward, it is most favourably situated in the north temperate zone. The upper or northern half of this immense valley belongs geologically to the Secondary series of rocks, the lower to the Tertiary; but both sections are level and monotonous, and well adapted for the display of those gigantic piles of architec-

ture by which the race of Ham delighted to supply the lack of striking natural features. Though destitute of rocks and minerals, no country except Egypt ever built on a vaster scale—the absence of stones being fully compensated for by the admirable materials supplied everywhere for the manufacture of bricks. For ordinary purposes these were hardened by the fierce, burning sun ; for permanent structures, the kiln made them as durable as granite ; while the numerous springs of bitumen yielded an admirable cement. All ancient writers extol the surprising fertility of this region, which in the time of the Persian empire yielded a full third of the royal revenue. The vine, date-palm, and numerous other fruit-trees abound ; the cereals are plentiful, and here the wheat-plant is indigenous. The main causes of this great fertility are the intense heat of summer and the periodic inundations of its two gigantic rivers.

Such was the country of which we have the earliest records in the Book of Genesis. The two leading facts there recorded regarding it are the erection of a city and tower, and the establishment of a kingdom by Nimrod, the grandson of Ham, and eldest son of Cush, his first-born. “The beginning of his kingdom was Babel, and Erech, and Accad, and Calneh, in the land of Shinar. Out of that land he went forth into Assyria (*margin*) and built Nineveh, and the city Rehoboth, and Calah, and Resen between Nineveh and Calah : the same is a great city” (Gen. x. 10-12). The marginal reading, as we have given it, is doubtless the true one, as it is corroborated by the authentic records of history and by the existing monuments of the country, both of which unite in making Nimrod a Hamitic chief, who laid the foundations of his kingdom by conquering the original Semitic occupants of the country. Nimrod and his warriors, and not the early Semitic inhabitants, must therefore be regarded as the “Chaldæans” of the ancient writers, notwithstanding the close affinity between the later Babylonian tongue and the Hebrew. The original inhabitants of Babylonia, in common with those of Assyria, belonged, no doubt, to the Semitic stock of nations ; but there is ample evidence that, subsequent to the invasion of Nimrod, the language of Babylonia passed through an immense change. The native historian,

Berosus, who wrote at Babylon in the reign of Antiochus II. (B.C. 261-246), and in whose fragments we have remains of records of unknown antiquity, clearly distinguishes the Babylonians from the Assyrians; while the cuneiform inscriptions recently discovered in Lower Mesopotamia, the language of which is clearly Hamitic, and allied to that of the modern Gallas, conclusively settles the question.

The upper half of this great river-basin comprehended Mesopotamia (the region "between the two rivers") in the west, Assyria and Media in the east, and Armenia in the north. The lower half embraced Chaldæa, west of the Tigris, and Elam or Susiana, east of that river. We can only add that this region bears the most marked affinity to the valley of the Nile. Both are situated in the rainless zone of the eastern hemisphere; both are watered by the periodic inundations of mighty rivers, in consequence of which, and the high summer temperature, both were characterised by unrivalled fertility; both were colonised about the same time, and by the same race, in the early dawn of antiquity; both were covered with innumerable monuments of art, of colossal dimensions, at a period long prior to authentic history except the notices supplied by their own inscriptions; both were in possession of the art of writing and of numerous other arts indicative of a very high degree of civilisation, ever since the period of their original colonisation; and, finally, both countries had their histories written by native priests (Berosus and Manetho) who lived about the same time, and whose respective annals, written in Greek, and confessedly made up of fiction and fact, have been handed down to us in scraps and interpolated fragments by Josephus, Eusebius, and other chronographers.

SECT. 5.—The Chaldæan or Old Babylonian Monarchy
(B.C. 2534-1554).

B.C.

2800. The universal deluge, as indicated by the Great Pyramid.

the floods arise, the world expires.

2552. Confusion of tongues, and dispersion of nations.
the families leave the land of their fathers.

B. C.

2534. Babylon founded by Nimrod, a descendant of Ham.
a famous lawless hunter established it.
2458. The Median or first human dynasty of Berossus.
a dynasty of Scythians in league with Aryans.
2429. Menes crosses the Nile, and builds Memphis.
founding of the kingdom by a dynasty of Tanites.
2401. Cechous introduces animal worship into Egypt.
the first to establish the worship of bulls.
2234. Alleged beginning of Chaldæan astronomy (Cates).
first dawn of astronomical science.
2170. Suphis, aided by the advice of Philitis, a Shepherd prince, builds the Great Pyramid at Jeezeh.
its founder characterised by profound wisdom.
2059. Menthesuphis founds Thebes, in Upper Egypt.
its fame excelled all other (cities).
2100. Cuneiform writing in use in Chaldæa.
first commencement of cuneiform writing.
1980. Abraham migrates from Ur of the Chaldees to Canaan, and afterwards to Egypt.
Abraham teaches them to reckon by years.
1976. The Chaldæan or Cushite dynasty of Berossus begins.
Chaldæan tyrants plague the land.
1974. Chedorlaomer reduces Sodom to subjection.
Chedorlaomer vanquishes the pentapolis of Siddim.
1965. Amenemes captures Memphis, and makes Thebes his capital.
a bold attempt to unify the land.
1960. Chedorlaomer's second expedition to Sodom: Lot a captive.
Abraham valiantly marches to the war.
1900. The Shepherd Kings begin to reign at Heliopolis.
their celebrated victories win our admiration.
1897. Destruction of the Cities of the Plain.
brimstone ruins the vile pentapolis.
1882. Death of Abraham.
Abraham receives the reward of his faithfulness.
1851. Mœris, King of Egypt, excavates Lake Mœris.
a celebrated reservoir and labyrinth completed by him.

B. C.

1849. The Temple of Kileh-Shergat, near the Tigris, erected.
a building erected by an Assyrian viceroy.
1816. Phiops, son of Moëris, and patron of Joseph, reigns
in Lower Egypt.
a celebrated ruler crowned at Memphis.
1791. Joseph carried captive into Egypt.
his brethren persecute the type of Christ.
1769. Jacob and his family migrate into Egypt.
the covenant people are nourished and trained.
1698. Death of Joseph in Egypt.
his body embalmed against the time of release.
1674. Amosis expels the Shepherd Kings from Memphis.
the bold Amosis pursues the shepherds.
1634. Birth of Moses.
birth of Moses the Hebrew lawgiver.
1593. Moses slays an Egyptian, and flees to Midian.
courageously levels a taskmaster of Egypt.
1582. The chronology of the Arundelian Marbles begins.
contain a lengthened record of dates.
1556. Cecrops, an Egyptian, builds Athens.
Cecrops leaves the land of Mizraim.
1518. The fifth or Arabian dynasty of Berosus commences.
Chaldæa at last is conquered by Arabs.
1554. Exodus of the Israelites from Egypt.
the bondmen leave the land of their sojourn.

SECT. 6.—The Assyrian Monarchy (B.C. 1273-625).

1273. The sixth or Assyrian dynasty begins with Ninus.
a Cushite dynasty of princes governs it.
1184. The fall of Troy.
brave Achilles razes Ilium.
1155. Birth of Samson.
a child is born to liberate the land (Judges xiii. 24).
1113. Tiglath-pileser I. begins to reign, according to the
cylinder of Kileh-Shergat.
conquers Babylonia, Cappadocia, and Egypt.

B.C.

1109. Merodach-adan-akhi, King of Babylonia, invades Assyria.
a Babylonian conqueror wastes his territory.
1100. The Chow dynasty in China founded.
begins the Chow dynasty in China.
1046. Asshur-bani-pal, the last powerful king of Assyria.*
closes a whole series of emperors.
1004. Dedication of Solomon's Temple.
accept our willing work, Jehovah ! (1 Kings viii. 22.)
975. Death of Solomon, and dismemberment of the empire.
the tribes petition for liberty (1 Kings xii. 4).
892. Sardanapalus I. (Asshur-dani-pal) builds magnificent palaces.
works of art of vast dimensions (Ph. Smith).
876. Shalmanubar (Shalmaneser I.) succeeds Sardanapalus.
erects a pillar with an inscription (Ph. Smith).
864. Shalmanubar defeats Benhadad II. in three battles.
routs the monarch of Syria (Ph. Smith).
859. Shalmanubar defeats Hazael, and subdues Syria.
renders his land tributary (Ph. Smith).
851. Death of Shalmanubar, and accession of Shamas-Iva.
his exploits are recorded on a large obelisk (Ph. Smith).
831. Iva-lush III., with Semiramis, reign about this time.
the records of their age are obscure (Ph. Smith).
826. Jonah the prophet sent to threaten Nineveh.
ruin is doomed to Nineveh (Jonah i. 2).
771. Pul invades Israel under Menahem.
pays to Pul a contribution (2 Kings xv. 19).
753. Building of Rome by Romulus.
its place was learned by augury.
747. Tiglath-pileser II. establishes the seventh or Lower Assyrian dynasty.
Pileser the Second is prince (Ph. Smith).
- „ Nabonassar ascends the throne of Babylon: "Era of Nabonassar."
a primitive astronomical epoch.

* The Assyrian canon commences, according to Rawlinson, B.C. 904.

B. C.

741. Ahaz, King of Judah, asks aid from Tiglath against Syria.
propitiates the Assyrian with a bribe (2 Kings xvi. 7).
740. Tiglath slays Resin, King of Syria, invades Gilead, and carries the inhabitants into captivity.
part of the Israelites are exiled (2 Kings xvi. 7).
729. Shalmaneser II. succeeds Tiglath-pileser.
this prince follows Tiglath.
724. Shalmaneser invades Israel and besieges Samaria.
a prolonged defence at Samaria.
721. Shalmaneser carries Israel into captivity.
Ephraim departs into captivity (2 Kings xvii. 6).
721. Sennacherib (Sargon* of the monuments) succeeds Shalmaneser, his father.
Ephraim's deportation is claimed by him (Ph. Smith).
719. Sennacherib marches against Babylon, and sets Merodach-Baladan on the throne.
appoints Baladan to the throne.
715. Sennacherib defeats the Philistines in the great battle at Rephia.
the Philistine cities are levelled.
714. Sennacherib takes Tyre, Ashdod, and Cyprus.
places Cyprus in subjection.
713. Sennacherib invades Judah under Hezekiah, but returns unsuccessful to Nineveh.
he places his confidence in God (Is. xxxvii. 20).

* In modern times Sargon is usually regarded as a usurper who ascended the Assyrian throne during Shalmaneser's absence in Syria and Gilead, and erased his predecessor's name from the monuments, substituting his own name in its place. Others, with more propriety, regard Sargon as merely another name for either Shalmaneser or his son Sennacherib. Others still think Sargon must have reigned for a very short period between Shalmaneser and Sennacherib; but for such a reign there is clearly no room in the history. The only possible solution that we can see is to regard Sargon as identical with Sennacherib. In favour of this hypothesis is the fact that, according to Isaiah xxi. 1, *Tartan* is Sargon's General, while by 2 Kings xviii. 17, he is Sennacherib's General. Whoever he was, he reigned nineteen years, according to the monuments.

B. C.

713. Transparent glass manufactured in Assyria.
pottery and bottles of glass (Ph. Smith).
712. Merodach-Baladan, King of Babylon, sends messengers to Hezekiah.
a prophecy of the coming departure (2 Kings xx. 13).
710. Rabshakeh sent by Sennacherib against Jerusalem.
pronounces blasphemous words (2 Kings xviii. 35).
- „ Tirhakah, King of Egypt, marches to Lachish against Sennacherib.
Pharaoh is beaten in the war (2 Kings xix. 8).
709. Sennacherib carries away 200,000 Jewish captives.
a part is exiled to the Tigris.
702. Sennacherib subdues Babylonia, removes Merodach-Baladan, and sets up Belibus as Viceroy.
its Prince is wantonly dethroned.
699. Merodach endeavours, with the aid of the King of Susiana, to recover the throne, but is defeated.
Merodach's attempts are in vain.
680. Sennacherib murdered by two of his sons : his other son, Esarhaddon, becomes king of Assyria and Babylonia.
the mighty ruler executed (2 Kings xix. 37).
677. Esarhaddon (Asnapper of Scripture, and the Asshurakh-iddina of the inscriptions) transports heathen colonists into Samaria, and carries Manasseh, King of Judah, to Babylon.
Medes and Persians in Ephraim (Ezra iv. 2).
667. Death of Esarhaddon, and accession of Sammagher to the throne of Assyria.
his name is mentioned in Ezra (Ezra iv. 2).
660. Sardanapulus II. (Asshur-bani-pal) becomes King of Assyria.
the might of the empire on the wane.
640. Asshur-emit-ili (Saracus ?) succeeds Sardanapulus.
the empire of Assyria expiring.
632. Assyria invaded by the Scythians
invaded by hordes of barbarians.

B. C.

627. Nabopolassar (Saracus's General), Cyaxares the Mede, and Belesys the Babylonian, besiege Nineveh. *Nineveh's doom was predicted (Nahum iii. 7).*

625. Nineveh destroyed: Saracus burns himself to death. *Nineveh destroyed by the allies.*

SECT. 7.—Later Babylonian Empire (B.C. 625-538).

B. C.

625. Nabopolassar begins the eighth or Chaldæan dynasty, at Babylon.

Nabopolassar founds a line (of kings).

610. Pharaoh Necho garrisons Carchemish on the Euphrates: Josiah, King of Judah, mortally wounded at Megiddo.

at Megiddo he is badly wounded (2 Kings xxiii. 29).

606. Nebuchadnezzar, joint king with his father, Nabopolassar, defeats Pharaoh Necho, and takes Jerusalem: beginning of 70 years' captivity: first deportation—Daniel, &c.

Nebuchadnezzar wastes the nation.

603. Nebuchadnezzar's dream of the golden image, interpreted by Daniel.

an image of extraordinary height (Dan. ii. 1).

„ Jehoiakim rebels against the King of Babylon.

another exodus at hand.

599. Coniah, son of Jehoiakim, carried captive to Babylon: also Ezekiel and ten thousand other captives, who are set down as a colony on the river Chebar.

they lead the vassal in triumph.

„ Nebuchadnezzar and Cyaxeres commence the siege of Tyre, which last twelve years.

lays a trench around Tyre.

594. Ezekiel begins his prophecy among the Jewish colonists on the river Chebar.

lived among the transported Jews.

B. C.

588. Jerusalem taken and destroyed : third and last deportation : the Temple burned.
the Lord's residence in ruins.
586. Tyre taken by Nebuchadnezzar, after a siege of thirteen years : Egypt overrun by the Babylonians.
laid in ruins by Nebuchadnezzar.
581. Pharaoh-Hophra deposed by Nebuchadnezzar.
lost his army at Cyrene.
580. Nebuchadnezzar sets up the golden image : Shadrach, Meshech, and Abednego cast into a furnace.
the Lord rescues his witnesses (Dan. iii. 21).
568. Nebuchadnezzar becomes insane, and is driven from his kingdom.
learns that the Most-High ruleth (Dan. iv. 33).
562. Evil-Merodach succeeds his father : Coniah liberated from prison.
he liberates the monarch from durance.
560. Coniah, last Jewish monarch, dies at Babylon.
their last monarch expires.
559. Evil-Merodach slain by Neriglissar, who succeeds him.
lost his life by violence.
- „ Cyrus the Elder, grandson of Astyages, last king of Media, founds the Medo-Persian empire.
lead thy legions to victory ! (Is. xlv. 28.)
555. Daniel's dream of the four beasts.
lo! a lion and a leopard (Dan. vii. 3).
- „ Labynetus, or Nabonidas, comes to the throne.
Labynetus lived long.
541. Belshazzar becomes joint king with Labynetus.
its last king is Belshazzar.
538. Babylon destroyed by Cyrus and Darius : Belshazzar's dream.
the Lord of heaven's revenge (Dan. v. 23).

CHAP. III.—HISTORY OF THE MEDO-PERSIAN EMPIRE

(B.C. 880-330).

SECT. 8.—The Median Kingdom from its Origin to the Fall of
Babylon (B.C. 880-538).

B. C.

880. The Medes, an Aryan or Japhetic nation, from beyond the Indus, arrive in Elam.
the Aryans arrive in the west.
841. Arbaces, their first king, builds Ecbatana (Achmetha).
Arbaces is king at Ecbatana.
776. Media becomes a province of Assyria, under Pul.
Pul is prince at Nineveh.
721. Sargon overruns the country, and peoples it with Israelitish captives.
Ephraim deported to the Caspian.
711. Revolt of Media from Assyria : Media a republic.
their powerful capital is Ecbatana.
709. The Medes elect Deioces to be their king.
a peasant exalted to the throne.
657. Phraortes succeeds his father, Deioces.
the Medes elect Phraortes.
634. Cyaxares, the first powerful King of Media, succeeds Phraortes : the Scythians invade Media.
Media a great kingdom.
625. Cyaxares aids Nabopolassar in taking Nineveh.
Nineveh destroyed by the allies.
624. After the fall of Nineveh, Upper Mesopotamia is added to Media.
Mesopotamia is added to the kingdom.
610. Cyaxares at war with Alyattes, King of Lydia : Battle of Halys.*
an omen concludes the war.

* The date of the battle of Halys cannot be accurately determined, even though we are informed that it was suspended by a total eclipse of the

B.C.

593. Astyages succeeds Cyaxares, and forms a league with
Babylonia and Lydia.
a league of three great monarchies.
588. The Jews carried captive to Babylon.
alas for the erring race !
559. Cyrus the Elder, son of Cambyses, dethrones Astyages
and founds the Medo-Persian empire.
lead thy legions to victory (Is. xlv. 28).
546. Cyrus takes Sardis, and overthrows the Lydian
monarchy.
the Lydian kingdom annihilated.
538. Cyrus and "Darius the Mede" take Babylon, and
slay Belshazzar.
the Lord of heaven's revenge !

**SECT. 9.—From the Destruction of Babylon to Alexander the
Great (B.C. 538-330).**

B.C.

536. Cyrus becomes master of all Asia.
the lord of a great empire.
- „ Cyrus issues a decree for the return of the Jews.
liberate the holy nation ! (Ezek. i. 2.)
535. Cyrus makes Egypt tributary to Persia.
(Cyrus) the elder governs their land.
529. Cambyses succeeds his father, Cyrus.
the Lacedemonians defeated by the tyrant.
525. Cambyses invades Egypt, and sets up the twenty-
seventh dynasty there.
the land is devastated by his legions.
522. Cambyses accidentally killed : Smerdis the Magian
usurps the throne.
the land is freed of a despot.

sun. Astronomers vary in their calculations between B.C. 625 and 583. As the result of calculations based on the newest tables, Ideler, the German chronologer, insists on 30th Sept. 610 B.C. ; but Professors Airy and Hind lean to B.C. 585.

B. C.

521. Smerdis slain by conspirators : Darius Hystaspes
(Ahasuerus) succeeds him.
his life is finished by conspirators.
517. Ahasuerus divorces Vashti, and marries Esther.
a lovely captive is preferred (Est. ii. 17).
515. Dedication of the Second Temple at Jerusalem.
they loudly bless the Lord (Ézek. vi. 16).
510. Haman, the enemy of the Jews, slain by Ahasuerus.
allured to a banquet of wine.
- „ Macedonia and Thrace become tributary to Persia.
Olynthus and Byzantium under the yoke.
500. Revolt of Miletus against the Persians.
a league among wily exiles.
495. Artaphernes defeats the Ionian fleet at Ladé.
the Samians treacherously leave them.
494. Miletus retaken by the Persians : the revolt put down.
shocking atrocities submitted to.
492. First Persian invasion of Greece.
they send a vast fleet.
490. Second Persian invasion : Battle of Marathon.
a strange event in war.
487. Egypt revolts against Darius Hystaspes.
the kingdom revolts against the Persians.
485. Xerxes I. succeeds Darius Hystaspes, his father.
Xerxes succeeds as ruler of the land.
484. Xerxes suppresses the revolt of the Egyptians.
suppresses the revolt with ease.
480. Third Persian invasion of Greece by Xerxes.
a splendid array for the war.
- „ Battles of Thermopylæ and Salamis : the Persian
army destroyed.
Salamis ruins his expectations.
479. Battles of Platæa and Mycalé : the Persians defeated.
the Spartans at Plataea are victorious.

B.C.

466. The Persians defeated at the Eurymedon : Ionia again independent.
a splendid naval engagement.
465. Xerxes assassinated : Artaxerxes becomes king.
known by the name of Longimanus.
458. Egypt, under Inarus, revolts against Persia.
a successful leader of revolt.
457. Ezra returns from Babylon with a company of Jews.
a scribe leads back a part (Ezek. viii. 1).
448. The revolt suppressed : Egypt made a Persian satrapy.
satraps suppress the revolt.
444. Nehemiah sent by Artaxerxes to Judea as Governor.
sent by the king to Jerusalem (Neh. ii. 5).
434. Nehemiah's second journey from Babylon to Jerusalem.
the Jew is grieved at the sacrilege (Neh. xiii. 6).
424. Darius Nothus succeeds Artaxerxes.
his son Darius succeeds him.
414. Amyrtæus, King of Egypt, throws off the Persian yoke.
established his capital at Saïs.
405. Artaxerxes-Mnemon succeeds Darius Nothus.
satraps at war with their lord.
401. Cyrus the Younger attempts to seize the throne :
Battle of Cunaxa and death of Cyrus.
Xenophon joined the "expedition of Cyrus."
396. Agesilaus, King of Sparta, invades Persia.
Agesilaus outwits his antagonist.
394. The Persians victorious at Haliartus, Cnidus, Corinth,
and Coronæa.
Haliartus turns the scale.
387. Peace of Antalcidas : the Greek colonies ceded to
Persia.
Greece recognises Persian (supremacy).
359. Artaxerxes-Ochus succeeds Mnemon.
a gross and lawless tyrant.
356. Birth of Alexander the Great.
the great leviathan of antiquity

B. C.

353. Persia subdues Egypt : the thirty-first dynasty.
Egypt loses her greatness.
338. Ochus poisoned by Bagoas : Arses succeeds him.
his guilt gains its reward.
336. Arses is slain : Darius Codomannus succeeds.
the government in the hands of a eunuch.
334. Alexander the Great invades Persia : Battle of the
Granicus,
the Granicus hinders his journey.
333. Battle of Issus : defeat of the Persians.
what heaps of gold and gems !
331. Battle of Arbela or Gaugamela.
great havoc and carnage.
- „ Alexander captures Babylon, Susa, and Persepolis.
the hoarded gold is captured.
330. Death of Darius : the Persian empire annihilated.
the great hero extinguished it.
263. Berosus, a priest of Belus, at Babylon, writes the
History of Babylonia.
a famous native historian.

 CHAP. IV.—HISTORY OF GREECE.

(B. C. 2000-146.)

THE origin of the Greeks and Latins, in common with that of the Celts, Goths, and Slaves, is lost in the darkness of the pre-historic period. Modern ethnographic science, however, leaves little doubt that the two nations referred to were, respectively, the earliest inhabitants of Greece and Italy ; that they stood to each other in the closest affinity, both of them being the immediate descendants of the Pelasgi, who formed the first great wave

of population that broke on the shores of south-eastern Europe, and that permanently covered Asia Minor, Thrace, Macedonia, Greece, and Italy. This migration probably took place about B.C. 2000, but was succeeded by numerous similar migrations of the same stock of nations (including the Hellenes, who were, no doubt, nearly allied to, if not identical with, the Pelasgi), down to B.C. 1350.

In subsequent centuries other great bodies of colonists appear to have entered Europe from other parts of Asia, forming the ancestors of the Celtic, Teutonic, and Slavonic nations; but the Pelasgi formed, from the very first, the great bulk of the population of Italy and Greece.

The part of Asia from which the Pelasgi set out appears to have been Northern India; for the Sanscrit, the ancient and sacred language of India, has a marked and very decided affinity to both Greek and Latin. The Greek, especially, is more closely allied to the Sanscrit than any other European tongue. In some respects, however, the Latin surpasses the Greek in retaining the features of its venerable parent, and it is in no way to be regarded as a descendant, far less a corruption, of the language of Greece. They are *sister tongues*, deriving from their common parent every feature in which they resemble each other, but exhibiting many differences, arising from the different fortunes of each.

In the following sections the author has followed the chronology adopted by Dr William Smith in his admirable School-Histories of Greece, and by Mr Philip Smith, in his able and eloquent 'History of the Ancient World.'

SECT. 10.—Heroic or Mythical Period (B.C. 2000-776).

B. C.

2000. The Pelasgi, from the East, arrive in Greece and Italy.
a family wends its way westward.
1984. Call of Abraham: the Patriarch visits Egypt.
Abraham visits the ruler of Sebennytus.
1900. The Shepherd Kings begin to reign in Lower Egypt,
their celebrated victories win our admiration.

- B. C.
1886. Mœris, a shepherd king, captures Memphis.
a courageous Arvadite reduces Memphis.
1856. Argos, the most ancient city in Greece, founded by
Inachus, a Pelasgian.
colonise Argos, lordly Inachus!
1791. Joseph, sold as a slave, arrives in Egypt.
his brethren persecute the type of Christ.
1769. Jacob and his family migrate to Egypt.
the covenant people are nourished and trained.
1763. Supposed date of the Deluge of Ogyges.
a celebrated epoch in the annals of Greece.
1698. Death of Joseph, Prime-minister of Pharaoh Aphophis.
his body embalmed for the time of release.
1635. Birth of Moses in Lower Egypt.
birth of Moses the Hebrew lawgiver.
1582. The chronology of the Arundelian Marbles begins.
contain a lengthened record of dates.
1556. Athens founded by Cecrops, an Egyptian.
Cecrops leaves the land of Mizraim.
1554. Exodus of the Israelites, and destruction of Sethos
II., with his army.
the cruel lord of the land is smitten.
1551. Cadmus, a Phœnician, builds Thebes, and introduces
the Phœnician alphabet into Greece.
Cadmus learned his letters in Canaan.
1514. Death of Moses : the Israelites enter Canaan.
buried by the Lord beyond the Jordan.
1504. Era of Deucalion's Deluge.
a curious legend of the world's submersion.
1453. First celebration of the Olympic Games.
competitors strive at the Olympic Games.
1387. The HELLENES arrive in Greece, and expel the
Pelasgi, a kindred race.
the brave Hellēnēs rout the Pelasgi.

B. C.

1326. The Isthmian Games instituted near Corinth.
commencement of games of famous name.
1313. Mycenæ founded by Perseus of Argos.
the celebrated Agamemnon was born here.
1300. Pelops, from Asia Minor, arrives in the Peloponnesus.
come to Greece, thou wandering exile !
1273. Tyre built by a colony of Sidonians.
the beautiful daughter of " Zidon the Great."
1250. The Argonautic expedition to Colchis, under Jason.
a band of adventurers leave for the Euxine.
1230. Theseus becomes the tenth king of Attica.
achieved famous and heroic exploits.
1229. First Theban War, or, " The Seven against Thebes."
the celebrated fable of " Ædipus Tyrannus."
1216. Helen married to Menelaus, King of Sparta.
occasioned the first crusade of antiquity.
1198. Helen elopes with Paris, son of Priam, King of Troy.
her abduction causes a terrible revenge.
1194. The Trojan War begins.
a band of confederates for Troy set out.
1184. Troy captured : the Trojan War ends.
brave Achilles razes Ilium.
1181. Æneas, setting out for Italy, arrives in Africa.
a celebrated chief arrives at Carthage (Virgil).
1103. Conquest of the Peloponnesus by the Dorians.
the brave Achæans expelled by the Heraklidae.
1095. Saul becomes first king of Israel.
they choose a young and tall leader.
1045. Death of Codrus, last king of Athens : perpetual
archons succeed him.
Codrus willingly sacrifices his life.
1004. Dedication of the Temple of Solomon.
accept our willing work, Jehovah !
975. Dismemberment of the Israelitish Empire.
ten parts are alienated.

B. C.

853. Carthage founded by a Tyrian colony, 100 years before the foundation of Rome.
her ruins lie in heaps.
850. Supposed age of Homer.
recites his Iliad wandering.
825. Supposed age of Lycurgus, the Spartan legislator.
a renowned framer of laws.
783. Phidon, King of Argos, begins to coin silver in Greece.
Phidon at Argos and Ægina.

SECT. 11.—Earliest Historic Period (B.C. 776-479).

B. C.

the *chief astronomer* of *antiquity*.
- „ Corinth destroyed by Mummius, the Roman general.
Corinth sacked by *Mummius*.
- „ Greece becomes a Roman province, under the name of Achaia.
a *celebrated kingdom* *annihilated*.

CHAP. V.—HISTORY OF ROME.

(B.C. 2000—A.D. 476.)

WITH the exception of Greece, Italy was the first European country that attained to any considerable degree of civilisation. Notwithstanding the patient and laborious researches of modern ethnologists, considerable doubt still attaches to the question of its original inhabitants; though it is generally acknowledged that they belonged to the same great family of nations as the Greeks, both being descendants of the Pelasgi, a people of Northern India, who formed the first great wave of population that broke on the shores of south-eastern Europe, and that permanently covered Asia Minor, Thrace, Macedonia, Greece, and Italy. This migration appears to have commenced as early as about B.C. 2000, and to have been continued at intervals to about B.C. 1350. They must have entered Italy from the north, and have advanced southward, being pushed forward by fresh bodies of immigrants.

According to this view, the first inhabitants of Southern Italy were the most ancient in the peninsula; and these are the people who are known in history as the Siculians, Tyrrhenians, and Pelasgi. Next, in point of antiquity, were the inhabitants of Latium and the other parts of Central Italy, whose languages, though not identical, appear to have been only dialectically different from each other, and closely allied to those of the Siculi or first inhabitants. All these languages ultimately merged in the Latin, one of the most copious and refined of the great Indo-European family of tongues, and the twin-sister of the still nobler Greek.

In the valley of the Po we first find the Etruscans, who had likewise descended from the Alps, but who were subsequently driven forward (by the Gauls or Celts, who took possession of that territory) into the country now known as Tuscany, whose former inhabitants, the Tyrrhenians, they reduced to bondage.

Who the Etruscans were, remains a question of the greatest uncertainty ; for though numerous inscriptions belonging to that people have been found, they remain wholly unintelligible. There are certain indications, however, that their language was a branch of the Indo-European group, and therefore allied, however remotely, to the Celtic, Teutonic, Slavonic, and Greco-Latin families. From the numerous remains of their works of art, there can be no doubt that they had attained to a high civilisation while Rome was still in her infancy. Lastly, in the north-west of Italy (the modern Piedmont) were the Ligurians, whose origin is also uncertain, some writers supposing them to be Celts, others Iberians, and others still, Pelasgi.

Subsequent to the dawn of authentic history, the southern portion of the peninsula was colonised from different parts of Greece, and was in consequence named Magna Græcia ; but the Greek immigrants, in common with all the other nations above enumerated, came in the course of time to lose their original languages, and, in the reign of Augustus, Latin was the spoken language of Italy from the one extremity of the peninsula to the other.

SECT. 17.—Italy from the Earliest Times to the Founding of Rome (B.C. 2000-753).

B. C.

2000. The Pelasgi from the east arrive in Italy and Greece.
a family wends its way westward.
1984. The Patriarch Abraham visits Egypt.
Abraham visits the ruler of Sebennytus.
1900. The Shepherd Kings begin to reign in Egypt.
their celebrated victories win our admiration.
1856. Argos, the most ancient city in Greece, founded.
colonise Argos, lordly Inachus.
1816. Pharaoh Aphophis, patron of Joseph, crowned king.
a celebrated ruler crowned at Memphis.
1791. Joseph arrives in Egypt.
his brethren persecute the type of Christ.

B. C.

1769. Jacob and his family migrate to Egypt.
the covenant people are nourished and trained.
1698. Death of Joseph.
his body embalmed for the time of release.
1635. Birth of Moses.
birth of Moses the Hebrew lawgiver.
1582. The chronology of the Arundelian Marbles commences.
contain a lengthened record of dates.
1556. Athens founded by Cecrops, an Egyptian.
Cecrops leaves the land of Mizraim.

among the captives.
a famous procession in state.
275. Aurelian, on his way to the East, is assassinated.
dies by the perfidy of a lieutenant.
- „ Tacitus, thirty-ninth emperor, defeats the Alani.
defeats the powerful Alani.
276. Probus, fortieth emperor, succeeds Tacitus.
distinguished for the purity of his morals.

A. D.

277. Probus defeats the Sarmatians, Goths, and Germans.
defeat of the Poles by Probus.
278. Probus erects forts from the Danube to the Rhine.
forts protect the realm.
279. Saturninus, governor of the East, proclaimed emperor
at Alexandria.
forced by the popular verdict.
280. Proculus and Bonosus head a revolt in Gaul, but are
defeated.
a formidable revolt extinguished.
281. Probus celebrates a great triumph at Rome.
the due reward of a conqueror.
282. Probus assassinated by his troops at Sirmium.
the fiery rage of "the ditchers."
- „ Carus, forty-first emperor, defeats the Sarmatians.
their formidable army is defeated.
283. Carus marches against Persia, but is killed near Ctesi-
phon : Carinus and Numerian succeed him.
dies in a raging hurricane.
284. Diocletian forty-second emperor : era of Diocletian.
a famous era in the East.
286. Maximian, forty-third emperor, associated with Dio-
cletian : the period of partition begins : Dio-
cletian takes the East, Maximian the West.
they divide the Roman empire.
- „ The Northmen attack the empire in the West, and the
Persians in the East.
the frontiers ravaged by invaders.
287. Carausius, a Roman general, usurps the sovereignty
in Britain.
defies the Roman power.
290. Carausius compels Maximian to acknowledge the inde-
pendence of Britain.
(Britain) free for ten years.
292. Two emperors and two Cæsars (Galerius and Constan-
tine) govern the empire between them.
the former a twofold division.

A. D.

295. Alexandria in Egypt taken by Diocletian.
Diocletian takes Alexandria.
296. Britain recovered to Rome by Constantius.
her freedom vanishes in a moment.
298. Diocletian at war with Persia.
famous victories in Armenia.
302. Tenth general persecution.
a general extermination decreed.
- „ Diocletian and Maximian celebrate the last triumph.
its glory is extinguishing fast.
305. The emperors Diocletian and Maximian resign : Constantius and Galerius succeed as forty-fourth and forty-fifth emperors.
the Augusti are willing to leave.
306. Death of Constantius in Britain : is succeeded by Constantine the Great, forty-sixth emperor.
the great Western emperor.
310. Maximian put to death by Constantine.
the great Constantine executes him.
- „ Galerius dies of a loathsome disease.
Galerius, base and cruel.
312. Constantine defeats Maxentius.
the great Constantine defeats him.
- „ Constantine becomes a convert to Christianity.
a great cross described by him.
313. Edict of Milan : Christianity tolerated everywhere.
a glorious change in its history.

they sack the capital of the West.
- „ Death of Alaric, who is succeeded by Adolphus.
a king concealed in an excavation.
412. Adolphus concludes a treaty with Honorius.
a shameful bargain with Adolphus.
414. Adolphus invades Spain.
shocking barbarities and slaughter.
418. Britain acknowledged to be independent by Rome.
the sovereignty of Britain recognised.

A. D.

418. Kingdom of the Visigoths established on both sides
of the Pyrenees.
kings of a conquering race.
- „ Pharamond founds the kingdom of the Franks in
Gaul.
their *king* is the *celebrated Pharamond*.
423. Death of Honorius : usurpation of Johannes.
Johannes follows Honorius.
425. Valentinian III. proclaimed emperor of the West.
a king five (years) old.
426. Illyricum, Pannonia, and Noricum ceded to the East.
separated finally from the empire.
429. Genseric, King of the Vandals, invades Africa.
king of the ferocious Vandals.
430. Death of Augustine, Bishop of Hippo.
the saintly Augustine expires.
439. Conquest of Africa by the Vandals completed.
the savage Genseric overruns it.
443. The Huns, under Attila, cross the Danube, and lay
waste the Roman empire.
savage Scythian hordes.
449. The Jutes, Angles, and Saxons arrive in Britain.*
the Jutes and Saxons in Thanet.
451. Battle of Chalons-sur-Marne, defeat of Attila, and
death of Theodoric I., King of the Visigoths.
killed while leading his cavalry.
452. Attila invades Italy: foundation of the city of Venice.
situated in a lagoon on the Adriatic.
453. Death of Attila, “the Scourge of God.”
seas of liquid gore.
454. Ætius assassinated by Valentinian III.
assassinates its last saviour.
455. Genseric pillages Rome, but spares the citizens.
saves the lives of the lieges.
457. Kingdom of Kent (first of the Saxon Heptarchy)
founded by a tribe of Jutes under Hengist.
a kingdom of limited proportions.

* The true date of this event was rather A. D. 428.

A. D.

460. Genseric destroys the Roman fleet at Carthage.
the *ships of Majorian exterminated.*
461. Leo the Great claims to be Vicar of Christ.
sets-up an impious claim.
468. Euric the Visigoth drives the Romans out of Spain.
Spain independent of Rome.
475. Romulus Augustulus last Roman emperor.
in the *series of potentates the last.*
476. Rome taken by Odoacer the Goth, and extinction of
the Western empire.
her stupendous power is ended.

PERIOD II.—HISTORY OF THE MIDDLE AGES.

CHAP. VI.—FROM THE FALL OF THE ROMAN EMPIRE
TO THE DISCOVERY OF AMERICA (A. D. 476-1492).

[The substance of this Introduction is mainly derived from the 'General History of the World,' by Charles Von Rotteck, Professor of History in the University of Freiburg. London: Longman & Co. 1842.]

THE wonderful pictures of a twilight age, the lofty figures of Greece and Rome, and the glimmering life-sparks of a declining world, have now finally disappeared; while another race, another theatre, another tone of action and passion, appear in their room. Here, from the dark forests of the north, and there, from the solitudes of the Arabian desert, nations hitherto unknown, or slumbering in dead repose, overflow, like huge ocean billows, the mighty Roman world. The long-decayed foundation shakes, and the structure, now shattered in all its parts, falls with an astounding crash. What the human mind had created in many centuries, what the toil of many generations had nurtured, what lengthened experience had perfected and established—the monuments of the power, genius, and virtue of

the ancient world—were suddenly overwhelmed in ruins. Considering, however, its incurable internal corruption, this fate was unavoidable, and scarcely deserves our regret; for all that was beautiful and great had long since been abandoned, and every germ of a nobler life had now been stifled. The nations of the West, now disgracefully fallen from their ancient virtue and splendour, crawled in the dust, despising freedom as a tale of the past, neither desiring nor expecting anything better than servitude. The race had become so incurably corrupt, that it is impossible to suppose that it could ever elevate itself to its former level. The one solitary element of hope or stability that remained—the preserving salt of pure Christianity—had now lost its savour and its energy, and had become a gross, inert superstition. Heaven could endure the revolting spectacle no longer; for though the forbearance of God is infinite in extent, it is finite in duration. The day of reckoning had come, and a terrible doom was inevitable. As the Antediluvian world was destroyed by a flood of waters, so the mighty empire of Rome was inundated by a destructive flood of barbaric nations, that carried all before them. “The fountains of the great deep were broken up, and the windows of heaven were opened.” Before the close of the fifth century the throne of the Cæsars was prostrated; Odoacer the Goth, and Theodoric the Eastgoth, extended their sceptres over Italy and Rome, both of which had already experienced repeated plundering from the Westgoths, Vandals, and Huns. Barbarian nations had taken possession of all the provinces of the Western empire; the Vandals, of Africa; the Alani, Suevi, and Westgoths, of Spain; the last-mentioned, also of Southern Gaul; the Burgundians, of the countries around the Saône; the Allemanni, of the Upper Rhine; the Franks, of northern and eastern Gaul; the Jutes, Angles, and Saxons, of Britain; the Rugii and Heruli, of Noricum and its environs; the Goths, of the Rhætian and Illyrian countries. The Eastern empire had also to see the greater part of its provinces desolated by the barbarians. The Goths, before proceeding further west, had ravaged the countries of the Danube and the Hæmus, while the Gepidæ had established themselves in Pannonia. After the Goths came the terrible Huns, whose appear-

ance in Europe had been the principal signal of these great movements, and who drove before them, or carried in their train, a concourse of tribes as far as the Po and the Loire ; and the Huns were followed, in turn, by the Bulgari, Avari, Ugri, Chasari, and other savage tribes.

These tumultuary migrations continued in the sixth century, and did not cease in the seventh and eighth. New swarms succeeded, supplanted, and drove away the older, or were driven away by them. The pastoral nations of Asia already enumerated, then the Slavs, variously divided and immensely extended, and afterwards new German tribes, established themselves in the Roman, or in the Old-German and Sarmatian countries. The kingdoms of the Saxons, Frieslanders, Thuringians, and Bavarians arose, or were more accurately defined. The Longobards seized upon Upper Italy ; Wendic and Slavonic, Turkish and Tartar races, wandered about, confusedly mingled together and mutually hostile, in the vast countries between the Black Sea and the Baltic. There is no revolution recorded in the pages of history which has proved so important and imposing, whether in extent, character, or results, as this great NORTHERN MIGRATION OF NATIONS.

But let us glance at that mysterious land, that great nursery of nations, whence sprang the innumerable hordes which have thus, from time to time, desolated the civilised countries, and revolutionised the world. From the Caspian Sea to the Hoang-ho, and from the Altai Mountains to the Himalayas, stretches one unbroken gigantic plateau, named High Asia, the most elevated and immense on the surface of the globe. In ancient times this great table-land was almost wholly unknown, and even at the present day it has been very imperfectly explored ; but some idea of its magnitude may be formed from the fact that here originate nearly all the giant rivers of Asia—the Indus, Ganges, Brahmaputra, Yang-tse-kiang, Hoang-ho, Amour, Lena, Yenisei, and Obi. The natural properties of this rugged and inhospitable region have imperiously determined the character and pursuits of its inhabitants. If we compare the description which Herodotus gives of the ancient Scythians with that of the pastoral nations of the great desert as handed down

by the Chinese annalists, or the testimonies of the Roman and Byzantine writers concerning the great migrations of nations which took place in their own day with the descriptions of European travellers who passed through High Asia in the middle ages, we shall discern the most wonderful uniformity of condition and manners among the numberless nations of this boundless region—a uniformity which remains indelibly stamped on them till the present day. All the roughness which the untamed state of man, living under a northern sky, can produce, is and ever has been the character of the Scythian hordes. Strangers to agriculture, partly from the nature of their country and partly from disinclination, they have ever been restricted for food and raiment to the breeding of cattle and to the chase—occupations incompatible with the luxuries, or even the conveniences, of civilisation. Familiar with want and hardship, accustomed to the slaughter of animals wild and tame, the northern nomad acquires a hardiness of body and mind which harmonises him with his climate. Hunting and travelling are his daily occupations, and, in fact, the sum of his life. Abandoning his whole nature to savage affections, no one is so adapted to violence, or so disposed to war. The possession of the horse, which they manage with marvellous dexterity, greatly increases the formidable character of these warlike hordes, thus carried along from their impregnable fastnesses, with the speed of the wind, to the most distant plains of an unprepared or effeminate enemy. Such were the diverse and multinomial swarms of Scythians, Sarmatians, and Germans which, at the commencement of this era, moved along the frontiers of the Roman empire, like the threatening clouds of a tempest, and by their contemporaneous shock fulfilled the destiny which had long hung over her!

SECT. 24.—From Romulus Augustulus to Charlemagne
(A.D. 476-800).

A.D.

476. Extinction of the Western empire by the Goths.
the succeeding period is mediæval.
- „ Odoacer founds the Gothic kingdom of Italy.
a king in place of an emperor.

A. D.

481. Clovis establishes the kingdom of France.
the judicious reign of Clovis.
486. Clovis defeats the Romans at Soissons.
are severely routed in the north.
489. The Ostrogoths, under Theodoric the Great, seize Italy.
the Ostrogoths rule in Italy.
493. Death of St Patrick, the patron saint of Ireland.
the saint who turned them to God.
496. Clovis routs the Allemanni, and embraces Christianity.
ascribes his victory to the Most-High.
507. Clovis defeats Alaric, King of the Visigoths, at Poitiers.
Alaric expires at Poitiers.
511. Death of Clovis : his kingdom divided among his sons.
leaves his conquests to his children.
514. Arthur, king of the Silures, leads the Britons against the Saxons.
leads them against "Cerdic the Saxon."
525. Time first computed in Italy from A. D. 1 (the Christian era) by Dionysius Exiguus.
the year of our Lord, according to Denys the Little.
534. Belisarius overthrows the Vandals in Africa.
the illustrious general of Justinian.
553. Belisarius and Narses recover Italy from the Ostrogoths.
the labours of illustrious generals.
563. St Columba, from Ireland, founds a monastery at Iona, and converts the Scots to Christianity.
a lonely monastery in the Hebrides.
568. The Lombards seize a great part of Northern Italy.
the Lombards invade the realm.
571. Birth of Mohammed at Mecca.
the lying prophet is born.
582. The Saxon Heptarchy completed in England by the creation of Mercia into a kingdom.*
aliens our realm divide.

* The seven kingdoms forming the Saxon Heptarchy were as follow:—

1. KENT, comprising the present county of Kent, founded 457 by a tribe

A. D.

596. Augustine, with forty monks, arrives in England, to convert the Saxons to Christianity.
a large troop of missionaries.
612. Mohammed publishes the Koran.
the Mohammedan Bible is forged.
622. Era of the Hegira, or the Prophet's flight from Mecca.
Mohammed's famous flight.
632. Death of Mohammed, who is succeeded in the Caliphate by Abubekr, his father-in-law.
Mohammed's greater flight.
634. Syria invaded by the Saracens under Khaled.
the Mohammedans gain Syria.
- „ Omar succeeds Abubekr in the Caliphate at Medina.
Omar the greatest Khalif.
637. Jerusalem taken by the Saracens: Omar builds a mosque on the site of the Temple.
a mosque on the hill of Zion.
640. The Saracens take Alexandria and burn the library.
Omar's savage whim.
644. Othman succeeds Omar in the Caliphate.
Mohammed's secretary succeeds.
655. Ali becomes Caliph of Arabia, and Moawiah, of Egypt.
Mohammed left it to Ali.
672. The Saracens besiege Constantinople ineffectually.
the Mohammedans opposed effectually.
685. The Britons, being totally vanquished by the Saxons, retire into Wales and Cornwall.
the invaders rule the land.

of Jutes under Hengist. 2. SUSSEX, founded 490 by a tribe of Saxons under Ella, and comprising Surrey and Sussex. 3. WESSEX, founded by a tribe of Saxons under Ida in 495, contained Hants, Wilts, Somerset, Dorset, and Devon. 4. ESSEX, founded in 527 by a tribe of Saxons, included our present Essex and Middlesex. 5. EAST ANGLIA (Norfolk, Suffolk, Cambridge), founded in 570 by a tribe of Angles under Uffa. 6. NORTHUMBRIA (Northumberland, Durham, York), founded in 547 by a tribe of Angles under Ida. 7. MERCIA (situated between Wales and the other kingdoms), founded in 582, and formed by different migrations inland of the other settlers.

A. D.

691. Pepin, father of Charles Martel, rules France.
a *mayor* of the *third Clovis*.
697. The Republic of Venice is governed by Doges.
the *merchants* of *Venice* in *power*.
714. The Moors conquer Spain, and terminate the empire
of the Visigoths.
the *proWess* of the *Caliphs* in *Spain*.

the circular shape of the earth is revealed.
1490. Will. Grocyn, first Professor of Greek at Oxford.
classical knowledge is taught at Oxford.
1492. The Moors expelled from Granada.
conquest of the Saracens by valiant Ferdinand.

PERIOD III.—MODERN HISTORY.

CHAP. VII.—FROM THE DISCOVERY OF AMERICA TO THE PEACE OF WESTPHALIA (A.D. 1492-1648).

WE have at length emerged from the darkness of ancient times, have passed the dim twilight of the Middle Ages, and have arrived at the clear sunshine of Modern History. This last and greatest, though at the same time the shortest, period of human history, is mainly distinguished from the two preceding by the following marked characteristics: 1. The theatre of history, the field of action, has, by the discovery of a new world, become suddenly and vastly enlarged, embracing now, for the first time, all parts of the earth's surface, and all the races of our species.

2. The subjects that occupy the historian's attention are greatly multiplied, history being no longer a chronicle of great battles, and the exploits of kings and heroes, but an expounder of the principles that lead to true national greatness, and of the progress of civilisation in all lands. 3. This is pre-eminently the age of *literature, science, and art*, as well as of *inventions* of all kinds, though at first we find all these only in their germs and rude beginnings. 4. It is the period of legislation, administration, and progressive reform in the methods of governing—the period of statistics, politics, and finances, and of *social science* generally. 5. Similarly, it is the period of widespread enlightenment of the masses—of the elevation of those classes of society that were previously trodden down and despised. 6. It is the period of the establishment and maintenance of colonies, and of extensive and world-wide commerce. 7. Finally, it is the period when all things are being tested, sifted, and tried to their foundations; when all that is false in religion, science, and philosophy, is sure to be exposed; and when all that is true and genuine will be allowed to shine in its native colours.

Modern History consists of three great periods: the first extends from the discovery of America, and the great Reformation in Germany (events that were nearly contemporaneous), to the Peace of Westphalia; the second, from that event to the French Revolution; and the third, from the French Revolution to the present time.

The authorities most frequently consulted in this division of our labours have been Rotteck's 'General History of the World;' Russell's 'Modern Europe;' Alison's 'History of Europe;' Macaulay's 'History of England;' Guizot's 'History of Civilisation;' Hallam's 'Literature of Europe;' Haydn's 'Dictionary of Dates;' and the 'Penny Cyclopædia.'

SECT. 31.—From the Discovery of America to the Reformation
(A.D. 1492-1517).

A.D.

1492. Columbus, with three Spanish vessels, sails to St Salvador, and thus discovers a new world.

1647. The "Society of Friends" begins in England.
called by their enemies the sect of the Quakers.

1648. Peace of Westphalia: the present system of European States established.
begin a number of States in Europe.

CHAP. VIII.—FROM THE PEACE OF WESTPHALIA TO
THE FRENCH REVOLUTION (A.D. 1648-1789).

THE period embraced by the last chapter was marked by a multitude of great events, the most celebrated of which were the discovery of a new hemisphere by Columbus, and the rediscovery by Luther of a grand principle in theology of perhaps equal importance. That period terminated with the times of Charles I. of England, when, according to Macaulay, the hazardous game began on which were staked the freedom and destinies of the English people—when the great statesmen of the land resolved to place their present and future kings in such a situation that they must either rule in conformity with the wishes of the nation, or make outrageous attacks on the most sacred principles of the Constitution. After a protracted contest, Charles ratified, in the most solemn manner, that celebrated law known as the "Petition of Right," a law which forms the second great charter of our liberties. By ratifying that law, he bound himself never again to raise money without the consent of Parliament; never again to imprison any person except in the course of law; and never again to subject his people to the jurisdiction of courts-martial. Within three weeks, however, after the signing of this solemn compact, it became evident that Charles had no intention of fulfilling any part of its terms. A violent conflict followed, resulting in the ignominious death of the unhappy monarch, in miseries innumerable to the nation during the reign of his two successors, and finally, in the great Revolution of 1688.

The execution of Charles, or rather the Peace of Westphalia which immediately preceded it, commences the period on which

we are now entering. That celebrated Peace properly marks the advent of a new era, seeing that by it the principle of a "balance of power" in Europe was first recognised, the religious and political rights of the German States established, and the independence of the Swiss Confederation acknowledged by Germany. It was signed at Münster, in Westphalia, October 24, 1648, the contracting powers being France, Germany, and Sweden. Spain was not a party to it, as she and France still remained at war. The balance of power—the great principle established by this treaty—has ever since formed the palladium of the smaller States of Europe, though it was soon imperilled by the aspiring ambition of Louis XIV.

It were needless to trace the many striking events which give character to this period, more especially as they will be found sufficiently indicated in the following sections. Though shorter in duration, it will bear favourable comparison with any previous period. In England we have Cromwell and the Commonwealth, the restoration of Charles II., the atrocities that marked his reign, and the great revolution; in Western Europe we have the career of the grasping and arrogant Louis XIV., the Revocation of the Edict of Nantes, the war of the Spanish succession, and the capture of Gibraltar by the English; in Northern Europe, Charles XII., Peter the Great, and the still greater Frederick of Prussia; in politics we have the Peace of Utrecht and of Breda, the Treaties of Aix-la-Chapelle and Versailles, and the legislative union of England and Scotland; in war, many great battles, both by land and sea; in philosophy we have Kant in Germany, and Locke in England; in literature, the brilliant names of John Milton, John Bunyan, and John Owen; and in science, Sir Isaac Newton, James Watt, and the distinguished Swedish botanist, Linnæus.

SECT. 37.—From the Peace of Westphalia to the Revolution
in England (A. D. 1648-1688).

A. D.

1649. Charles I. of England beheaded.

1788. Death of Prince Charles Edward at Rome.
the chivalrous Pretender retires to his rest.

„ The Quakers of Philadelphia emancipate their slaves.
conscientious Quakers restore them their rights.

CHAP. IX.—FROM THE FRENCH REVOLUTION TO THE
 PRESENT TIME (A.D. 1789-1869).

It would be difficult to find in any age or country an event of a purely secular nature that can vie in importance with the French Revolution. We have now in these pages surveyed several thousand leading events—events belonging to all countries of the globe, and to the seven millenniums that have elapsed since human history began ; but, laying aside the Universal Deluge, the Call of Abraham, and the Birth of Christ (all of which partake of the *supernatural*), we have nowhere discovered an event which, in the interests that were at stake, the passions brought into play, or the magnitude of the results, can fairly compare with this tremendous revolution. The mighty empires of ancient times were founded or overthrown with much noise and bloodshed, but, generally speaking, each of them left the world and the human race very much as it found them. Originating in the avarice or ambition of the individual actors, they were carried into effect by mere physical force, and not by intellect, reason, or justice. Or if, in later ages, we detect intellectual and moral *ideas* at work—as in the achievements of Mohammed, Hildebrand, and the Crusaders—we see them assuming the degenerate forms of fanaticism and superstition. Nowhere did the conquerors make an indelible impression on the race, or ameliorate the condition of society. Some great inventions and discoveries—as the arts of writing and of printing, the variation of the needle, and the law of gravitation—have, indeed, produced mighty and manifold changes, but in every instance these changes have been silent, slow, and gradual ; whereas the great

revolution which ushered in the present age, and which has given tone and character to all its main events, burst on the world with all the suddenness of a volcano, shaking to its foundations the country in which it occurred, and darkening the heavens of all civilised lands.

SECT. 42.—From the Meeting of the States-General to the Death of Louis XVI. (A.D. 1789-1793).

A. D.

1789. The States-General convoked to meet at Versailles.

ENGLISH ETYMOLOGICAL DICTIONARIES.

I.

AN ETYMOLOGICAL AND PRONOUNCING

DICTIONARY OF THE ENGLISH LANGUAGE.

Including a very Copious Selection of Scientific, Technical, and other Terms and Phrases. Designed for Use in Schools and Colleges, and as a Handy Book for General Reference. By the REV. JAMES STORMONTH. The Pronunciation carefully revised by the REV. P. H. PHELP, M.A. Fourth Edition, revised, and enlarged with a Supplement of many additional words; and a List of Scripture proper names, and other names, all respelt for pronunciation. Crown 8vo, pp. 785, 7s. 6d.

II.

THE SCHOOL ETYMOLOGICAL DICTIONARY AND

WORD-BOOK. Combining the advantages of an ordinary Pronouncing School Dictionary and an Etymological Spelling-Book. Containing: The Dictionary—List of Prefixes—List of Postfixes—Vocabulary of Root-words, followed by English Derivations. By the Same. Fcap. 8vo, pp. 260. 2s.

III.

THE HANDY SCHOOL DICTIONARY. For Use in

Elementary Schools, and as a Pocket Reference Dictionary. By the Same. Pp. 268. 9d.

THE DAILY CLASS-BOOK OF ETYMOLOGIES.

Being a Reprint of the Appendix to the 'School Etymological Dictionary and Word-Book.' For Use in Schools. By the Same. 6d.

OPINIONS OF THE PRESS.

ETYMOLOGICAL AND PRONOUNCING DICTIONARY.

"This Dictionary is admirable. The etymological part especially is good and sound. . . . The work deserves a place in every English school, whether boys' or girls'."—*Westminster Review*.

"A good Dictionary to people who do much writing is like a life-belt to people who make ocean voyages: it may, perhaps, never be needed, but it is always safest to have one at hand. This use of a dictionary, though one of the humblest, is one of the most general. For ordinary purposes a very ordinary dictionary will serve; but when one has a dictionary, it is as well to have a

STORMONTH'S DICTIONARIES—*Opinions continued.*

good one. . . . Special care seems to have been bestowed on the pronunciation and etymological derivation, and the 'root-words' which are given are most valuable in helping to a knowledge of primary significations. All through the book are evidences of elaborate and conscientious work, and any one who masters the varied contents of this dictionary will not be far off the attainment of the complete art of 'writing the English language with propriety,' in the matter of orthography at any rate."—*Belfast Northern Whig.*

"A full and complete etymological and explanatory dictionary of the English language. . . . We have not space to describe all its excellences, or to point out in detail how it differs from other lexicons; but we cannot with justice omit mentioning some of its more striking peculiarities. In the first place, it is comprehensive, including not only all the words recognised by the best authorities as sterling old English, but all the new coinages which have passed into general circulation, with a great many scientific terms, and those which come under the designation of slang. . . . The pronunciation is carefully and clearly marked in accordance with the most approved modern usage, and in this respect the Dictionary is most valuable and thoroughly reliable. As to the etymology of words, it is exhibited in a form that fixes itself upon the memory, the root-words showing the probable origin of the English words, their primary meaning, and their equivalents in other languages. Much useful information and instruction relative to prefixes, postfixes, abbreviations, and phrases from the Latin, French, and other languages, &c., appropriately follow the Dictionary, which is throughout beautifully and most correctly printed."—*Civil Service Gazette.*

"A really good and valuable dictionary."—*Journal of Education.*

"I am happy to be able to express—and that in the strongest terms of commendation—my opinion of the merits of this Dictionary. Considering the extensive field which it covers, it seems to me a marvel of painstaking labour and general accuracy. With regard to the scientific and technical words so extensively introduced into it, I must say, that in this respect I know no Dictionary that so satisfactorily meets a real and widely felt want in our literature of reference. I have compared it with the large and costly works of Latham, Wedgwood, and others, and find that in the fulness of its details, and the clearness of its definitions, it holds its own even against them. The etymology has been treated throughout with much intelligence, the most distinguished authorities, and the most recent discoveries in philological science, having been laid under careful contribution."—*Richard D. Graham, Esq., English Master, College for Daughters of Ministers of the Church of Scotland and of Professors in the Scottish Universities.*

SCHOOL ETYMOLOGICAL DICTIONARY.

"This Dictionary, which contains every word in ordinary use, is followed up by a carefully prepared list of prefixes and postfixes, with illustrative examples, and a vocabulary of Latin, Greek, and other root-words, followed by derived English words. It will be obvious to every experienced teacher that these lists may be made available in many ways for imparting a sound knowledge of the English language, and for helping unfortunate pupils over the terrible difficulties of our unsystematic and stubborn orthography. We think this volume will be a valuable addition to the pupil's store of books, and, if rightly used, will prove a safe and suggestive guide to a sound and thorough knowledge of his native tongue."—*The Schoolmaster.*

"Mr Stormonth, in this admirable word-book, has provided the means of carrying out our principle in the higher classes, and of correcting all the inexactness and want of completeness to which the English student of English is liable. His book is an etymological dictionary curtailed and condensed. . . . The pronunciation is indicated by a neat system of symbols, easily mastered at the outset, and indeed pretty nearly speaking for themselves."—*School Board Chronicle.*

G E O G R A P H Y.**Seventh Thousand.**

New Edition, thoroughly revised and brought down to the present time.

MANUAL OF MODERN GEOGRAPHY: MATHEMATICAL, PHYSICAL, AND POLITICAL; on a new plan, embracing a complete development of the River Systems of the Globe. By the Rev. ALEXANDER MACKAY, LL.D., F.R.G.S. Revised to date of publication. Crown 8vo, pp. 688. 7s. 6d.

This volume—the result of many years' unremitting application—is specially adapted for the use of Teachers, Advanced Classes, Candidates for the Civil Service, and proficients in geography generally.

In this edition the entire work has been subjected to another thorough revision. All political changes are carefully represented; the social, industrial, and commercial statistics of all countries are brought down to the latest dates; and the rapid progress of geographical discovery is duly notified. In short, no pains have been spared to render the work wholly reliable in every department.

Forty-Second Thousand.

ELEMENTS OF MODERN GEOGRAPHY. By the Same.

Revised to the present time. Crown 8vo, pp. 300. 3s.

The 'Elements' form a careful condensation of the 'Manual,' the order of arrangement being the same, the river-systems of the globe playing the same conspicuous part, the pronunciation being given, and the results of the latest census being uniformly exhibited. This volume is now extensively introduced into many of the best schools in the kingdom.

One Hundred and Ninth Thousand.

OUTLINES OF MODERN GEOGRAPHY. By the Same.

Revised to the present time. 18mo, pp. 112. 1s.

These 'Outlines'—in many respects an epitome of the 'Elements'—are carefully prepared to meet the wants of beginners. The arrangement is the same as in the Author's larger works. Minute details are avoided, the broad outlines are graphically presented, the accentuation marked, and the most recent changes in political geography exhibited.

Fifth Edition, Revised.

THE INTERMEDIATE GEOGRAPHY. Intended as an

Intermediate Book between the Author's 'Outlines of Geography' and 'Elements of Geography.' By the Same. New Edition, to which is appended an abridgment of 'Scripture Geography.' Crown 8vo, pp. 244. 2s.

Sixty-Ninth Thousand.

FIRST STEPS IN GEOGRAPHY. By the Same. Revised to the present time. 18mo, pp. 56. Sewed, 4d. In cloth, 6d.

GEOGRAPHY OF THE BRITISH EMPIRE. By the Same. 3d.

ELEMENTS OF PHYSIOGRAPHY. By the Same.

Ninth Thousand. *See page 11.*

OPINIONS OF DR MACKAY'S GEOGRAPHICAL SERIES.

Annual Address of the President of the Royal Geographical Society. --We must admire the ability and persevering research with which he has succeeded in imparting to his 'Manual' so much freshness and originality. In no respect is this character more apparent than in the plan of arrangement, by which the author commences his description of the physical geography of each tract by a sketch of its true basis or geological structure. It is, indeed, a most useful school-book in opening out geographical knowledge.

Saturday Review.—It contains a prodigious array of geographical facts, and will be found useful for reference.

English Journal of Education.—Of all the Manuals on Geography that have come under our notice, we place the one whose title is given above in the first rank. For fulness of information, for knowledge of method in arrangement, for the manner in which the details are handled, we know of no work that can, in these respects, compete with Mr Mackay's Manual.

A. KEITH JOHNSTON, LL.D., F.R.S.E., F.R.G.S., H.M. Geographer for Scotland, Author of the 'Royal Atlas,' &c., &c.—There is no work of the kind in this or any other language, known to me, which comes so near my *ideal* of perfection in a school-book, on the important subject of which it treats. In arrangement, style, selection of matter, clearness, and thorough accuracy of statement, it is without a rival; and knowing, as I do, the vast amount of labour and research you bestowed on its production, I trust it will be so appreciated as to insure, by an extensive sale, a well-merited reward.

G. BICKERTON, Esq., Edinburgh Institution.—I have been led to form a very high opinion of Mackay's 'Manual of Geography' and 'Elements of Geography,' partly from a careful examination of them, and partly from my experience of the latter as a text-book in the EDINBURGH INSTITUTION. One of their most valuable features is the elaborate Table of River-Basins and Towns, which is given in addition to the ordinary Province or County list, so that a good idea may be obtained by the pupil of the natural as well as the political relationship of the towns in each country. On all matters connected with Physical Geography, Ethnography, Government, &c., the information is full, accurate, and well digested. They are books that can be strongly recommended to the student of geography.

RICHARD D. GRAHAM, English Master, College for Daughters of Ministers of the Church of Scotland and of Professors in the Scottish Universities.—No work with which I am acquainted so amply fulfils the conditions of a perfect text-book on the important subject of which it treats, as Dr Mackay's 'Elements of Modern Geography.' In fulness and accuracy of details, in the scientific grouping of facts, combined with clearness and simplicity of statement, it stands alone, and leaves almost nothing to be desired in the way of improvement. Eminently fitted, by reason of this exceptional variety and thoroughness, to meet all the requirements of higher education, it is never without a living interest, which adapts it to the intelligence of ordinary pupils. It is not the least of its merits that its information is abreast of all the latest developments in geographical science, accurately exhibiting both the recent political and territorial changes in Europe, and the many important results of modern travel and research.

Spectator.—The best Geography we have ever met with.

HISTORICAL READING-BOOKS.

EPITOME OF ALISON'S HISTORY OF EUROPE, for THE USE OF SCHOOLS. Sixteenth Edition. Post 8vo, pp. 604. 7s. 6d., bound in leather. Atlas to ditto, 7s.

THE EIGHTEEN CHRISTIAN CENTURIES. By the Rev. JAMES WHITE, Author of 'The History of France.' Seventh Edition, post 8vo, with Index. 6s.

"He goes to work upon the only true principle, and produces a picture that at once satisfies truth, arrests the memory, and fills the imagination. It will be difficult to lay hands on any book of the kind more useful and more entertaining."—*Times*.

HISTORY OF FRANCE, from the Earliest Times. By the SAME. Fifth Edition, post 8vo, with Index. 6s.

HISTORY OF INDIA: From the Earliest Period to the CLOSE OF THE INDIA COMPANY'S GOVERNMENT, WITH AN EPITOME OF SUBSEQUENT EVENTS. Abridged from the Author's larger Work. By JOHN CLARK MARSHMAN, C.S.I. Crown 8vo, pp. 568. 6s. 6d.

"There is only one History of India, and that is Marshman's," exclaimed a critic when the original three-volume edition of this book appeared some years ago. He had read them all, and a whole library of books referring to periods of the history, and this was his conclusion. It is a wise and a just verdict."—*Daily Review*.

THE LIFE AND LABOURS OF THE APOSTLE PAUL. A Continuous Narrative for Schools and Bible-Classes. By CHARLES MICHIE, M.A. Second Edition Revised and Enlarged. Fcap. 8vo, cloth. 1s.

"A succinct, yet clear and comprehensive, view of the life and labours of the great Apostle. The story of Paul's life, so replete with spirit-stirring incidents, is told in a manner extremely well fitted to arrest the attention of advanced pupils, and we can with confidence commend this little work as an admirable text-book for Bible-classes."—*National Educational Gazette*.

ENGLISH PROSE COMPOSITION; A Practical Manual FOR USE IN SCHOOLS. By JAMES CURRIE, M.A., Principal of the Church of Scotland Training College, Edinburgh. Twenty-Seventh Thousand. 1s. 6d.

"We do not remember having seen a work so completely to our minds as this, which combines sound theory with judicious practice. Proceeding step by step, it advances from the formation of the shortest sentences to the composition of complete essays, the pupil being everywhere furnished with all needful assistance in the way of models and hints. Nobody can work through such a book as this without thoroughly understanding the structure of sentences, and acquiring facility in arranging and expressing his thoughts appropriately. It ought to be extensively used."—*Athenæum*.

A MANUAL OF ENGLISH PROSE LITERATURE, Biographical and Critical: designed mainly to show characteristics of style. By W. MINTO, M.A. Crown 8vo. 10s. 6d.

CLASSICAL TEXT-BOOKS.

ADITUS FACILIORES: An Easy Latin Construing Book, with Complete Vocabulary. By A. W. POTTS, M.A., LL.D., Head-Master of the Fettes College, Edinburgh, and sometime Fellow of St John's College, Cambridge; and the Rev. C. DARNELL, M.A., Head-Master of Cargilfield Preparatory School, Edinburgh, and late Scholar of Pembroke and Downing Colleges, Cambridge. Fourth Edition. Fcap. 8vo. 3s. 6d.

ADITUS FACILIORES GRAECI. An Easy Greek Construing Book, with Complete Vocabulary. By the SAME AUTHORS. Fcap. 8vo. 3s.

A PARALLEL SYNTAX. Greek and Latin for Beginners, with Exercises and a Greek Vocabulary. By the Rev. HERBERT W. SNEYD-KYNNERSLEY, LL.M., Trin. Coll., Cambridge; Head-Master of Sunninghill House, Ascot; Author of 'Greek Verbs for Beginners,' &c. Crown 8vo. 3s.

CAMENARUM FLOSCULOS IN USUM FETTESIANORUM DECERPTOS NOTIS QUIBUSDAM ILLUSTRAYERUNT A. GUL. POTTS, M.A., LL.D.; GUL. A. HEARD, M.A. Second Edition. Fcap. 8vo. 2s. 6d.

PRACTICAL RUDIMENTS OF THE LATIN LANGUAGE; Or, LATIN FORMS AND ENGLISH ROOTS. Comprising Accidence, Vocabularys, and Latin-English, English-Latin, and English Derivative Exercises, forming a complete First Latin Course, both for English and Latin Classes. By JOHN ROSS, M.A., Rector of the High School of Arbroath. Crown 8vo, pp. 164. 1s. 6d.

INTRODUCTION TO THE WRITING OF GREEK. For the use of Junior Classes. By Sir D. K. SANDFORD, A.M., D.C.L. New Edition. Crown 8vo. 3s. 6d.

RULES AND EXERCISES IN HOMERIC AND ATTIC GREEK; to which is added a short System of Greek Prosody. By the Same. New Edition. Crown 8vo. 6s. 6d.

GREEK EXTRACTS, WITH NOTES AND LEXICON. For the Use of Junior Classes. By the Same. New Edition. Crown 8vo. 6s.

A TREASURY OF THE ENGLISH AND GERMAN LANGUAGES. Compiled from the best Authors and Lexicographers in both Languages. Adapted to the Use of Schools, Students, Travellers, and Men of Business; and forming a Companion to all German-English Dictionaries. By JOSEPH CAUVIN, LL.D. & PH.D., of the University of Göttingen, &c. Crown 8vo. 7s. 6d., bound in cloth.

"An excellent English-German Dictionary, which supplies a real want."—*Saturday Review.*

NATURAL HISTORY.

A MANUAL OF ZOOLOGY, for the Use of Students. With a General Introduction on the Principles of Zoology. By HENRY ALLEYNE NICHOLSON, M.D., D.Sc., M.A., Ph.D., F.R.S.E., F.G.S., Professor of Natural History in the University of St Andrews. Fifth Edition, revised and greatly enlarged. Crown 8vo, pp. 816, with 394 Engravings on Wood. 14s.

"It is the best manual of zoology yet published, not merely in England, but in Europe."—*Pall Mall Gazette*.

"The best treatise on Zoology in moderate compass that we possess."—*Lancet*.

TEXT-BOOK OF ZOOLOGY, for the Use of Schools. By the Same. Second Edition, enlarged. Crown 8vo, with 188 Engravings on Wood. 6s.

"This capital introduction to natural history is illustrated and well got up in every way. We should be glad to see it generally used in schools."—*Medical Press and Circular*.

INTRODUCTORY TEXT-BOOK OF ZOOLOGY, for THE USE OF JUNIOR CLASSES. By the Same. Third Edition, revised and enlarged, with 156 Engravings. 3s.

"Very suitable for junior classes in schools. There is no reason why any one should not become acquainted with the principles of the science, and the facts on which they are based, as set forth in this volume."—*Lancet*.

"Nothing can be better adapted to its object than this cheap and well-written Introduction."—*London Quarterly Review*.

OUTLINES OF NATURAL HISTORY, for Beginners; being Descriptions of a Progressive Series of Zoological Types. By the Same. With 52 Engravings. 1s. 6d.

"There has been no book since Patterson's well known 'Zoology for Schools' that has so completely provided for the class to which it is addressed as the capital little volume by Dr Nicholson."—*Popular Science Review*.

EXAMINATIONS IN NATURAL HISTORY; being a Progressive Series of Questions adapted to the Author's Introductory and Advanced Text-Books and the Student's Manual of Zoology. By the Same. 1s.

INTRODUCTION TO THE STUDY OF BIOLOGY. By the Same. Crown 8vo, with numerous Engravings. 5s.

A MANUAL OF PALÆONTOLOGY, for the Use of Students. With a General Introduction on the Principles of Palæontology. By the Same. Crown 8vo, with upwards of 400 Engravings. 15s.

"This book will be found to be one of the best of guides to the principles of Palæontology and the study of organic remains."—*Athenæum*.

THE ANCIENT LIFE-HISTORY OF THE EARTH. An Outline of the Principles and Leading Facts of Palæontological Science. By the Same. With a Glossary and Index. In crown 8vo, with 270 Engravings. 10s. 6d.

GEOLOGY.

Eleventh Edition.

INTRODUCTORY TEXT-BOOK OF GEOLOGY. By DAVID PAGE, LL.D., Etc., Professor of Geology in the Durham University College of Physical Science, Newcastle. With Engravings on Wood, and Glossarial Index. 2s. 6d.

"It has not been our good fortune to examine a text-book on science of which we could express an opinion so entirely favourable as we are enabled to do of Mr Page's little work."—*Athenæum*.

Sixth Edition.

ADVANCED TEXT-BOOK OF GEOLOGY. Descriptive AND INDUSTRIAL. With Engravings, and Glossary of Scientific Terms. By the Same. Revised and enlarged. 7s. 6d.

"We have carefully read this truly satisfactory book, and do not hesitate to say that it is an excellent compendium of the great facts of Geology, and written in a truthful and philosophic spirit."—*Edinburgh Philosophical Journal*.

"As a school-book nothing can match the Advanced Text-Book of Geology by Professor Page of Newcastle."—*Mechanics' Magazine*.

"We know of no introduction containing a larger amount of information in the same space, and which we could more cordially recommend to the geological student."—*Athenæum*.

Seventh Edition.

THE GEOLOGICAL EXAMINATOR. A Progressive Series of Questions, adapted to the Introductory and Advanced Text-Books of Geology. Prepared to assist Teachers in framing their Examinations, and Students in testing their own Progress and Proficiency. By the Same. 9d.

Sixth Edition.

THE CRUST OF THE EARTH; A Handy Outline of GEOLOGY. By the Same. 1s.

"An eminently satisfactory work, giving, in less than 100 pages, an admirable outline sketch of Geology, . . . forming, if not a royal road, at least one of the smoothest we possess, to an intelligent acquaintance with geological phenomena."—*Scotsman*.

"Of singular merit for its clearness and trustworthy character."—*Standard*.

Third Edition, Enlarged.

GEOLOGY FOR GENERAL READERS. A Series of Popular Sketches in Geology and Palæontology. By the Same. 6s.

"This is one of the best of Mr Page's many good books. It is written in a flowing, popular style. Without illustration or any extraneous aid, the narrative must prove attractive to any intelligent reader."—*Geological Magazine*.

SYNOPSIS OF SUBJECTS taught in the Geological Class, College of Physical Science, Newcastle-on-Tyne, University of Durham. By the Same. Fcap. cloth. 2s. 6d.

Second Edition, Enlarged.

HANDBOOK OF GEOLOGICAL TERMS, GEOLOGY, AND PHYSICAL GEOGRAPHY. By the Same. 7s. 6d.

GEOLOGY—Continued.

CHIPS AND CHAPTERS. A Book for Amateurs and Young Geologists. By DAVID PAGE, LL.D., Etc. 5s.

THE PHILOSOPHY OF GEOLOGY. A Brief Review of the Aim, Scope, and Character of Geological Inquiry. By the Same. Fcap. 8vo. 3s. 6d.

From the 'Saturday Review.'

"Few of our hand-books of popular science can be said to have greater or more decisive merit than those of Mr Page on Geology and Palæontology. They are clear and vigorous in style, they never oppress the reader with a pedantic display of learning, nor overwhelm him with a pompous and superfluous terminology; and they have the happy art of taking him straightway to the face of nature herself, instead of leading him by the tortuous and bewildering paths of technical system and artificial classification."

BOTANY.

A MANUAL OF BOTANY, Anatomical and Physiological. For the Use of Students. By ROBERT BROWN, M.A., PH.D., F.R.G.S. Crown 8vo, with numerous Illustrations. 12s. 6d.

"This is a work of very meritorious character."—*Scientific and Literary Review.*

"We have no hesitation in recommending this volume to our readers as being the best and most reliable of the many works on botany yet issued. . . . His manual will, if we mistake not, be eagerly consulted and attentively studied by all those who take an interest in the science of botany."—*Civil Service Gazette.*

AGRICULTURE.

CATECHISM OF PRACTICAL AGRICULTURE. By HENRY STEPHENS, F.R.S.E., Author of the 'Book of the Farm.' A New Edition. With Engravings. 1s.

"Teachers will find in this little volume an admirable course of instruction in practical agriculture—that is, the outlines which they may easily fill up; and by following the hints given in Mr Stephens' preface, the course would scarcely fail to be quite interesting, as well as of great practical benefit. Landed proprietors and farmers might with propriety encourage the introduction of this work into schools."—*Aberdeen Journal.*

PROFESSOR JOHNSTON'S CATECHISM OF AGRICULTURAL CHEMISTRY. Seventy-fifth thousand, edited by Professor VOELCKER. With Engravings. 1s.

PROFESSOR JOHNSTON'S ELEMENTS OF AGRICULTURAL CHEMISTRY AND GEOLOGY. Tenth Edition, revised and brought down to the present time, by CHARLES A. CAMERON, M.D., F.R.G.S.I., Etc. Foolscap. 6s. 6d.

PHYSICAL GEOGRAPHY.

INTRODUCTORY TEXT-BOOK OF PHYSICAL GEOGRAPHY. With Sketch-Maps and Illustrations. By DAVID PAGE, LL.D., Etc., Author of Text-Books of Geology. Ninth Edition. 2s. 6d.

"The divisions of the subject are so clearly defined, the explanations are so lucid, the relations of one portion of the subject to another are so satisfactorily shown, and, above all, the bearings of the allied sciences to Physical Geography are brought out with so much precision, that every reader will feel that difficulties have been removed, and the path of study smoothed before him."—*Athenæum*.

"Whether as a school-book or a manual for the private student, this work has no equal in our Educational literature."—*Iron*.

ADVANCED TEXT-BOOK OF PHYSICAL GEOGRAPHY. With Engravings. By the Same. Second Edition. 5s.

"A thoroughly good Text-Book of Physical Geography."—*Saturday Review*.

EXAMINATIONS ON PHYSICAL GEOGRAPHY. A Progressive Series of Questions, adapted to the Introductory and Advanced Text-Books of Physical Geography. By the Same. Third Edition. 9d.

ELEMENTS OF PHYSIOGRAPHY AND PHYSICAL GEOGRAPHY. With express reference to the Instructions recently issued by the Science and Art Department. By the Rev. ALEX. MACKAY, LL.D., F.R.G.S., Author of 'A Manual of Modern Geography, Mathematical, Physical, and Political,' &c. With numerous Illustrations. Ninth Thousand, pp. 150. 1s. 6d.

COMPARATIVE GEOGRAPHY. By CARL RITTER. Translated by W. L. GAGE. Fcap. 3s. 6d.

METEOROLOGY.

INTRODUCTORY TEXT-BOOK OF METEOROLOGY. By ALEXANDER BUCHAN, M.A., F.R.S.E., Secretary of the Scottish Meteorological Society, Author of 'Handy Book of Meteorology,' &c. Crown 8vo, with 8 Coloured Charts and other Engravings. Pp. 218. 4s. 6d.

"A handy compendium of Meteorology by one of the most competent authorities on this branch of science."—*Petermann's Geographische Mittheilungen*.

"We can recommend it as a handy, clear, and scientific introduction to the theory of Meteorology, written by a man who has evidently mastered his subject."—*Lancet*.

"An exceedingly useful volume."—*Athenæum*.

HANDY BOOK OF METEOROLOGY. By the Same. Third Edition.

In this Edition the Charts of the Distribution of Atmospheric Pressure and of Terrestrial Temperature will be thoroughly revised; the Relations of Temperature to Atmospheric Pressure and Winds will, with the aid of Illustrative Charts, be more fully discussed. Charts will be given showing the Distribution of Rain over the Continents of the Globe; prevailing Winds will be pointed out; and otherwise the Book will be revised throughout. *[In preparation.]*

MATHEMATICS, &c.

THE THEORY OF ARITHMETIC. By David Munn, F.R.S.E., Mathematical Master, Royal High School of Edinburgh. Crown 8vo, pp. 294. 5s.

ELEMENTARY ARITHMETIC. By Edward Sang, F.R.S.E. This Treatise is intended to supply the great desideratum of an intellectual instead of a routine course of instruction in Arithmetic. Post 8vo. 5s.

THE HIGHER ARITHMETIC. By the Same. Being a Sequel to 'Elementary Arithmetic.' Crown 8vo. 5s.

FIVE-PLACE LOGARITHMS. Arranged by the Same. Sixpence. For the Waistcoat-Pocket.

TREATISE ON ARITHMETIC, with numerous Exercises for Teaching in Classes. By JAMES WATSON, one of the Masters of-Heriot's Hospital. Foolscap. 1s.

PRIMER OF GEOMETRY. An Easy Introduction to the Propositions of Euclid. By FRANCIS CUTHBERTSON, M.A., LL.D., late Fellow of Corpus Christi College, Cambridge; Head Mathematical Master of the City of London School. 1s. 6d.

"The selection is most judicious, and we believe the plan will be successful."—*Spectator*.

A GLOSSARY OF NAVIGATION. Containing the Definitions and Propositions of the Science, Explanation of Terms, and Description of Instruments. By the Rev. J. B. HARBORD, M.A., Assistant Director of Education, Admiralty. Crown 8vo, Illustrated with Diagrams. 6s.

DEFINITIONS AND DIAGRAMS IN ASTRONOMY AND NAVIGATION. By the Same. 1s. 6d.

ELEMENTARY HAND-BOOK OF PHYSICS. With 210 Diagrams. By WILLIAM ROSSITER, F.R.A.S., &c. Crown 8vo, pp. 390. 5s.

"A singularly interesting Treatise on Physics, founded on facts and phenomena gained at first hand by the Author, and expounded in a style which is a model of that simplicity and ease in writing which betokens mastery of the subject. To those who require a non-mathematical exposition of the principles of Physics, a better book cannot be recommended."—*Pall Mall Gazette*.

MENTAL PHILOSOPHY.

Sixth Edition.

LECTURES ON METAPHYSICS. By Sir WILLIAM HAMILTON, Bart., Professor of Logic and Metaphysics in the University of Edinburgh. Edited by the Very Rev. H. L. MAXSELL, LL.D., Dean of St Paul's, and JOHN VEITCH, M.A., Professor of Logic and Rhetoric, Glasgow. 2 vols. 8vo. 24s.

Third Edition.

LECTURES ON LOGIC. By Sir WILLIAM HAMILTON, Bart. Edited by the Same. 2 vols. 8vo. 24s.

Third Edition.

DISCUSSIONS ON PHILOSOPHY AND LITERATURE, EDUCATION AND UNIVERSITY REFORM. By Sir WILLIAM HAMILTON, Bart. 8vo. 21s.

New Edition.

PHILOSOPHICAL WORKS OF THE LATE JAMES FREDERICK FERRIER, B.A., Oxon., LL.D., Professor of Moral Philosophy and Political Economy in the University of St Andrews. 3 vols. crown 8vo. 34s. 6d.

The following are sold Separately:—

INSTITUTES OF METAPHYSIC. Third Edition. 10s. 6d.

LECTURES ON THE EARLY GREEK PHILOSOPHY. Second Edition. 10s. 6d.

PHILOSOPHICAL REMAINS, INCLUDING THE LECTURES ON EARLY GREEK PHILOSOPHY. Edited by Sir ALEX. GRANT, Bart., D.C.L., and Professor LUSHINGTON. 2 vols. 24s.

Eighth Edition.

PORT ROYAL LOGIC. Translated from the French: with Introduction, Notes, and Appendix. By THOMAS SPENCER BAYNES, LL.D., Professor of Logic and English Literature in the University of St Andrews. 12mo. 4s.

Sixth Edition.

METHOD, MEDITATIONS, AND PRINCIPLES OF PHILOSOPHY OF DESCARTES. Translated from the original French and Latin. With a New Introductory Essay, Historical and Critical, on the Cartesian Philosophy. By JOHN VEITCH, LL.D., Professor of Logic and Rhetoric in the University of Glasgow. [In the press.]

THE PHILOSOPHY OF HISTORY IN EUROPE. Vol. I., containing the History of that Philosophy in FRANCE and GERMANY. By ROBERT FLINT, D.D., LL.D., Professor of Divinity in the University of Edinburgh. 8vo. 15s.

A SCIENCE PRIMER.

ON THE NATURE OF THINGS. By JOHN G. MACVICAR, LL.D., D.D. Crown 8vo, with illustrations. 3s. 6d.

ANCIENT CLASSICS FOR ENGLISH READERS,

EDITED BY THE REV. W. LUCAS COLLINS, M.A.

In 20 vols., price 2s. 6d. each, in cloth (sold separately); or bound in 10 vols., with calf or vellum back, for £2, 10s.

CONTENTS.

HOMER: THE ILIAD. By the Editor.	HESIOD AND THEOGNIS. By the Rev. J. Davies, M.A.
HOMER: THE ODYSSEY. By the Editor.	GREEK ANTHOLOGY. By Lord Neaves.
HERODOTUS. By G. C. Swayne, M.A.	VIRGIL. By the Editor.
XENOPHON. By Sir Alexander Grant, Bart.	HORACE. By Theodore Martin.
EURIPIDES. By W. B. Donne.	JUVENAL. By Edward Walford, M.A.
ARISTOPHANES. By the Editor.	PLAUTUS AND TERENCE. By the Editor.
PLATO. By C. W. Collins, M.A.	THE COMMENTARIES OF CÆSAR. By Anthony Trollope.
LUCIAN. By the Editor.	TACITUS. By W. B. Donne.
ÆSCHYLUS. By Reginald S. Copleston, D.D. (now Bishop of Colombo).	CICERO. By the Editor.
SOPHOCLES. By Clifton W. Collins, M.A.	PLINY'S LETTERS. By the Rev. Alfred Church, M.A., and the Rev. W. J. Brodribb, M.A.

"It is difficult to estimate too highly the value of such a series as this in giving 'English readers' an insight, exact as far as it goes, into those olden times which are so remote and yet to many of us so close."—*Saturday Review*.

"It is impossible to praise too highly the conception and execution of this series of the Classics. They are a kind of 'Bibliotheca Classicorum' for unlearned readers, but executed by men of the most accomplished scholarship, and therefore conveying the very colour and tone of the authors. They will be as pleasant to scholars as they are valuable to those who know only their mother tongue."—*British Quarterly Review*.

"A series which has done and is doing so much towards spreading among Englishmen intelligent and appreciative views of the chief classical authors."—*Standard*.

"We gladly avail ourselves of this opportunity to recommend the other volumes of this useful series, most of which are executed with discrimination and ability."—*Quarterly Review*.

SUPPLEMENTARY SERIES
OF THE
ANCIENT CLASSICS FOR ENGLISH READERS.

EDITED BY THE REV. W. LUCAS COLLINS, M.A.

Crown 8vo, 2s. 6d. each.

I. LIVY. By the EDITOR.

“It could not possibly be better done. Within a very small compass there is not only a lucid summary of Livy’s narrative, with some well-chosen extracts sufficient to give a notion of the picturesque and rhetorical power which constitutes the author’s chief claim to immortality, but also a fair intimation of his merits and demerits as a historian, and of the havoc which modern criticism has wrought in the splendid and captivating romance.”—*Guardian*.

II. OVID. By the Rev. A. CHURCH, M.A.

“Mr Church had a delicate work to do, and he has done it well. This excellent little book right worthily fills a vacant niche in a series which, on the whole, richly merits the popularity that it has gained.”—*Spectator*.

III. CATULLUS, TIBULLUS, AND PROPERTIUS. By the Rev. JAMES DAVIES, M.A.

“It is indeed a fascinating little volume—one that will be readily taken up and reluctantly laid down, and that must not be missed by those who desire to make familiar and loving acquaintance with the brilliant trio portrayed in its pages.”—*Civil Service Gazette*.

IV. DEMOSTHENES. By the Rev. W. J. BRODRIBB.

“To give in a few pages to the unlearned reader anything like an adequate idea of an oratory so potent, yet so subtle, is a task of enormous difficulty. It is one which Mr Brodrigg, in our judgment, has performed with singular success. . . . Were it indeed only for the single chapter on ‘Demosthenes at the Bar,’ his volume would more than repay the most exacting purchaser.”—*Graphic*.

“Mr Brodrigg’s sketch of Demosthenes brings into moderate compass the main features of a memorable life, and that with great tact, fairness, and impartiality.”—*Saturday Review*.

V. ARISTOTLE. By Sir ALEX. GRANT, Bart., LL.D.

“We part with this interesting volume with a just tribute of praise. The greatest Aristotelian scholar, perhaps, of our age has written with all the plainness and the simplicity of a good teacher of unlearned people. His style is the very reverse of pedantry; it is high learning stooping to the faculties of the unlearned; and as such it is a model of the ‘difficult made easy.’”—*British Quarterly Review*.

VI. THUCYDIDES. By the EDITOR.

“Enough, it is hoped, has been said of Mr Collins’s ‘Thucydides’ to show its title to a foremost place in the excellent series for which English readers of ancient classics have to thank him.”—*Saturday Review*.

VII. LUCRETIUS. By W. H. MALLOCK.

Other Volumes in preparation.

**BLACKWOOD'S
FOREIGN CLASSICS FOR ENGLISH READERS.**

EDITED BY MRS OLIPHANT.

In course of publication, price 2s. 6d. each.

I. DANTE. By the Editor.

EXAMINER.—“It is, for its size, scope, and aim, one of the best works on Dante in English. . . . Is an admirably-written short account of the great Florentine poet, such as will give those who have no time to study, or are about to begin, his works, a clear and comprehensive understanding of the man and of his labours. At the same time it will remain a charmingly readable essay for those to whom the works of Dante are familiar.”

SPECTATOR.—“On the whole we consider Mrs Oliphant's to be exactly the book which its authoress intended, and a very grateful and opportune boon to all who are beginning the study of Dante, as well as to the far larger class of readers who, without having either time or energy for so arduous a task as that, are still anxious to acquire a clear and (for their purpose) adequate knowledge of the genius and writings of an author of whom—far more truly than of Montaigne—it may be said that he is the first author whom a gentleman is ashamed of not knowing.”

II. VOLTAIRE. By Major-General E. B. Hamley.

SATURDAY REVIEW.—“A work in which all the salient points of a complicated and puzzling existence are brought in a clear and striking manner into a general view.”

WESTMINSTER REVIEW.—“A bright and judicious little book, which gives us a clear picture of all that is most interesting and most useful about the patriarch of Ferney. Col. Hamley has given a special charm to his book by writing at considerable length on Voltaire's visit to this country on his ‘Letters on the English.’”

III. PASCAL. By Principal Tulloch.

PALL MALL GAZETTE.—“The result of Principal Tulloch's labours is a little volume which is excellently pitched for English readers, and, avoiding critical questions, collects into a charming miniature all that can be most interesting to them.”

IV. PETRARCH. By Henry Reeve.

V. GOETHE. By A. Hayward, Q.C.

IN PREPARATION.

MOLIERE, By the EDITOR, and F. TARVER, M.A.
MONTAIGNE, By the Rev. W. LUCAS COLLINS, M.A.
SCHILLER, By ANDREW WILSON.

NINTH THOUSAND.

PHYSIOGRAPHY AND PHYSICAL GEOGRAPHY.

WITH

EXPRESS REFERENCE TO THE INSTRUCTIONS RECENTLY ISSUED
BY THE SCIENCE AND ART DEPARTMENT.

Crown 8vo, pp. 158. With Numerous Illustrations, Syllabus, and
Examination Papers. Price 1s. 6d.

By the Rev. ALEX. MACKAY, LL.D., F.R.G.S.

EXTRACTS FROM REVIEWS.

“The well-known and successful writer of School Geographies steps into the gap thus made, with his accurate knowledge, comprehensive grasp of facts, and power of preparing his information for tolerably easy assimilation in the minds of beginners, and produces a book which is a sort of elementary compendium of nearly all the sciences, containing knowledge up to the latest date. . . . Will prove a really useful textbook.”—*Spectator*.

“Following the Syllabus issued by the Science and Art Department, the author has given, within the limits of 144 closely-printed pages, a succession of terse paragraphs under the subjects and headings named therein, and has succeeded in condensing a vast amount of information into this small space. The book, which is illustrated by woodcuts here and there, and provided with a full index, will doubtless be welcomed by students who are reading for examination in ‘Physiography,’ and who previously must have been obliged to glean their information from a large number of separate works.”—*The Academy*.

“The book is a capital one, brimful of information brought down to the latest date, written by a thoroughly competent hand, and admirably arranged. Teachers will do well to make a note of it.”—*London Educational Times*.

“Dr Mackay has given us an excellent treatise, which Physiographers will do well to obtain and put into the hands of their capable pupils. The newer parts—the additions to the subject of Physical Geography—are especially valuable.”—*The Schoolmaster*.

“Really a capital *multum in parvo* for even advanced students.”—*The Graphic*.

“In this eighteenpenny book of 150 pages will be found the masterly, lucid, and concise abstracts of physical science which only come of thorough knowledge, vivid sympathy with the pupil, and very large experience in and love of simple and terse exposition.”—*Bayswater Chronicle*.

“The result is that a volume has been produced which contains the maximum of information in the minimum of space.”—*Morning Advertiser*.

“To the students of physical science it will be valuable as a reminder of much which, but for such a book as this, they might be in danger of forgetting. Schools, and students at home, will welcome this very comprehensive volume.”—*John Bull*.

“The plan of the volume is admirable; its style is lucid and simple, and the facts are marshalled in so concise and accurate a form, that no student will have any difficulty in mastering the author’s teaching. The numerous illustrations and diagrams greatly elucidate the text, and will be found of inestimable assistance to the learner: and in fact, it is no exaggeration to state that Dr Mackay’s manual is in every respect the best and cheapest book on the subject of which it treats.”—*Birmingham Gazette*.

“This is a brief but admirably condensed manual on a subject inferior to none in interest. . . . We need hardly say the learned doctor has fulfilled his self-imposed task with great felicity—fulness, accuracy, and perspicuity are combined, and the result is a text-book of paramount excellence.”—*Sheffield Independent*.

“The introduction of a book of this wide scope makes a great advance in elementary education, and in the volume before us Dr Mackay deals with the elements of his subject in a very comprehensive way.”—*Liverpool Albion*.

“The ‘Elements of Physiography’ presents a rapid and condensed, but still comprehensive, survey of the leading facts in the various branches of the new science.”—*Scotsman*.

“A valuable addition to the geographical text-books of the publishers.”—*Edinburgh Daily Review*.

“‘Physiography and Physical Geography’ is one of the most compact handbooks to the sciences on which it treats to be found in the whole range of modern literature. . . . The volume, which is copiously illustrated, is one which should be in the possession of all students taking up the branch of *Physiography*—one now substituted by the Science and Art Department for *Physical Geography*.”—*Greenock Advertiser*.

“It makes one sigh to think that, when he was at school, he should have had to go to fifty different sources for the knowledge here brought into one focus.”—*Dundee Evening News*.

“As a summary of information the book is certainly the most suitable for present wants that exists.”—*Ayr Observer*.

“Dr Mackay’s ability as a geographer is well known, and in his present work we find the same characteristics as in those that have preceded it. The book will, we are satisfied, meet the wants of teachers and scholars admirably, and the private student will find it very convenient and useful.”—*Aberdeen Free Press*.

“The mass of information conveyed is really wonderful, and the author’s power of condensation is such, that we think the pupil who carefully masters the present treatise ought not to fail at the examination.”—*Irish Teachers’ Journal*.

“To those who wish a general view of the subject treated of, the book is invaluable, and we have no doubt that it will form the text-book in national and other schools.”—*Londonderry Standard*.

“The book is calculated to be a valuable aid to students, and the explanations are rendered clearer than they could otherwise possibly be, by the introduction of numerous illustrations. The various subjects are treated with considerable fulness and marked ability.”—*Belfast Whig*.
